

# General catalogue

2021

INTERNATIONAL

**niko**

In this **general catalogue** you find an **overview of our product range**.  
In the back you find a handy **index** that helps you to find the products easily when you know their reference number.  
At the end of this catalogue you find an overview of our **finishings**.

**Wiring diagrams**, as well as additional **technical information** can be found in the additional **technical pages of each chapter**.

The information in this catalogue can be subject to change. The most recent information, including certifications, can be found at any time at [www.niko.eu](http://www.niko.eu).

| 7.A | Digital solutions        | 7.D | Installation tools |
| 7.B | Analogue video solutions | 7.E | Bell push button   |
| 7.C | Analogue audio solutions |     |                    |

## 8 Index

# Niko, comfort and quality in every home and work environment

In a world where everything is speeding up, your clients increasingly require a higher comfort level. Both in their work and living environment. With Niko, you can integrate limitless comfort into any living space.

After all, Niko designs and produces progressive solutions for electrical switching material, lighting control, home automation and access control. Both private and professional customers worldwide choose Niko's quality solutions because of their ease of installation, ease of use and design.

At the start of this catalogue, we offer you an **overview of our new products**. We're not only refreshing our products, we're also refreshing their technology. Our emphasis? It's on easy installation and programming. And naturally on quality and design. In the catalogue, you can recognize the new products by their label **NEW**. Register at [www.niko.eu](http://www.niko.eu) for our newsletter to stay up-to-date about our newest products.

In the product seccatalogue you find an **overview of our broad range of products**. Additional **technical information and wiring diagrams** are at the end of each chapter.

You don't find here what you are looking for? The most recent information can be found at any time at [www.niko.eu](http://www.niko.eu).

**We offer you 4 years warranty**, while only 2 years are required by European law. The warranty period for all our products is 4 years from the delivery date. The invoice date is the delivery date. If ever the Niko hardware does not work - even though we have stringent quality controls – our customer service department is ready to help you at + 32 3 778 90 80 or via [support.be@niko.eu](mailto:support.be@niko.eu).

# New in Niko Home Control for traditional wiring

In 2019, Niko has extended the Niko Home Control portfolio with a range of products that you can use to install Niko Home Control in any home. Even in homes with traditional wiring. This makes Niko Home Control suitable for any customer, whether they choose the flexibility of bus wiring or a renovation where the wiring needs to be left untouched. With Niko, you can offer a smart solution to suit every project and every budget.

**You can easily program Niko Home Control for traditional wiring with the trusted and user-friendly programming software.** Control your installation with the **existing and intuitive Niko Home app**.

What about our devices such as the touchscreen and the external video unit that you connect via Ethernet? These can be connected without any problems. In addition, for traditional wiring, Niko Home Control is **compatible with wireless systems from our partner brands**.

## Wireless smart hub

With the wireless smart hub, you can synchronise all the controls in the home. Connected single and double switches, connected dimmers, Digital black, etc. Using the programming software, you can configure these easily. You connect the wireless smart hub to the home network using a network cable or the wifi network. Since July 2020, Niko has been adding an RJ12 cable to every wireless smart hub.

## Get the most out of solar panels

More and more countries and regions are introducing a **smart meter** to measure electricity, gas and water. With the new digital energy meter, it is highly beneficial to align the home's energy consumption to that of its solar panel's production. Niko Home Control helps to do exactly that.

### Ideal for solar panel owners

Niko has a solution that helps use solar energy as efficiently as possible. By aligning the home's energy consumption and its solar production to each other, and by allowing the home owner to program his energy use and sending him alerts when something is out of the ordinary, he can significantly improve the self-consumption.

## Niko Home Control for bus wiring

Complete flexibility, endless possibilities

## Niko Home Control for traditional wiring

Low barrier, standard functions work without programming

### The connected controller

One main brain

### Flexibility of operation

User-friendly design, fewer controls needed

### Heating – ventilation

Control of heating and ventilation

### Digital / Analogue IN

Smoke detectors, CO<sub>2</sub> detection, water leaks, external alarm

### The wireless smart hub for Niko Home Control

Connect the controls and sensors with the internet

### Connected controls

Basic controls: switches, socket outlets, dimmers, roll-down shutter control, motion detectors

compatible with our partners

compatible with our partners

Niko offers a solution to use the home's own solar energy as efficiently as possible:

- align the energy consumption to the solar panel's production
- get insights in gas and electricity consumption and production
- get alerts when something is out of the ordinary

## Get your energy flow under control

A number of home appliances use a great deal of energy: the boiler, the washing machine, the dryer, the dishwasher, even the heating, ventilation or air conditioning systems. It's why you'll want to use energy when it's available – and free!

Now you program these appliances to mainly work when the sun is shining. The advantage? The most sustainable and cheapest energy is the energy you are producing yourself with your own solar panels.

### You stay in control

Your Niko Home Control system informs you when your solar panel produce energy - and reacts exactly the way you have programmed it to. Is your client not happy with the current routines? They can change them themselves, without your help. Is there no sunshine expected all week? Your client decides how his system should handle this: either postpone the action or use the provider's electricity.

### Connecting Niko Home Control to the smart meter

To make sure the connection between the smart meter and the Niko Home Control traditional wiring system is easy, Niko adds to every wireless smart hub an RJ12 cable. This cable will be a part of every wireless smart hub product starting July 2020. At this moment Niko Home Control will be compatible with the digital meter in the Netherlands and Belgium.

## Digital black, connected customisable control screen, 230 V

Do you want to see which functions or moods you can control with which switches? Would you like an additional control screen? Are you renovating a room and looking to add, group or replace controls?

**The solution for this is the Digital black**, an intuitive control screen the same size as a switch. In combination with the wireless smart hub (ref. 552-00001), you can control up to 12 different functions or devices in the Niko Home Control installation: lights on/off, dimming, motor control, ventilation control, music, moods, etc. Do you have a connection to a smart heating installation from one of our partner brands? Then you can easily set the temperature using the Digital black. The Digital black is pure Niko design and integrates seamlessly into every home.

- With one press on the control screen, the user can switch the functions on and off.
- In the accompanying Niko Home app, they can change, add and organise functions, and choose how to navigate through them.
- Users configure the screen themselves and don't need an installer to modify the basic configuration.
- They can add new functions without having to change the wiring or the device. For example, users can choose which controls they want and where, even after the construction work is done and the electrical installation has been fitted.

In the Digital black for traditional wiring, there is a relay. This means that in a three-wire installation, you replace a single switch. In an electrical circuit with multiple control points, it is sufficient to replace all intermediate and two-way switches with N.O. push buttons (ref. 170-000xx). Nothing else needs to be changed with the wiring. The user can **manually control the screen immediately after the installation, without additional configuration.**

## Connected single or double switch

The connected single or double switches **can replace any switch in a 3-wire installation**. You can control them from several locations using push button extensions (ref. 170-000xx).

You can **manually control the switch immediately after the installation without additional configuration**. With the double switch, you can control two different light circuits. It has extensions for both circuits. Would you like to control functions such as moods and all-off? Then you only need to add a wireless smart hub (ref. 552-00001) to the installation.

## Connected dimmer

The connected dimmer can replace any 2 or 3-wire switch. Using extensions for push buttons (ref. 170-000xx), you can control it from several locations.

After installation, the user can **immediately control it manually**: just select the dimming profile and the minimum dimming level and they're ready to go! With the connected dimmer, you can not only dim lamps, but also switch them on and off. Would you like to control functions such as moods with the dimmer? That's possible, with a wireless smart hub (ref. 552-00001) which you add to the installation.

## Connected motor control

The connected motor control directly controls 230 V motors (roll-down shutters, garage doors, sun blinds, etc.). In combination with the wireless smart hub, you immediately have the possibility to integrate functions such as moods.

## Connected switching socket outlet

The connected socket outlet can be used in combination with the wireless smart hub (ref. 552-00001) and the Niko Home Control programming software.

**Switch the socket outlet on and off with a smartphone** via the Niko Home app. In the app, you can also see the current and recent energy consumption of the devices that are powered by this connected switching socket outlet. Would you like more comfort and safety? In that case, you can connect the socket outlet to, for example, the all-off button, moods and calendar schedules, consumption notifications on the smartphone, etc.

The connected socket outlet contains a built-in switch. This means you can **manually control the socket outlet immediately after the installation, without additional configuration.**

## Smart plug, Zigbee®

The smart plug can be used in combination with the wireless smart hub (ref. 552-00001) and the Niko Home Control programming software and Niko Home app. **Switch the smart plug on and off with a smartphone via the Niko Home app.** In the app, you can also see the current and recent energy consumption of the devices that are powered by this smart plug. Would you like more comfort and safety? In that case, you can connect the smart plug to, for example, the all-off button, moods and calendar schedules, consumption notifications on the smartphone, etc.

## Wireless motion detector

The wireless motion detector controls one or more contacts or connected devices (switches, dimmers, etc.). Place it anywhere you like. It is powered by batteries and you use it in combination with the wireless smart hub (ref. 552-00001).

# New in Niko Home Control for bus wiring

## Digital black, connected customisable control screen, 24 V

Do you want to see which functions or moods you can control with which switches? Would you like an additional control screen? Then the Digital black is the solution. The Digital black is an intuitive control screen the size of a switch, which you can use to control up to 12 connected functions or devices in a Niko Home Control installation: lights on/off, dimming, motor control, ventilation control, music, moods, etc. As this Digital black 24 V variant is equipped with a temperature sensor and algorithm, it can be programmed as a zone-thermostat when linked to a Niko Home Control heating/cooling module (ref. 550-00150) or switching module (ref. 550-00103 or 550-00106) programmed for electrical heating. When the Digital black is used as a thermostat, you define the set points and week programs in the Niko Home app.

The switch is pure Niko design and integrates seamlessly into every home. Thanks to the proximity sensor, the screen automatically lights up when your hand gets close to the intuitive control screen. That way, control is even faster. With one press on the control screen, the user can switch the functions or moods on and off.

Does the user want to modify the functions, rearrange the controls or even choose a different way of navigating? Then they can easily personalise the Digital black themselves with their smartphone via the Niko Home app, without having to modify the basic configuration and without having to call on your help.

They can add new functions without having to change the wiring or the device. For example, users can choose which controls they want and where, even after the construction work is done and the electrical installation has been fitted.

## USB RF interface

The USB RF interface makes it possible to use Niko wireless Easywave controls (with the exception of the remote control ref. 05-312) in the Niko Home Control installation for bus wiring. This allows wireless controls to be installed:

- on surfaces unsuited to wiring (e.g. glass or concrete partitions)
- for the renovation of heritage-listed buildings
- for expansions of existing installations where drilling or channelling work is not permitted
- in office areas with movable partition walls
- when complex wiring is to be avoided.

The interface is shaped like a USB stick and can be connected to the extension cable (3 m) provided, with the connected controller in the electrical cabinet. The end of the extension cable is fitted with an assembly ring allowing the antennae to be attached to the outside of the electrical cabinet for optimal reception.

## DALI-2 modules for Niko Home Control

### DALI-2 addressable module, 2 channels

The DALI-2 fully addressable 2-channel interface module allows up to 128 DALI endpoints to be connected to a Niko Home Control installation. Addressing and programming of the DALI devices is done from within the Niko Home Control programming software, and no prior DALI knowledge is required. Each of the DALI endpoints can be configured and controlled separately, without the need to use any other DALI software or interface. The module comes with a built-in power supply, so there is no need to use a dedicated DALI power supply for the DALI bus.

- Sliding contact to connect the module to the following module on the DIN rail
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Wire capacity: 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup> per connection terminal
- Maximum standby consumption: 1,9 W
- DIN dimensions: DIN 4TE
- Dimensions (HxWxD): 90 x 70 x 67 mm

### DALI-2 broadcast module, 2 channels

The DALI-2 2-channel broadcast interface module drives two DALI bus channels concurrently. The two channels are exposed as dimmable light sources in Niko Home Control without the need for any additional configuration or use of DALI programming software. All DALI endpoints will simultaneously react to a Niko Home Control control, meaning that up to 64 endpoints per channel will act as a single dimmable light circuit. The module comes with a built-in power supply, so there is no need to use a dedicated DALI power supply for the DALI bus.

- Sliding contact to connect the module to the following module on the DIN rail
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Wire capacity: 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup> per connection terminal
- Maximum standby consumption: 1,9 W
- DIN dimensions: DIN 4TE
- Dimensions (HxWxD): 90 x 70 x 67 mm

## Wall-mounted printed circuit boards for Niko Home Control

### Simple wall-mounted printed circuit boards with base

The wall-mounted printed circuit board for Niko Home Control forms the connection between the control and the installation and is mounted on an existing flush-mounting box or on an uneven wall. Several wall-mounted printed circuit boards can be clicked together using their metal bridge and/or can be combined with any other Niko flush-mounting mechanism.

These products replace the simple wall-mounted printed circuit board with base for Niko Home Control circuit board (ref. 550-14115) that was only available with base, 60 x 71 mm, claw fixing. The product design was updated, but no technical changes have been made.

# New in switching material and socket outlets

## Connected switching socket outlet

You install the connected socket outlet in the same way as a traditional socket outlet. You can switch it on and off with a button. A light shows you if the socket outlet is on or off, and if it is receiving too much current (more than 16 A for longer than 7 seconds).

## Double smart USB-A and USB-C charger

With its charging capacity of 3.5 A, the smart USB charger is the **most powerful USB charger for flush-mounting** on the market. There is a variant with a type A and type C connection. This means you can charge **any mobile device** without an adaptor. Even with **2 at the same time**.

- Smart USB charger with type A and type C connection (ref. 420-00512).
- Finishing set for smart USB charger with type A and type C connection (ref. XXX-68002), in all Niko colours.

## Double socket outlet

### Double socket outlet with side earthing and shutters, vertical

The double socket outlet has always been a great solution to add two socket outlet to your installation when you have only one flush-mounting box available and drilling and channelling is out of the question. The new, upgraded design makes it now even more attractive to install this practical double socket outlet.

The package of this socket outlet includes the mechanism, an integrated central plate and the faceplate. Available in white (ref. 101-67865) and cream (ref. 100-67865).

## Niko Intense matt black & Niko Pure liquid black

Black. A timeless and elegant trend. Discover our two new finishes **Niko Intense matt black** (ref. 130-xxxxx) and **Niko Pure liquid black** (ref. 242-xxxxx). Add these new finishes to your demo suitcase and inspire your customers with a design perfectly suited to their interior.

### A matt black switch which is affordable without sacrificing style?

**Niko Intense matt black** (ref. 130-xxxxx) has a finish as dark as the night and is also the darkest shade within the product range. This design is characterised by a deep black colour and a stylish matt texture. Elegant and timeless, but chiefly versatile.

For the switch button or the interior workings of the socket outlet, Niko design recommends a finishing set in the colour **black coated** (ref. 161-xxxxx).

### A contemporary switch for an innovatively designed home?

It's difficult not to get lost in the hypnotic **Niko Pure liquid black** finish (ref. 242-xxxxx). The endless deep black lustre of this contemporary switch with a cool look is at its best in a sleek home full of technological gadgets. For the switch button or the interior workings of the socket outlet, Niko design recommends a finishing set in the colour **Bakelite®-look piano black coated** (ref. 200-xxxxx).

## Name change of steel faceplates

To ensure consistency in the naming of our finishings, these finishings will receive a new name:

- Niko Pure white steel (ref. 154-76xxx) becomes **Niko Pure steel white**
- Niko Pure champagne steel (ref. 157-76xxx) becomes **Niko Pure steel champagne**
- Niko Pure black steel (ref. 161-76xxx) becomes **Niko Pure steel black**

In the finishing sets, one change is done for length reasons:

- Bakelite®-look piano black coated (ref. 200-xxxxx) becomes **piano black coated**

# New in Niko Hydro

## Splashproof key switches 10 A and 16 A

Does the user wish to control his **garage door, access doors, roll-down shutters, fences, screens or a socket outlet outdoors?** This is now possible thanks to the splashproof key switch 10 A or 16 A. With a simple twist, you turn the power supply on and off. Like all products in the Niko hydro range, the key switch is available in **grey, black and white**.

The splashproof key switches 10A and 16 A are available with screw terminals, in grey, white and black.

## Splashproof bike charging point 16 A

Electric bikes have been on the rise in recent years: more and more people use their bike to get to work. As such, Niko is launching the **Niko Hydro bike charging point** in 3 colours (grey, black and white). **Ideal for:**

- **Apartment buildings** where each flat has its own charging point, especially in combination with the splashproof key switch 16 A.
- **Office buildings** of companies who encourage their staff to come to work by electric bike.
- **Schools**, where we see more and more electric bikes and bike racks.
- **Public and commercial facilities** who want to offer their visitors or customers a charging point (stations, hotels, restaurants, supermarkets, etc.).

Thanks to the **green cover with a bicycle logo**, cyclists can quickly see where they can charge their bikes. The Niko hydro bicycle charging point is high quality and easy to install. It is compatible with every Niko hydro surface-mounting box and flush-mounting box, in any colour (**grey, black or white**).

## Niko Hydro garden posts

### Install up to 3 Niko hydro functions anywhere you want

Niko's vast portfolio of splashproof switches and socket outlets is now extended with grey, black and white garden posts.

The new garden posts allow you to install every Niko hydro function in the garden, even if you don't have a wall available. You attach the garden posts on soft surfaces (like grass or flower beds) with a pin in the ground. On hard surfaces (such as driveways or the patio) you attach the garden post using a base plate.

The Niko hydro garden posts allow you to install up to three Niko hydro functions anywhere you want. They are available in every Niko hydro colour: grey, black and white.

# New in Niko detectors

Both individuals and companies want greater flexibility and comfort when it comes to the management of lighting and access control systems. This is only possible when you connect and monitor equipment, and then control it using an automation system that speaks a common language.

Based on interviews and market input, Niko has completely redesigned its entire KNX detector range to make life easier for everyone involved. Just four SKUs will now be able to meet all the requirements of the market, meaning it'll be easier to choose the motion and presence detector you want.

## All new range of KNX detectors from Niko

Niko's brand new range of KNX ceiling detectors combine all the features you could ever want in a detector, and none you don't. In total, there are 4 SKUs available, but 2 of these will cover nearly all your requirements when it comes to presence and motion detection.

- Mini presence detector P34MR, KNX, 8-10 m, 360°, for flush mounting (ref. 350-34001)
- Presence detector P34MR, KNX, 9-10 m, 360°, for flush mounting and flush-mounting box (ref. 350-34002)
- Motion detector M34LR, KNX, 39-41 m, 360°, for flush-mounting box in white (ref. 350-34003) and black (ref. 350-34013)
- Motion detector M34HC, KNX, high ceiling, 15-29 m, 360°, for flush-mounting box in white (ref. 350-34004) and black (ref. 350-34014)

## Visibly striking & virtually invisible

Niko's new detectors are both beautiful and beautifully designed. The range includes a discreet flat lens version, and the new mini detector is small enough to be integrated in thin ceiling finishing profiles, making them the perfect solution for offices. But don't let their diminutive size fool you... these new KNX detectors pack a punch when it comes to performance.

## High-level delivery

In some cases however, we know you'll need detectors that deliver performance at even higher ceiling heights ... it's why Niko's new range includes 2 high-performance motion detectors for particularly large spaces: up to 40 m detection range and heights up to 10 metres.

### **Interchangeable deco rings in black or white**

All SKUs come with interchangeable deco rings in either black or white, meaning it's easy to swap them if a customer changes their mind. Naturally too, all are finished to Niko's high-quality standards.

### **The best technology solution**

Niko's new KNX detectors are precisely engineered to do the job of sensing motion and presence. This means they are not over engineered to be everything for everyone, as they don't detect temperature change and Volatile Organic Compounds (VOC sensing).

Niko firmly believes that multi-sensing is an emerging technology and needs to mature before a product can really deliver customers' needs for multi-sensing. In our opinion, it doesn't make sense to integrate temperature and VOC sensing in ceiling detectors, as these are already controlled by HVAC and heating systems, and ceilings are not necessarily the best place to monitor temperature, odours or pollutants.

### **Excellent value for money**

Our new detectors offer excellent value for money. Following an in-depth analysis of the market, each new detector has been engineered to deliver top quality performance and yet retail at a highly competitive price.

### **5 available channels**

All of Niko's KNX detectors offer 5 channels, so you don't have to worry about which detector to choose, and you won't have to replace them if your project manager decides on another application beyond presence and lighting control.

### **IEC quality in measuring detector performance**

Niko is one of the first manufacturers to measure its detectors' performance according to EN/IEC63180:2020 standards. This test procedure promises to become the standard for the industry. A robot is used to emulate a human body to maximize accuracy of the measurements. The norm also specifies how to present the detection range so that it can be recognized, trusted and used for comparison to other IEC 63180 compliant products.

# New in lighting and lighting control

## Wireless controls for Bluetooth®, EnOcean® or KNX® based lighting solutions

### Niko dimmer switch, Bluetooth®

With this wireless and battery-free dimmer switch in Niko design (ref. 360-21001), you can remotely operate Bluetooth® low energy 2,4 GHz wireless receivers that are located in the same room. Examples are smart luminaires with integrated Bluetooth® technology, such as **Casambi®** enabled systems or **Xicato®** lighting solutions. No wall breaking or cable installation is needed.

Configure the dimmer switch buttons with the respective smart luminaire app or PC software (e.g. Casambi®, Xicato®, Sylsmart®). Up to four buttons can be configured.

### Niko dimmer switch, EnOcean®

With this wireless and battery-free dimmer switch in Niko design (ref. 360-11001), you can remotely operate EnOcean® certified 868 MHz wireless receivers. Examples are **Niko DALI presence detectors** with an EnOcean® interface (ref. 350-41680, ref. 350-41780, ref. 350-41781) or **more than 5,000 products of the EnOcean® ecosystem**. No wall breaking or cable installation is needed.

Pairing with one or more EnOcean® receivers can be done via a special button combination on the dimmer switch, via the NFC interface or a QR code scan. The pairing procedure with a wireless receiver determines the function of each button. Up to four buttons can be configured. The onboarding process with the above mentioned Niko DALI detectors is done with the Niko detector tool app and the universal remote control for smartphone (ref. 350-41936).

### Niko dimmer switch, KNX®

This wireless and battery-free dimmer switch in Niko design (ref. 360-31001) can operate as a switch, a dimmer, a roller shutter control or a scene selector in a **KNX® system**. The Niko dimmer switch sends wireless telegrams into the air. These are captured by the KNX® wireless media coupler (ref. 360-33001) and converted to the KNX® bus. This allows you to easily extend your KNX® system without breaking walls or installing extra cables.

Configure the dimmer switch buttons with the ETS 5 software together with the **KNX® programming adapter** (ref. 360-39001). The following communication objects can be linked to the buttons: single channel, dimming and shutter control. The supported actions are: on, off, toggle, up, down, darker, brighter, scene number, send value in percentage, in angle, in 2 bits, in 8 bits. Up to six button combinations can be configured.

These dimmer switches can be mounted into a European flush-mounting box, screwed onto a wall (screws not included) or glued to a flat surface with double-sided adhesive strips (included).

The finishing set (ref. xxx-00060) and the faceplate (ref. xxx-76xxx) are already available and must be ordered separately. These dimmer switches combine with any Niko Pure, Niko Intense and Niko Original faceplate in the colour of your choice.

## Always the right lighting with dimmers from Niko

### Rotary dimmer for LEDs 4 - 200 W, 2-wire

People are increasingly opting for energy-efficient lighting. Niko's universal dimmers with PLC interference suppression are an ideal solution to control every type of dimmable lighting, but sometimes a simpler solution can also do the job.

Niko's new entry-level 2-wire LED dimmer is ideal for renovations and young families choosing the more energy-efficient LED lighting. It can handle a load of 4 to 200 W. Now while it doesn't have PLC interference suppression or short circuit protection, the boost function can dim lighting that needs extra power to start. And did you know it has our brilliant nursery function? Give your rotary a little flick to the right and your lights will turn on to their minimum level. It means you don't have to worry that you'll wake up the baby when you check on them.

## LED compensator for 2-wire dimmers

The lighting market is increasingly transitioning towards LED lighting. Electrical installers have two major challenges when installing electrical installations with LED lighting and 2-wire dimmers:

- ghosting: even when the 2-wire dimmer is turned off, the LED lights are lighting up or are showing an afterglow
- flickering / blinking: when the dimmer is set to a particular dimming position, the LED lights start blinking

Niko has developed the LED compensator (ref. 310-05000) in order to solve these issues for the installers. The LED compensator removes both ghosting and flickering / blinking effects in 2-wire LED dimming situations. On the rare occasions when the new LED compensator does not solve these symptoms, we recommend the Niko filter (ref. 09-016-10).

Please note: the LED compensator cannot solve PLC issues. See our frequently asked questions section on our website for more information: [www.niko.eu/faq](http://www.niko.eu/faq).

## Atmosphere and comfort in total simplicity with control of LED strips

### Wireless LED control for LED strips

You can connect several wireless wall controls to the **new wireless controller RF** (ref. 410-00121). It has 4 buttons and clear icons:

- Switch on/off
- Memory function of favorite scenes
- Dimming
- Start colour loop

With one wireless 4-channel constant voltage controller, you can control LED strips up to 100 W (24 V) per channel. And you can connect up to 10 controllers via a wired master-secondary configuration for synchronised control of a larger number of LED strips.

## New terminology

### New terminology for detectors, lighting control and access control

To ensure consistency of terminology, Niko will from now on use the terms “master” and “secondary” to refer to asymmetric communication between products. In this communication setup, one device, the “master”, controls one or more “secondary” devices and serves as their communication hub.

# New in access control

## Two-wire external video unit

A standard doorbell can be replaced with the new digital external video unit, without major work, thanks to the connection possibilities to existing two-wire cabling. With the IP connection, you can install the system in no time at all. The camera has a high **resolution of 720p**. The **sleek and elegant design** of the metal construction fits in seamlessly with any home. The **user-friendly app** also allows you to keep control over your front door **outside the home**.

### The advantages of two-wire access control:

- It can be **installed in every existing home** without major renovations, to replace a conventional doorbell.
- Up to 2 external video units and up to 5 internal video units can be connected to 1 controller.
- The compatible internal video unit offers a **razor-sharp digital image, without analogue interference or conversion**.
- With the corresponding controller, the system can easily be connected to the internet, and the video images are also available in real-time on a smartphone.
- The **user-friendly app** is available for iOS and Android.
- If the external unit is damaged or unplugged, the device starts recording images via the camera for **security purposes**.
- The **wiring of the door lock** can be connected to the **module in the cabinet** to prevent the door from being opened by external manipulation

## Internal video unit

### Slim internal video unit for surface-mounting, with colour screen and buttons

This slim, surface-mounting, internal video unit with colour screen is standardly equipped with the following functions: allow a conversation with a visitor, produce a different tone for a call at an apartment door, an internal call and main door calls from two different external video units, switch lights on and off, open doors, adjust the volume, switch off the ringtone, indicate a busy signal and call signal with LEDs, transmit a control function, allow a parallel call, make an internal call, etc. The controls consist of clear, intuitive touch buttons. The communication with the visitor is hands-free. The device can be entirely programmed using the Niko configuration software for access control.

# Quick and easy assembly

Niko Original

Niko Intense

Niko Pure

## Step 1: choose a mechanism

No matter which **function or control** you are looking for, you will find it at Niko.

- Niko's mechanisms are **ingeniously designed** to make them very easy to install.
- They are available in a **wide range** of product ranges: switches, socket outlets, USB chargers, dimmers, orientation lighting, flush-mounted detectors and various types of audio, video and internet connections.
- Each mechanism is **universal** and compatible with every Niko finishing set and every Niko faceplate. So it doesn't matter which style your client likes.

## Did you know?

- Niko's flush-mounting mechanisms and finishing sets are also compatible with the **surface-mounting kit**. Ideal when you can't or don't want to break into the walls.
- The waterproof switches and socket outlets in the Niko Hydro range use the same mechanisms, without the metal frame. This way, we guarantee **one way of installing** for our entire portfolio, so you can spend your time focusing on the important things.

### Step 2: add the finishing set

Finishing sets easily click onto the mechanism. Every finishing set is compatible with the faceplates from Step 3.

Almost every finishing set is available in these colours:

	bright white*	111-xxxxx
	white	101-xxxxx
	white coated	154-xxxxx
	cream	100-xxxxx
	light grey	102-xxxxx
	gold coated	221-xxxxx
	champagne coated	157-xxxxx
	bronze	123-xxxxx
	greige	104-xxxxx
	dark brown	124-xxxxx
	sterling	121-xxxxx
	steel grey coated	220-xxxxx
	anthracite	122-xxxxx
	black coated	161-xxxxx
	piano black coated	200-xxxxx

\* Only available in the Netherlands.

### Step 3: add the faceplate

Choose from **3 design ranges** to finish your function, based on its design, shape and the material it is made of: Niko Original, Niko Intense or Niko Pure.

- Every faceplate is **compatible** with the universal mechanism and the Niko finishing sets.
- Is the wall not quite smooth? No problem. Each faceplate is **height adjustable** in the four corners.
- A **complete overview** can be found in the table on the next page.
- Trouble finding the right combination? Niko makes a **combination suggestion** in the table on the next page.

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

## Chapter 2

# Niko Home Control

- 2.A Controls for bus wiring
- 2.B Modules in the cabinet for bus wiring
- 2.C Software and apps for bus wiring
- 2.D Controls for traditional wiring
- 2.E Software and apps for traditional wiring

# Your home works better with Niko Home Control

Niko Home Control is the standard in home automation. Your client can control their home centrally, monitor their energy consumption and can then make the necessary adjustments. At the same time, the client will live in a safer and more comfortable way. Installing and controlling Niko Home Control was never this simple. As an installer you only need 1 programming software. And your client only needs 1 controlling app on their smartphone. No matter if you choose bus wiring or traditional wiring, you will always use the same tools.

## ADVANTAGES

### Niko Home Control for bus wiring

- 2-wire, non-polarised cabling to all controls
- free topology with standard available cables
- orderly build up and limited use of space in the electrical cabinet
- minimum cabling in the cabinet. You interconnect the modules with a unique slide switch
- each functionality has its own module
- the system itself uses a minimum amount of energy
- connection of touchscreen and video door station with 1 cable
- wall-mounted printed circuit board concept: 1 flush-mounting box, even for multiple controls

### Niko Home Control for traditional wiring

- products for traditional wiring suitable for existing homes and renovation
- you configure wireless switches and connected socket outlets according to your client's wishes
- easy to install as a replacement of a classic switch or socket outlet
- no extra space needed in the electrical cabinet
- no programming needed for standard functions. You can switch on the lights immediately after installation
- additional programming in combination with the wireless smart hub allows advanced configurations
- connecting a touchscreen and video door station is possible

# Controls for bus wiring

Installing controls? This is child's play with the non-polarised bus. You only need a single flush-mounting box, into which you can easily install multiple controls thanks to the unique wall-mounted printed circuit board concept.

## ADVANTAGES

- generic controls with or without feedback LED
- specific controls for dimmers, roll-down shutters, ventilation and audio
- a 'leave home' button with recognisable icon. With one push on the button you switch of everything and activate the presence simulation routine
- display controls for central functions:
  - monitor your energy consumption with the eco display
  - select the right routine with the mood display
  - set the temperature with the thermostat
- use the push-button interface to turn every switch into a Niko Home Control control
- central control using a well-organised touchscreen
- a stylish external video unit shows you who it at your front door
- a motion detector suitable for every situation, inside and outside

## PRODUCT IN THE SPOTLIGHT

### Digital black

- combine 12 controls into a compact and intuitive control screen with a user-friendly interface
- the screen is the same size as a Niko flush surround plate and its design makes for the perfect fit
- your customer decides for themselves which actions they want to control and how they organise them
- an approach sensor makes Digital black wake up quickly, so your customer can take an action in a single motion

**NEW**

**Digital black, connected customisable control screen for Niko Home Control, 24 V**

Digital black is a completely customisable control screen for Niko Home Control with an extremely user-friendly interface featuring clear symbols. The screen is automatically activated when your hand comes near. That way, you can switch or dim your lights, set moods, set ventilation modes, adjust blinds and sunblinds to the desired position, in one operation. In short, all possible Niko Home Control control types are available.

As this Digital black 24 V variant is equipped with a temperature sensor and algorithm, it can be programmed as a zone-thermostat when linked to a Niko Home Control heating cooling module (ref. 550-00150) or switching module (ref. 550-00103 or 550-00106) programmed for electrical heating. Do you have extra thermostats (550-1305x) or an active connection with one of our heating partners? Then you can easily set the temperature with the Digital black. When the Digital black is used as a thermostat, you define the set points and week programs in the Niko Home app.

With the Niko Home app not only can you choose which controls are displayed or where they are displayed on the screen, but also the way you navigate through your control screens. You can download this app for free in the app store or play store.

The screen can be easily mounted in any standard flush-mounting box using the familiar claw or screw fixing and is powered by a separate 24 V DC supply (e.g. 340-00050). The screen communicates via your wireless home network with the rest of your Niko Home Control system. You need an active internet connection to activate the screen. This internet connection ensures that your screen and Niko Home Control installation are always up-to-date, and have the most recent functionalities.

- recommended mounting height: 110 - 160 cm
- power supply voltage: 24 V DC (SELV)
- Wi-Fi: 2.4 Ghz bgn (HT20)
- ambient temperature: 0 – +40 °C
- proximity sensor: 0 – 30 cm
- light sensor for automatic adjustment of the screen intensity
- maximum number of Digital blacks per installation: 20
- screen size: 3.6"
- screen resolution: 1024 x 768 pixels
- display dimensions: 83 x 83 x 11.5 mm (HxWxD)
- dimensions flush-mounting mechanism: 75 x 70 x 23.6 (HxWxD)
- protection degree: IP40
- CE marked

**COMPLETE UNIT**

<b>550-18000</b>	Pieces: 1	With plug-in terminals, for claw fixing
<b>550-18001</b>	Pieces: 1	With plug-in terminals, for screw fixing

**NEW**

**Simple wall-mounted printed circuit board with base**

The wall-mounted printed circuit board is mounted on an existing flush-mounting box or on an uneven wall and forms the connection between the control and the installation. Several wall-mounted printed circuit boards with base can be clicked together and/or can be combined with any other Niko flush-mounting mechanism.

- double plug-in connector: possible connection of two wires per contact, each with a diameter of 0.5 to 1 mm
- mounting of push button: click mechanism
- wall mounting: screws or claws

**SIMPLE WALL-MOUNTED PRINTED CIRCUIT BOARD WITH BASE**

**550-14106** Pieces: 10 For claw fixing

**550-14116** Pieces: 6 For screw fixing

### Simple wall-mounted printed circuit board with base

The wall-mounted printed circuit board is mounted on an existing flush-mounting box or on an uneven wall and forms the connection between the control and the installation. Several wall-mounted printed circuit boards with base can be clicked together and/or can be combined with any other Niko flush-mounting mechanism.

- double plug-in connector: possible connection of two wires per contact, each with a diameter of 0.5 to 1 mm
- mounting of push button: click mechanism
- wall mounting: screws or claws

#### SIMPLE WALL-MOUNTED PRINTED CIRCUIT BOARD WITH BASE (71X71)

**550-14107** Pieces: 10 For claw fixing

**550-14117** Pieces: 6 For screw fixing

### Simple wall-mounted printed circuit board with connector

The wall-mounted printed circuit board enables you to connect a control to the installation. You mount the wall-mounted printed circuit board with double plug-in connector onto a simple standard flush-mounting box with screw connection. A set of claws is to be ordered separately for flush-mounting boxes without screw connection.

- double plug-in connector: possible connection of two wires per contact, each with a diameter of 0.5 to 1 mm
- mounting of push button: click mechanism
- wall mounting: screws or a set of claws

#### COMPLETE UNIT

**550-14110** Pieces: 10 Simple wall-mounted printed circuit board with connector

#### ACCESSORY

**450-00067** Pieces: 20 Set of claws for wall-mounted printed circuit board

### Multiple wall-mounted printed circuit board to be used with connection unit

You mount the multiple wall-mounted printed circuit board onto a simple standard flush-mounting box with screw connection. No additional flush-mounting boxes are required for the assembly of multiple faceplates. You can decide whether you prefer to work towards the bottom, top, left or right from the flush-mounting box, which allows you to add push buttons without the need for additional drilling or channelling work. A set of claws is to be ordered separately for flush-mounting boxes without screw connection. Note: Order always a connection unit with every multiple wall-mounted printed circuit board as this unit provides the connection between the multiple wall-mounted printed circuit boards and the installation.

- mounting of push button: click mechanism
- wall mounting: screws or a set of claws

#### WALL-MOUNTED PRINTED CIRCUIT BOARDS

<b>550-14020</b>	Pieces: 10	Double wall-mounted printed circuit board (centre distance 71 mm, horizontal)
<b>550-14021</b>	Pieces: 10	Double wall-mounted printed circuit board (centre distance 60 mm, vertical)
<b>550-14027</b>	Pieces: 10	Double wall-mounted printed circuit board (centre distance 71 mm, vertical)
<b>550-14030</b>	Pieces: 10	Three-fold wall-mounted printed circuit board (centre distance 71 mm, horizontal)
<b>550-14031</b>	Pieces: 10	Three-fold wall-mounted printed circuit board (centre distance 60 mm, vertical)
<b>550-14037</b>	Pieces: 10	Three-fold wall-mounted printed circuit board (centre distance 71 mm, vertical)
<b>550-14040</b>	Pieces: 10	Four-fold wall-mounted printed circuit board (centre distance 71 mm, horizontal)

**Connection unit for multiple wall-mounted printed circuit board**

The connection unit connects the installation to the multiple wall-mounted printed circuit board. The connection unit can be mounted into any position on the multiple wall-mounted printed circuit board. Note: Use a different set of claws.

- double plug-in connector: possible connection of two wires per contact, each with a diameter of 0.5 to 1 mm
- mounting on wall-mounted printed circuit board: two screws

**COMPLETE UNIT**

**550-14090** Pieces: 6 Connection unit for multiple wall-mounted printed circuit board

**ACCESSORY**

 **450-00068** Pieces: 20 Set of claws for connection unit

**Single push button with LED, “leaving the house” symbol**

The single push button has one action button with the “leaving the house” symbol. This action button allows the resident to switch off all the lights in his home, as well as certain appliances that may pose a safety risk (iron, hob, deep-fat fryer). You simply determine in the programming software which light points/appliances must be switched off. The action button is fitted with an amber-coloured indication LED to indicate the status of the action. The push button is attached to the wall-mounted printed circuit board via a click mechanism.

**COMPLETE UNIT**

## Push-button interface

The push-button interface converts the switching pulse of external push buttons (such as Niko Hydro) into a Niko Home Control bus command. The interface will be installed behind the push button. The bus can be interconnected to the next control element of the Niko Home Control installation. The push-button interface can be used outdoors, on the condition that the splashproof Niko Hydro housing is provided.

- suitable for maximum four potential-free NO push buttons or NPN transistor outputs
- only connect to an SELV contact (safety extra-low voltage)
- maximum distance to the push button: 2 m
- resting potential: 26 Vdc (SELV)
- dimensions: 40 x 27 x 5 mm (HxWxD)
- CE marked
- ambient temperature: -25 – +55 °C

### COMPLETE UNIT

**550-20000** Pieces: 6 Push-button interface

## Mood control

The mood control allows the resident to create different mood settings for different occasions. A mood setting is a combination of settings with regard to lighting, roll-down shutters, sunblinds, etc.

- recommended mounting height: 120 - 150 cm
- flush-mounting depth: 20 mm
- dimensions: 45 x 45 x 32 mm (HxWxD)
- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- back-lit colour display with three buttons
- ambient temperature: 0 – +50 °C

### COMPLETE UNIT

**550-13040** Pieces: 6 For claw fixing, centre distance 60 mm  
**550-13041** Pieces: 6 For screw fixing, centre distance 71 mm  
**550-13042** Pieces: 6 For screw fixing, centre distance 60 mm

## Eco-display

The eco-display allows the resident to monitor the energy, gas and water consumption as well as the energy production (if applicable). It can also be used to activate the eco-function (all off) or the presence simulation. The eco-display shows information on the electricity, gas and water consumption as well as the electricity production. The type of information displayed will depend on the measuring modules you will install. The electricity measuring module measures the electricity consumption or electricity production. The pulse counter communicates the electricity, gas and water consumption. The current electricity consumption is expressed in W or kW, while gas and water consumption is expressed in m<sup>3</sup>. The consumption for that week expressed in EUR, GBP or SEK is displayed underneath. The end-user can press the eco-button to switch off all lights and connected circuits when leaving the house. He will immediately notice the reduction in consumption. The resident will activate the presence simulation by pressing the presence simulation button. This allows the resident to have the lights switch on at certain times and to create an extra feeling of safety while using the least amount of energy. The recommended location for mounting the eco-display is near the door used by the resident to leave the house.

This Niko Home Control eco-display was awarded the Red Dot Design Award 2011.

- recommended mounting height: 120 - 150 cm
- flush-mounting depth: 20 mm
- dimensions: 45 x 45 x 32 mm (HxWxD)
- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- back-lit colour display with three buttons
- ambient temperature: 5 – +45 °C
- in conformity with IEC60730-2-9, EN 50491-5-2, EN 50491-2 and EN 50090-2-3

### COMPLETE UNIT

**550-13080** Pieces: 6 For claw fixing, centre distance 60 mm  
**550-13081** Pieces: 6 For screw fixing, centre distance 71 mm  
**550-13082** Pieces: 6 For screw fixing, centre distance 60 mm

### Thermostat

The thermostat can be installed in any room fitted with underfloor heating, a radiator, heating unit or cooling unit. It controls the heating or cooling for the room in which it is mounted. The thermostat is used in combination with the heating or cooling module. You can also connect this to a three-fold or six-fold switching module for switching electric heating in Niko Home Control 2.0. As Niko Home Control controls the heating or cooling in different rooms, the resident can considerably save energy by linking the thermostat, for example, to the eco-function (all-off) or calendar-based functions (contrary to maintaining a fixed temperature throughout when using thermostatic taps, for instance).

- compatible with the Niko Home Control solar mode
- recommended mounting height: 120 - 150 cm
- flush-mounting depth: 20 mm
- dimensions: 45 x 45 x 32 mm (HxWxD)
- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- back-lit colour display with three buttons
- daily/weekly programmes
- 3 weekly programmes: two for the heating function and one for the cooling function
- 5 temperature settings: day, night, eco, off (frost-free) and cool
- temperature accuracy: 0.5 °C
- protection degree: IP20
- ambient temperature: 5 – +40 °C
- in conformity with IEC60730-2-9 , EN 50491-5-2, EN 50491-2 and EN 50090-2-3

#### COMPLETE UNIT

<b>550-13050</b>	Pieces: 6	For claw fixing, centre distance 60 mm
<b>550-13051</b>	Pieces: 6	For screw fixing, centre distance 71 mm
<b>550-13052</b>	Pieces: 6	For screw fixing, centre distance 60 mm

### HVAC thermostat

You install the HVAC thermostat in any room that has an indoor unit of the VRV, VRF or multi-split air conditioning system (HVAC system). The HVAC thermostat controls the heating or cooling of the room in which it is installed. You can modify the temperature and adjust the ventilation speed. As Niko Home Control controls the heating or cooling in different rooms, the resident can considerably save energy by linking the HVAC thermostat, for example, to the eco-function (all off) or calendar-based functions. The resident will use the PROTECT mode for long-term absences: the room temperature will be maintained between a minimum and maximum value. The communication with the HVAC system is established via the HVAC interface (CoolMaster).

- compatible with the Niko Home Control solar mode
- back-lit colour display
- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- ambient temperature: 5 – +45 °C
- dimensions of the display: 45 x 45 x 32 mm (HxWxD)
- flush-mounting depth: 20 mm
- daily/weekly programmes
- 2 operating modes: cooling and heating
- 3 temperature settings with a value for cooling and a value for heating
- 3 statuses: eco, protect and on/off
- temperature accuracy: 1 °C
- in conformity with IEC60730-2-9 , EN 50491-5-2, EN 50491-2 and EN 50090-2-3
- protection rating: IP20

#### COMPLETE UNIT

<b>550-13060</b>	Pieces: 6	For claw fixing, centres: 60 mm
<b>550-13061</b>	Pieces: 6	For screw fixing, centre distance 71 mm
<b>550-13062</b>	Pieces: 6	For screw fixing, centre distance 60 mm

Flush surround plates to be ordered separately.  
Product drawings purely illustrative.

## Touchscreen

This touchscreen allows you to conveniently operate the entire Niko Home Control installation from one central point: switching and dimming the lighting, controlling the temperature, moving roller blinds and sunblinds to the position of your choice, monitoring the energy consumption and the status of the installation ... Thanks to a built-in light sensor, the screen brightness adapts to the ambient light.

Thanks to the connection to the Niko Home Control external video unit, access control is also possible. This way, you can answer incoming calls, open a connected door lock, peek outside and check missed calls. A feedback LED displays any missed calls, even when the device is in standby mode. Please note: we recommend providing at least one touchscreen on top of the smartphones and/or tablets because a wired device is always more reliable than a mobile one.

This touchscreen (550-20102) replaces touchscreen 2 (550-20101) completely. In existing Niko Home Control installations, it can replace as well as complement its predecessor. Its wired connection to the home network ensures a very reliable connection.

Only one flush-mounting box is needed to mount this touchscreen. You connect the touchscreen with one twisted pair cable (UTP, FTP or STP) to the Power over Ethernet power supply, which is available separately. Alternatively, you can also place a separate 24 V DC power supply in the cabinet. A total of ten IP devices (touchscreens, smartphones or PC applications) can be connected per installation.

- power supply voltage: 24 Vdc ( $\pm 10\%$ ) (SVV, JYSTY, TPVF, UTP, etc.) or Power over Ethernet (PoE) (UTP, STP, FTP) (48 V DC)
- electricity consumption: 500 mA (24 Vdc) or 250 mA (PoE 48 V DC)
- ambient temperature:
  - in operation: 0 – +40 °C
  - storage and transport: -10 – +65 °C
- Ethernet connection speed: 10 - 100 Mbit/s
- CE marked
- dimensions: 124 x 192 x 20 mm (HxWxD)
- screen size: 7"
- screen resolution: 1024 x 600
- weight: 570 g (excluding connectors and screws)
- protection degree: IP20

### COMPLETE DEVICE

**External video unit**

This ultra-flat external video unit for flush mounting is finished with a black front plate made of anodised aluminium (3 mm thick). The device is equipped with a 130° HD colour camera and a Plexiglas nameplate that can be engraved. The external video unit is supplied with a flush-mounting box. This unique lighting concept (patent pending) provides refined and homogeneous illumination of the engraved nameplate, guaranteeing good visibility in the dark. The touch button requires no maintenance and is extremely durable. Combined with the touchscreen as an internal video unit, access control can be integrated into a Niko Home Control installation. You can then use a smartphone or tablet as an additional internal video unit if both the external video unit and the mobile device have an active Internet connection and the installation has been registered at [mynikohomecontrol.niko.eu](http://mynikohomecontrol.niko.eu). Please note: we recommend providing at least one touchscreen on top of the smartphones and/or tablets because a wired device is always more reliable than a mobile one.

- power supply voltage: 48 Vdc ± 10%
- power consumption: 5 W
- ambient temperature: -30 – +60 °C
- dimensions flush-mounting box: 239 x 89 x 47 mm (HxWxD)
- dimensions external unit: 256 x 110 mm (HxW)
- HD camera resolution: 720 horizontal TV lines
- camera angle: 130°
- light sensitivity: 1 lux
- mounting: flush-mounting
- protection degree: IP53
- CE marked

**COMPLETE UNIT**

- 550-22001** Pieces: 1 1 illuminated touch button
- 550-22002** Pieces: 1 2 illuminated touch buttons

**COMPLETE UNIT**

- 550-00502** Pieces: 1 PoE power supply

**ACCESSORY**

-  **550-22091** Pieces: 1 Nameplate for the external video unit with one touch button
-  **550-22092** Pieces: 1 Nameplate for the external video unit with two touch buttons

**Wall motion detector, 180°, Niko Home Control, 9 m**

This motion detector is suitable for indoor use only. Niko Home Control supplies power to the motion detector. No additional power supply is required. To be used as a motion detector or as a motion detector in combination with a photo cell.

- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- detection angle: 180° horizontal, 60° vertical
- detection range: 9 m (horizontal)
- recommended mounting height: 90 - 110 cm
- light sensitivity: 5 - 1200 lux
- switch-off delay: 10 s
- manual mode option
- ambient temperature: -5 – +45 °C
- CE marked

**COMPLETE UNIT**

**Mini presence detector, 360°, Niko Home Control, 9 m**

The mini detector detects movement and changes in light intensity. Using this information various Niko Home Control actions can be activated or deactivated. The product is suitable for ceiling mounting in suspended ceilings, both indoors and outdoors.

- Dimensions (HxWxD): 13 x 36 mm
- Dimensions visible (HxWxD): 13 x 36 mm
- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Drill diameter: 30 mm
- Detection angle: 360°
- Detection range (PIR): 9,5 m from a height of 3 m
- Light intensity range: 2 lux – 2500 lux
- Ambient temperature: -10 – +50 °C
- Mounting method: flush-mounting

**COMPLETE UNIT**

**550-20220** Pieces: 1 Detector

**Outdoor motion detector, 180°, Niko Home Control, 16 m, with orientable lens**

This motion detector is suitable for use on driveways, on outdoor patios, in garden areas or in garages. The detector is equipped with an integrated light sensor. The sensor can be rotated horizontally within a 25° angle to modify the direction of detection. If you do not want the motion detector to detect any motion within a certain section of the detection area, you cover the sensor lens using the cover cap supplied. Niko Home Control supplies power to the motion detector. No additional power supply is required.

- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Detection angle: 180°
- Detection range (PIR): up to 16 m in diameter from a height of 3 m
- Switch-off delay: 8 s – 30 m
- Protection degree: IP54
- Mounting height: 2.5 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

**COMPLETE UNIT**

**550-20200** Pieces: 1 Detector, white

**ACCESSORY**

**390-20050** Pieces: 1 Ceiling mounting bracket

**Outdoor motion detector, 180°, Niko Home Control, 13 m, with orientable lens, black**

This motion detector is suitable for use on driveways, on outdoor patios, in garden areas or in garages. The detector is equipped with an integrated light sensor. The sensor can be rotated horizontally within a 25° angle to modify the direction of detection. If you do not want the motion detector to detect any motion within a certain section of the detection area, you cover the sensor lens using the cover cap supplied. Niko Home Control supplies power to the motion detector. No additional power supply is required.

- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Detection angle: 180°
- Detection range (PIR): up to 13 m in diameter from a height of 3 m
- Switch-off delay: 8 s – 30 m
- Protection degree: IP54
- Mounting height: 2.5 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

**COMPLETE UNIT**

**550-20201** Pieces: 1 Detector, black

**ACCESSORY**

**390-20150** Pieces: 10 Ceiling mounting bracket, black

**Photo cell, IP54, variable light sensitivity**

Photo cell for outdoor applications (IP54). To be used in combination with the analogue sensor module (550-00230). The photo cell has a variable light sensitivity between 3 and 300 lux, 30 and 3 Klux, 300 and 30 Klux or 600 and 60 Klux.

- power supply voltage: 24 Vdc ± 10%
- output signal: 0 - 10 V
- light sensitivity: 3 - 300 lux, 30 - 3 Klux, 300 - 30 Klux or 600 - 60 Klux
- protection degree: IP54
- ambient temperature: -40 – +50 °C

**COMPLETE UNIT**

**350-10012** Pieces: 10 Detector

**Twilight switch, 24 V, one channel, 4 A, 2 - 200 lux**

Twilight switch for outdoor wall mounting (IP54), suitable for switching outdoor lighting. To be used in combination with the digital potential-free sensor module (550-00210). Large sensor surface for accurate light measuring. In conformity with the European directive for EMC and safety EN60669-2-1.

- power supply voltage: 24 Vac/Vdc ± 10%
- relay contact: NO (max. 4 A)
- incandescent lamps: 40 W
- hysteresis on light sensitivity: + 50%
- switch-off delay: ± 1 min
- light sensitivity: 2 - 200 lux
- protection degree: IP54
- operating temperature: -50 – +50 °C
- dimensions: 102 x 73 x 39 mm (HxWxD)

**COMPLETE UNIT**

**350-10032** Pieces: 5 Twilight switch

**Motion detector, 90°, 24 V, 22 m**

90° motion detector, 24 V, with a potential-free contact for mounting on walls and ceilings. The detector is durable, functional and compact. The motion detector has a built-in walking test and adjustable sensitivity (5 levels) and can be combined with Niko Home Control. To be used in combination with the digital potential-free sensor module (550-00210). For use in small offices, storage areas, corridors, conference rooms ... The motion detector is suitable for the control of HVAC, ventilation, building management systems, Niko Home Control ... The switch-off delay of the potential-free relay and the sensitivity of the detector can be set on the device. Also suitable for outdoor applications. In this case a protective cover (to be ordered separately) is used to make the motion detector splashproof (protection degree IP54).

- Input voltage: 24 Vac/Vdc ± 10%
- Maximum power consumption: <18 mA
- Number of channels: 1 channel
- Detection angle: 90 °
- Detection range (PIR): circle, 22 m
- Switch-off delay: 2 s – 30 m
- Protection degree: IP20
- Mounting height: 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

**COMPLETE UNIT**

**350-41279** Pieces: 1 Detector

**ACCESSORY**

**390-20010** Pieces: 10 IP54 protection cap

**ACCESSORY**

**390-20000** Pieces: 1 Vandalproof protection cap, wall mounting

**Motion detector, 360°, 24 V, 8 m, for surface mounting**

The motion detector has a limited diameter (80 mm) and thickness (3 cm) and an adjustable sensitivity (4 levels). For use in small offices, storage areas, corridors, conference rooms, ... The detector is suitable for the control of ventilation, building management systems, Niko Home Control .. To be used in combination with the digital potential-free sensor module (550-00210). It is possible to set both the switch-off delay of the potential-free relay and the sensitivity of the detector on the device using the DIP switches.

- Dimensions (HxWxD): 80 x 80 x 30.6 mm
- Input voltage: 24 Vac/Vdc  $\pm$  10 %
- Relay contact : NO. 0.2 A/max 48 V
- Relay contact 1: NO (max. 48 V/0.2 A), potential-free
- Number of channels: 1 channel
- Detection angle: 360°
- Detection range (PIR): up to 8 m in diameter from a height of 3 m
- Switch-off delay: 5 s, 30 s – 1 h
- Protection degree: IP20
- Mounting height: 2.5 – 4 m
- Mounting method: surface-mounting
- Ambient temperature: -5 – +50 °C

**COMPLETE UNIT**

**350-41549** Pieces: 1 Detector

**Motion detector, 90°, 24 V DC, 0.5 - 15 m, light sensor**

Motion detector with built-in light sensor. Suitable for motion detection at an angle of 90° and over a distance of 0.5 to 15 m. To be used in combination with a daylight control module (360-35010) for lighting control. The use of the IP54 protection cap (390-20010) is obligatory for outdoor use. This protection cap needs to be ordered separately.

- Input voltage: 24 Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Detection angle: 90°
- Detection range (PIR): up to 15 m from a height of 2.5 m
- Protection degree: IP20
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

**COMPLETE UNIT**

**350-30010** Pieces: 1 Detector

**ACCESSORY**

**390-20010** Pieces: 10 IP54 protection cap

**ACCESSORY**

**390-20000** Pieces: 1 Vandalproof protection cap, wall mounting

# Modules in the cabinet for bus wiring

The connected controller is the heart of your installation. With the connected controller, you can customise the complete installation to your clients' needs.

## ADVANTAGES

- a specific cabinet module for each type of functionality
- simple and orderly build-up of the electrical cabinet
- limited cabling in the cabinet thanks to the slide contact
- compact modules do not require a large electrical cabinet
- long-lasting modules thanks to limited heat release
- print tailor-made labels using the programming software
- energy modules using supplied measuring clamp(s)

### Connected controller for Niko Home Control II

The connected controller is the central module of every Niko Home Control installation for bus wiring. This module contains firmware that can only be programmed with the Niko Home Control programming software 2.1.1 or higher. It covers all basic functions on which a Niko Home Control installation is built. The basic functions include:

- The intelligence directing the logic to the installation. Through the configuration software, the logic is saved locally on the controller.
- The power supply module providing an input voltage of 26 V to the bus, the cabinet modules and the controls. Depending on the size of the installation, separate power supply modules can be added.
- The connection to Niko Home Control IP devices such as touchscreens and external video units. A built-in router allows the user to connect up to 3 devices directly to the controller. With an extra switch, this number can be increased.
- The connection to the internet. This enables the user to control the installation both indoors and outdoors (via mobile networks such as 3G, 4G, GPRS or Wi-Fi hotspot) using mobile devices (smartphones and tablets with iOS or Android).

The module has a TEST button to verify the proper functioning and status of all other modules. The SERVICE button allows you to perform waiting Niko upgrades.

Each installation must consist of one connected controller.

After registration on <https://mynikohomecontrol.niko.eu>, your installation is connected, enabling control through the app via your smartphone and tablet, and you can enjoy the Niko services for upgrade or diagnosis of the installation.

- equipped with a permanent memory where the programming is stored
- contains firmware that can only be programmed with the Niko Home Control programming software 2.1.1 or higher
- PC programming can always be downloaded from the controller
- dimensions: DIN 6E
- sliding contact to connect the module to the following DIN rail module
- input voltage: 230 Vac  $\pm$  10%, 50 Hz
- output voltage: 26 Vdc, 400 mA (SELV, safety extra-low voltage)
- 1 RJ45 port for connection to the home network and/or internet
- 3 RJ45 ports for the Niko Home Control network (connection touchscreens, external video units or Ethernet switch which groups them)
- 4 plug-in terminals at the top to connect the module with the rail coupler on the next DIN rail
- 4 plug-in terminals at the bottom of the module to be provided with 230 Vac power supply voltage and daisy-chained if necessary
- CE marked
- ambient temperature: 0 – +45 °C
- protected against short-circuit, over voltage and overheating
- compatible with SMA smart connected inverters

#### COMPLETE UNIT

**550-00003** Pieces: 1 Connected controller

### Power supply

The power supply, in combination with the connected controller, provides an extra input voltage of 26 V to the bus, modules and controls. An extra power supply is only necessary in installations for which the power of the built-in power supply of the connected controller is insufficient. Up to 2 extra power supplies can be connected to installations with a connected controller. The MASTER button is not used, as the built-in power supply of the connected controller is always the master. For more information on the required number of power supplies, you can consult the installation manual.

- dimensions: DIN 4E
- sliding contact to connect the module to the following module on the DIN rail
- 4 connection terminals at the top to connect the power supply with the rail coupler on the next DIN rail
- CE marked
- ambient temperature: 0 – +45 °C
- short circuit, over voltage, faulty connection and overheating protection

#### COMPLETE UNIT

**550-00010** Pieces: 6 Power supply

### Rail coupler

This module is always mounted first on the left at the start of a new row of DIN rail modules that doesn't contain a connected controller or power supply. Interconnect the power supply and bus through the contacts at the top and bottom.

- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- 2 x 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00020** Pieces: 10 Rail coupler

### Switching module (3x)

The three-fold switching module is suitable for switching a maximum of three different switching circuits, e.g. light points or socket outlets. The module allows you to interconnect one neutral conductor to maintain neat cabling in the cabinet. The module includes three indication LEDs and one status LED. Bistable relays ensure low energy consumption.

- switch only one phase per switching module
- maximum load: 230 V – 16 A per switching contact
- maximum load for the entire module: 230 V – 40 A
- 3 independent switching circuits possible on the same phase
- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- 2 x 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- CE marked
- ambient temperature: 0 – +45 °C
- compatible with the Niko Home Control solar mode

#### COMPLETE UNIT

**550-00103** Pieces: 10 Switching module (3x)

### Switching module (6x)

The six-fold switching module is suitable for switching a maximum of six different switching circuits, e.g. light points or socket outlets. The module allows you to interconnect two neutral conductors to maintain neat cabling in the cabinet. The module includes six indication LEDs and one status LED. Bistable relays ensure low energy consumption.

- compatible with the Niko Home Control solar mode
- switch only one phase per switching module
- maximum load: 230 V – 16 A per switching contact
- maximum load for the entire module: 230 V – 32 A
- 2 groups with 3 switching contacts each
- dimensions: DIN 4U
- sliding contact to connect the module to the following module on the DIN rail
- 2 x 8 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00106** Pieces: 6 Switching module (6x)

### Universal dim module (2 x 400 W)

The universal dim module is a DIN module with two channels for dimming light circuits. This module is suitable for incandescent lamps, 230 V halogen lamps, 12 V halogen lamps with a ferromagnetic or electronic transformer, dimmable LED lamps and dimmable economy lamps CFLi. The minimum light intensity and the type of lighting you wish to dim can be manually adjusted. The modules can be placed alongside each other without additional derating.

- input voltage: 230 Vac ± 10%, 50 Hz
- ambient temperature: 0 – +45 °C
- for use in an environment with non-condensing atmospheric humidity (30% - 70%)
- dimming capacity per channel: 5 - 400 VA (at 45 °C) or 5 - 500 VA (at 35 °C)
- minimum light intensity and phase control or reverse phase control can be adjusted manually
- 2 x 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- sliding contact to connect the module to the following module on the DIN rail
- in conformity with EN60669-2-1
- short-circuit and overheating protection
- CE marked
- dimensions: DIN 4U

#### COMPLETE UNIT

**550-00340** Pieces: 6 Universal dim module (2x400 W)

### DALI-2 broadcast module, 2 channels

The DALI-2 broadcast module drives two DALI bus channels concurrently. The two channels are exposed as dimmable light sources in Niko Home Control without the need for any additional configuration or use of DALI programming software. All DALI endpoints will simultaneously react to a Niko Home Control command, meaning that up to 64 endpoints per channel will act as a single dimmable light circuit. The module comes with a built-in power supply, so there is no need to use a dedicated DALI power supply for the DALI bus.

Support of DALI device types (control gear):

- DT0 (Fluorescent, lamp control gear)
- DT1 (Self-contained emergency, control gear)
- DT2 (Discharge HID, lamp control gear)
- DT3 (Low-voltage halogen, lamp control gear)
- DT4 (Incandescent lamp, dimmer)
- DT5 (Conversion to D.C. voltage, 1-10 V, 0-10 V converter)
- DT6 (LED lamp, control gear)
- DT7 (Switching, relay control gear)

DALI device type DT8 (Colour, Control gear) is not yet supported

- input voltage: 230 Vac  $\pm$  10%, 50 Hz
- DALI output voltage: 12 – 20.5 V
- ambient temperature: 0 – +45 °C
- maximum number of DALI outputs per channel: 64
- maximum output current per channel: 250 mA
- maximum guaranteed current per channel: 175 mA
- screw terminals 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 4U
- sliding contact to connect the module to the following module on the DIN rail
- protected against short-circuit, over voltage and overheating
- DALI protocol: EN62386
- CE marked
- Protection degree: IP20

#### COMPLETE UNIT

**550-00371** Pieces: 1 DALI broadcast module

NEW

### DALI-2 addressable module, 2 channels

The DALI-2 fully addressable 2-channel interface module allows up to 128 DALI endpoints to be connected to a Niko Home Control installation. Addressing and programming of the DALI devices is done from within the Niko Home Control programming software, and no prior DALI knowledge is required. Each of the DALI endpoints can be configured and controlled separately, without the need to use any other DALI software or interface. The module comes with a built-in power supply, so there is no need to use a dedicated DALI power supply for the DALI bus.

Support of DALI device types (control gear):

- DT0 (Fluorescent, lamp control gear)
- DT1 (Self-contained emergency, control gear)
- DT2 (Discharge HID, lamp control gear)
- DT3 (Low-voltage halogen, lamp control gear)
- DT4 (Incandescent lamp, dimmer)
- DT5 (Conversion to D.C. voltage, 1-10 V, 0-10 V converter)
- DT6 (LED lamp, control gear)
- DT7 (Switching, relay control gear)

DALI device type DT8 (Colour, Control gear) is not yet supported

- input voltage: 230 Vac  $\pm$  10%, 50 Hz
- DALI output voltage: 12 – 20.5 V
- ambient temperature: 0 – +45 °C
- maximum number of DALI outputs per channel: 64
- maximum output current per channel: 250 mA
- maximum guaranteed current per channel: 175 mA
- screw terminals 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 4U
- sliding contact to connect the module to the following module on the DIN rail
- protected against short-circuit, over voltage and overheating
- DALI protocol: EN62386
- CE marked
- Protection degree: IP20

#### COMPLETE UNIT

**550-00370** Pieces: 1 DALI bus module

## Motor module

The motor module can operate up to three applications that are motor-controlled, such as roll-down shutters, sunblinds and venetian blinds. The module allows you to interconnect two neutral conductors to maintain neat cabling in the cabinet. The module includes six indication LEDs and one status LED. Bistable relays ensure low energy consumption. The run time can be adjusted via the programming software (5 s to 4 min, adjustable per second).

- switch only one phase per motor module
- switching delay: 0.5 s
- maximum number of motors allowed: 3
- maximum load: 230 V – 6 A per switching contact
- dimensions: DIN 4U
- sliding contact to connect the module to the following module on the DIN rail
- 2 x 8 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- CE marked
- ambient temperature: 0 – +45 °C

### COMPLETE UNIT

**550-00130** Pieces: 6 Motor module

## Electricity measuring module (1 channel)

This module is used to measure your overall electricity consumption, solar production and energy consumption of your individual appliances. Using the Niko Home app and eco display, you can monitor the electricity consumption, production, self-consumption and detect deviations. The measuring module also enables you to use smart energy alerts in Niko Home Control that notify you in case of abnormal energy consumption. If you activate the Niko Home Control solar mode you can start increasing your self-consumption by automatically activating your appliances in case of excessive solar energy. The module is equipped with one feedback LED per channel and a status LED.

- measurement range with the current clamp supplied: 5 - 14490 W, 22 mA – 63 A
- measurement range with current clamp 550-00809: 90 - 27600 W, 400 mA – 120 A
- input voltage: 230 Vac
- 1 current clamp (included)
- accuracy: IEC62053-21 class 1 (R), class 2 (L)
- single-phase connection: 230 Vac, 50 Hz
- maximum cable thickness for the current clamp supplied: 1 x 10 mm<sup>2</sup> or 6 x 2.5 mm<sup>2</sup> or 9 x 1.5 mm<sup>2</sup>
- maximum cable thickness for current clamp 550-00809: 4 x 10 mm<sup>2</sup> or 12 x 2.5 mm<sup>2</sup> or 20 x 1.5 mm<sup>2</sup>
- length of the connector cable at the current clamp: 100 cm
- not suitable for measuring direct current components
- measuring data for informative purposes only, not valid for invoicing
- 4 screw terminals to measure the voltage of the connected switching circuit
- 2 screw terminals to connect the current clamp supplied
- sliding contact to connect the module to the following module on the DIN rail
- dimensions: DIN 2U
- CE marked
- ambient temperature: 0 – +45 °C

### COMPLETE UNIT

**550-00801** Pieces: 6 Electricity measuring module (1 channel), current clamp 63 A included

### ACCESSORY

**550-00809** Pieces: 1 Current clamp 120 A

### Electricity measuring module (3 channels)

This module is used to measure your overall electricity consumption, solar production and energy consumption of your individual appliances. Using the Niko Home app and eco display, you can monitor the electricity consumption, production, self-consumption and detect deviations. The measuring module also enables you to use smart energy alerts in Niko Home Control that notify you in case of abnormal energy consumption. If you activate the Niko Home Control solar mode you can start increasing your self-consumption by automatically activating your appliances in case of excessive solar energy. The module is equipped with one feedback LED per channel and a status LED.

- measurement range with the current clamps supplied: 5 - 14490 W, 22 mA – 63 A
- measurement range with current clamp 550-00809: 90 - 27600 W, 400 mA – 120 A
- maximum measurement range for the total measuring module: 32768 W
- input voltage: 230 Vac
- 3 current clamps (included)
- accuracy: IEC62053-21 class 1 (R), class 2 (L)
- connection:
  - three-phase: 3N 400 Vac, 50 Hz
  - single-phase: three switching circuits of 230 Vac, 50 Hz
- maximum cable thickness for the current clamps supplied: 1 x 10 mm<sup>2</sup> or 6 x 2.5 mm<sup>2</sup> or 9 x 1.5 mm<sup>2</sup>
- maximum cable thickness for current clamp 550-00809: 4 x 10 mm<sup>2</sup> or 12 x 2.5 mm<sup>2</sup> or 20 x 1.5 mm<sup>2</sup>
- length of the connector cable at each current clamp: 100 cm
- not suitable for measuring direct current components
- measuring data for informative purposes only, not valid for invoicing
- 3 x 2 screw terminals to measure the voltage of the connected switching circuits
- 3 x 2 screw terminals to connect the current clamps supplied
- sliding contact to connect the module to the following module on the DIN rail
- dimensions: DIN 4U
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00803** Pieces: 10 Electricity measuring module (3 channels), 3 current clamps 63 A included

#### ACCESSORY

**550-00809** Pieces: 1 Current clamp 120 A

### Pulse counter

The pulse counter allows you to monitor gas, water and electricity consumption or electricity production. The module has three pulse inputs and can be connected to up to three meters. You connect the module to the pulse output of a gas, water or electricity meter. Only one gas meter and one water meter can be connected to each installation. The scale factor of the pulses (e.g. 1 pulse = 10 litres) and the meter type (gas, water or electricity) can be selected via the programming software. The consumption and, if necessary, also the production will appear on the eco-display. Using the touchscreen or control app, residents can easily monitor their consumption or production and detect deviations. The module is provided with one indication LED and one status LED.

For a newly constructed dwelling, you can ask the building supervisor to request a gas or water meter with pulse output from the energy supplier.

- maximum pulse frequency per input: 10 Hz
- minimum pulse duration: 30 ms
- only for meters with a pulse output isolated from the mains in accordance with SELV (safety extra-low voltage) requirements
- measuring data for informative purposes only, not valid for invoicing
- 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- sliding contact to connect the module to the following module on the DIN rail
- dimensions: DIN 2U
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00250** Pieces: 10 Pulse counter

### Heating or cooling module

The heating or cooling module controls the heating or cooling in maximum four zones or rooms. Each zone or room should be equipped with a Niko Home Control thermostat. The module has four outputs to control zone valves (e.g. zone valves at 230 Vac or 24 Vdc) or circulation pumps in four zones or rooms, and one output to set the heating or cooling system to the day or night mode (depending on the heating or cooling request of one of the zones or rooms) Most boilers or cooling units are fitted with an input contact (e.g. a telephone or boiler contact) for this purpose. The module is provided with five indication LEDs and one status LED. Bistable relays ensure low energy consumption. You contact the HVAC installer to have the heating or cooling system fitted with zone valves (e.g. zone valves at 230 Vac or 24 Vdc on the heating collector or radiator) or tunable circulation pumps and to verify the contact of the heating or cooling unit to which the system should be connected.

- maximum current per module: 16 A
- screw terminals for controlling 4 zone valves or circulation pumps at 230 Vac or 24 Vdc (do not mix per module)
- 2 x 7 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 4E
- sliding contact to connect the module to the following module on the DIN rail
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00150** Pieces: 6 Heating or cooling module

### Ventilation module

The ventilation module controls the central ventilation system via the Niko Home Control installation. The module is suitable for use with whole house ventilation systems (mechanical extract ventilation or mechanical supply and extract ventilation with heat recovery). You connect the ventilation system to this module, instead of connecting it to the three- or four-way switch supplied with the system. The programming software allows you to select when and for how long the ventilation should remain activated for each setting, i.e. low (eco), normal or high. The resident can considerably save energy while maintaining optimum air quality by incorporating the ventilation control in the eco-function (all off) or calendar-based functions, for instance. The module includes three indication LEDs and one status LED. Bistable relays ensure low energy consumption.

- compatible with the Niko Home Control solar mode
- suitable for the two-wire or three-wire control of a ventilation unit
- switch only one phase per ventilation module
- maximum load: 230 Vac – 16 A per channel
- screw terminals to control 3 settings: low (eco), normal or high
- 2 x 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- CE marked
- ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

**550-00140** Pieces: 10 Ventilation module

### Analogue control module 0-10 V

Up to three high-power dimmers can be connected to the Niko Home Control installation using the analogue control module 0-10 V. Useful Niko reference codes: 05-711, 05-715, 65-410 and 330-00701.

- 3 outputs: 0 - 10 V (FELV, functional extra-low voltage), voltage-controlled (U)
- maximum distance between dimmers and module: 50 m
- maximum load: 10 mA per channel
- short-circuit protection per channel
- 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- ambient temperature: 0 – +45 °C
- CE marked

#### COMPLETE UNIT

**550-00240** Pieces: 10 Analogue control module 0-10 V

### Analogue control module 1-10 V

Up to three dimmers and/or switching devices can be connected to the Niko Home Control installation using the analogue control module 1-10 V:

- dimmers with an analogue input of 1-10 V for dimming monochrome LEDs.
- electronic control gear for fluorescent lights.
- high-power dimmers with an analogue input of 1-10 V.

Useful Niko reference codes: 05-715, 65-410, 340-00028, 340-00029 and 330-00701.

- 3 outputs: 1 - 10 V (FELV, functional extra-low voltage), current-controlled (I)
- option of connecting 3 individual phases
- maximum distance between dimmers and module: 50 m
- maximum load: 20 mA per channel, protected from 50 mA per channel and maximum 11 V
- galvanic isolation when connecting the power circuit (6 A per channel)
- 2 x 6 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 4U
- sliding contact to connect the module to the following module on the DIN rail
- ambient temperature: 0 – +45 °C
- CE marked

#### COMPLETE UNIT

**550-00241** Pieces: 6 Analogue control module 1-10 V

### Digital potential-free sensor module

The digital potential-free sensor module allows you to connect maximum three sensors equipped with an NO contact or an NPN transistor output to the Niko Home Control installation. The connected sensors should be suitable for applications with safety extra-low voltage (SELV). Typical applications include twilight switches, smoke detectors, motion detectors, door communication systems or contacts used in locks, telephone interfaces and alarm installations.

- maximum distance between sensors and sensor module: 50 m
- 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- ambient temperature: 0 – +45 °C
- CE marked

#### COMPLETE UNIT

**550-00210** Pieces: 10 Digital potential-free sensor module

### Analogue sensor module

The analogue sensor module allows you to connect three external analogue sensors with an output of 0-10 V to the Niko Home Control installation. These sensors must be suitable for applications with a safety extra-low voltage (SELV), such as sensors for measuring sunlight, wind, rain, CO<sub>2</sub>, humidity, or temperature. In function of the values measured, applications such as sunblinds, roll-down shutters, and lights can be operated automatically.

- a maximum of 10 analogue sensor modules per installation
- maximum distance between sensors and sensor module: 100 m
- 4 screw terminals for 3 x 1.5 mm<sup>2</sup> or 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- dimensions: DIN 2U
- sliding contact to connect the module to the following module on the DIN rail
- ambient temperature: 0 – +45 °C
- CE marked

#### COMPLETE UNIT

**550-00230** Pieces: 10 Analogue sensor module

## USB RF interface

The USB RF interface makes it possible to use Niko wireless Easywave controls (with the exception of the remote control 05-312) in the Niko Home Control installation for bus cabling.

This allows wireless controls to be installed:

- on surfaces unsuited to cabling (e.g. glass or concrete partitions)
- for the renovation of heritage-listed buildings
- for expansions of existing installations where drilling or channelling work is not permitted
- in office areas with movable partition walls
- when complex cabling is to be avoided.

The interface is shaped like a USB stick and can be connected to the connected controller (550-0000x) in the electrical cabinet, using the provided extension cable (3 m). The end of the extension cable is fitted with an assembly ring allowing the antennae to be attached to the outside of the electrical cabinet for optimal reception.

- one USB RF interface per installation
- for use with USB extension cable (3 m) provided
- input voltage: via USB port
- modulation: frequency shift
- usage frequency: 868.30 Mhz
- communication protocol: Easywave
- maximum radio frequency power of the Easywave signal: 5.85 dBm
- transmission range: max. 30 m indoors, 100 m in open spaces
- ambient temperature: 0 – +40 °C

### COMPLETE UNIT

**410-00099** Pieces: 10 Complete unit

## HVAC interface (coolmaster)

The HVAC interface (CoolMaster) controls a VRV, VRF or multi-split air conditioning system (HVAC system) via the Niko Home Control installation. Several zones or rooms can be connected to the HVAC interface. Each zone or room must be fitted with a Niko Home Control HVAC thermostat. The HVAC interface is equipped with a serial connection port that you must connect to the Niko Home Control Gateway using the cables provided. There is also a connector used to connect the HVAC bus of the HVAC system. The display on the HVAC interface provides extra information about the indoor units that are connected. In order to be able to program the zones or rooms, you need the correct addresses of the indoor units on the HVAC bus. Different HVAC interfaces are available for different HVAC systems. Contact your HVAC installer. At [www.niko.eu](http://www.niko.eu) (Applications > Niko Home Control), you will find more information about the supported HVAC systems.

- power supply voltage: 9 - 24 Vdc
- installation method: wall mounting or DIN rail mounting
- operating conditions:
  - ambient temperature: 0 – +45 °C
  - humidity: less than 85% relative humidity
- dimensions: 30 x 115 x 60 mm (HxWxD)
- weight: 300 g
- maximum number of indoor units and outdoor units: depending on the manufacturer
- maximum length of the RS232 cable: 25 m
- CE marked

# Software and apps for bus wiring

No matter the type of cabling you choose: you only need one programming software. It means you don't have to worry about whether you have the right software.

## ADVANTAGES

### Easy to program

- intuitive design and user-friendly interface
- graphic visual representation of the installation
- upload a floor plan in no time
- wizards help you with advanced programming
- your client can do simple adjustments him/herself without touching the program
- the installation itself saves a back-up of the file
- look for our extended software manual at <https://guide.niko.eu>

### Easy to use

- user-friendly app for iOS and Android
- free to download from the app or play store
- clear overview of the controls
- your client can setup the dashboard as they like and can make small modifications in their configuration
- all in one: control, access control and energy monitoring

### Programming software Niko Home Control II

Software for programming Niko Home Control installations for bus or traditional wiring. The software is user-friendly, intuitive and visually structured. The software can be downloaded free of charge from the Niko website. The software is available for Windows and Mac.

Do you want to upgrade an existing Niko Home Control I installation with this software? Please read our FAQ on the website before upgrading.

#### NIKO HOME CONTROL II PROGRAMMING SOFTWARE

<b>550-99102</b>	Pieces: 1	Programming software for Windows
<b>550-99202</b>	Pieces: 1	Programming software for Mac

### Configuration and control app Niko Home

Set up and control your Niko Home Control installation for traditional wiring in a user-friendly way or use this app to control your Niko Home Control installation for bus wiring.

Your Niko Home Control installation needs to contain a wireless smart hub (552-00001) or connected controller (550-00003) and has to be connected to the internet. The installation needs to be running Niko Home Control II programming software 2.5.1 (or more recent). You can download the app for free from the app store or google play store.

Features:

- Set up, configure and control your Niko Home Control installation on traditional wiring
- Control your Niko Home Control installation on bus wiring
- Add your favourite controls to your Favourites screen.
- Receive preconfigured notifications from your installation.

#### NIKO HOME APP

<b>550-92140</b>	Pieces: 1	Niko Home app for iOS
<b>550-92240</b>	Pieces: 1	Niko Home app for Android

# Controls for traditional wiring

With Niko Home Control for traditional wiring, you can easily introduce home automation to every home, even existing homes that are renovated without drilling or channelling.

## ADVANTAGES

### Easy to install

- a solution for every home, independent of the type of cabling
- compatible with standard flush-mounted boxes
- add additional controls without drilling and channelling thanks to wireless switches

### Easy to program

- familiar Niko Home Control programming software
- the wireless smart hub contains your programming files
- advanced configuration possible

### Easy to integrate

- integration possible with the smart systems of our partner brands (such as Sonos, Bose, Renson, Vaillant, NIBE, Bulex, Saunier Duval, Mitsubishi Electric)
- compatible with the Niko Home Control external video unit
- available in all Niko finishings

### Easy to use

- standard functions work without programming
- central control via touchscreen and Niko Home app for smartphone
- the Digital black allows you to combine 12 controls in 1 control display

SONOS

**BOSE**  
Better sound through research.

**DUCO**  
Ventilation & Sun Control

**RENSON**  
Creating healthy spaces

SMA

**Vaillant**

**Bulex**

**Saunier Duval**

**NIBE**

**MITSUBISHI ELECTRIC**

**DAIKIN**

**aldes**

**Dauphine**

**protherm**

Offer may vary by location. Please check with your local reseller for a complete list of compatible partner systems.

NEW

### Digital black, connected customisable control screen, 230 V

The Digital black is a completely customisable touchscreen which has an extremely user-friendly interface with clear symbols. The screen is automatically activated when your hand comes near. When there is no Niko Home Control installation available, the built-in switching contact can be controlled via the touchscreen or an N.O. push button extension (170-00005). When the connection to a Niko Home Control installation has been made, it becomes possible to switch or dim your lights, set moods, set ventilation modes, adjust blinds and sunblinds to the desired position, in one operation. In short, all possible types of controls are available in your Niko Home Control installation. Do you have a Niko Home Control thermostat (550-1305x) or an active connection with one of our heating partners? Then you can easily set the temperature with the Digital black. With the corresponding Niko Home app not only can you choose which controls are displayed or where they are displayed on the screen, but also the way you navigate through your control screens. You can download this app for free in the respective app store for your mobile device.

The Digital black can be easily mounted in any standard flush-mounting box using the familiar claw or screw fixing and is powered on 230 V AC (L- + N-wire required). This 230 V AC variant is equipped with a switching contact 10 A (resistive), meaning that it can easily be replaced with a conventional single-pole switch. In combination with the wireless smart hub for Niko Home Control (552-00001) and additional controls from the Niko Home Control range for traditional wiring, you can easily add automation to your conventional installation.

The screen communicates via your wireless home network with the rest of your Niko Home Control system. You need an active internet connection to activate the Digital black. This internet connection ensures that your Digital black and Niko Home Control installation are always up-to-date and have the most recent functionalities.

- recommended mounting height: 110 - 160 cm
- power supply voltage: 230 V AC  $\pm$  10 %, 50 Hz (L- + N-wire required)
- Wi-Fi: 2.4 GHz bgn (HT20)
- ambient temperature: 0 – +40 °C
- proximity sensor: 0 – 30 cm
- light sensor for automatic adjustment of the screen intensity
- Maximum number of Digital blacks per installation: 20
- screen size: 3.6"
- screen resolution: 1024 x 768 pixels
- display dimensions: 83 x 83 x 11.3 mm (HxWxD)
- dimensions flush-mounting mechanism: 75 x 70 x 31.5 mm (HxWxD)
- protection degree: IP40
- CE marked

#### COMPLETE UNIT

<b>551-18000</b>	Pieces: 1	With screw terminals and claw fixing
<b>551-18001</b>	Pieces: 1	With screw terminals and screw fixing

Flush surround plates to be ordered separately.

### Connected single switch, 10 A

The connected single switch has a switching contact to switch lighting. It contains a transmitter and receiver that can communicate wirelessly with the wireless smart hub for Niko Home Control.

You can use the connected single switch to replace a conventional switch. It is equipped with an extension terminal so that, in combination with a conventional push button, it can easily replace multiway or intermediate switching.

The connected single switch can switch its own contact.

Once connected to the wireless smart hub for Niko Home Control, it is possible to configure additional functionalities with the Niko Home Control programming software. For example, you can add the switch to a mood or all-off function.

It is possible to disconnect the control from its built-in contact. That way, you have complete flexibility to configure the switching contact and the controls separately via the programming software.

- power supply: 230 Vac (L- + N-wire required)
- max. load per channel: 10 A
- communication protocol: Easywave #
- mounting method: wall mounting
- mounting height: 110 - 120 cm
- modification of settings: Niko Home Control programming software (requires smart hub 552-00001)
- maximum range (from switch to smart hub): 30 m
- operating frequency: 869.05 Mhz
- maximum frequency power: 6 dBm
- LED colour: white
- protection degree: IP20
- flush-mounting depth: 40 mm
- ambient temperature: 0 – +40 °C
- marking: CE

**Connected double switch, 2 x 10 A (total max. 16 A)**

The connected double switch has a switching contact to switch lighting. It contains a transmitter and receiver that can communicate wirelessly with the wireless smart hub for Niko Home Control.

You can use the connected double switch to replace a conventional switch. It is equipped with an extension terminal so that, in combination with a conventional push button, it can easily replace multiway or intermediate switching.

The connected double switch can switch its own contact.

Once the wireless smart hub for Niko Home Control has been added, it is possible to configure additional functionalities with the Niko Home Control programming software. That way, it is possible to connect these in a mood or all-off function and much more.

It is possible to disconnect the control from its built-in contact. That way, you have complete flexibility to configure the switching contact and the controls separately via the programming software.

- power supply: 230 Vac (L- + N-wire required)
- max. load per channel: 10 A
- max. load both channels: 16 A
- communication protocol: Easywave #
- mounting method: wall mounting
- mounting height: 110 - 120 cm
- modification of settings: Niko Home Control programming software (requires smart hub 552-00001)
- maximum range (from switch to smart hub): 30 m
- operating frequency: 869.05 Mhz
- maximum frequency power: 6 dBm
- LED colour: white
- protection degree: IP20
- flush-mounting depth: 40 mm
- ambient temperature: 0 – +40 °C
- marking: CE

### Connected dimmer, 3 - 200 W, 2-wire

The connected dimmer contains a dimmer contact to control the lighting. It contains a transmitter and receiver that communicate wirelessly with the wireless smart hub for Niko Home Control.

You can use the connected dimmer to replace a conventional switch. It is equipped with an extension terminal so that, in combination with a conventional push button, it can easily replace multiway or intermediate switching.

The connected dimmer can switch its own contact.

With the addition of the wireless smart hub for Niko Home Control, it is possible to configure additional functionalities with the Niko Home Control programming software. For example, it becomes possible to add it to a mood or all-off function.

It is possible to disconnect the control from its built-in contact. That way, you have complete flexibility to configure the switching contact and the controls separately via the programming software.

- Power supply: 230 Vac (only L-wire required)
- Communication protocol: Easywave #
- Mounting method: wall mounting
- Mounting height: 110 - 120 cm
- Modification of settings: Niko Home Control programming software (requires smart hub 552-00001)
- Maximum range (from switch to smart hub): 30 m
- Operating frequency: 869.05 Mhz
- Maximum frequency power: 6 dBm
- Load: 3 - 200 W
- LED colour: white
- Protection degree: IP20
- Flush-mounting depth: 40 mm
- Marking: CE

**Wireless smart hub for Niko Home Control**

The wireless smart hub for Niko Home Control is the brain of the installation. It allows you to connect all connected devices in your installation to the system. Once you have added them, you can easily control them with your smartphone. With the programming software, you can also add extensive functionalities such as moods, all-off actions or presence simulation. The smart hub always needs to be used in combination with the Niko Home Control programming software.

- fitted with a LED indicating the correct functioning of the device
- dimensions (HxWxD): 124 x 124 x 30 mm
- maximum consumption: 6 W
- input voltage: 5 V via micro USB port (power adapter supplied)
- RJ45 port, 100 Mbit WAN port, SMR P1 port (smart meter (P1 RJ12) cable supplied)
- Ethernet cable supplied
- ambient temperature: 0 – +45 °C
- protection degree: IP20
- mounting: can be positioned horizontally, or mounted vertically on the wall
- communication protocols: Wi-Fi protocol 2.4 Ghz , Zigbee®, Easywave #, Easywave
- internet connection via UTP or Wi-Fi
- compatible with the Dutch smart meter (SMR 2.2, 3,4 and 5)
- compatible with the Belgian digital meter (Fluvius, Ores, Sibelga)

**COMPLETE DEVICE**

<b>552-00001</b>	Pieces: 1	Wireless smart hub

### Wireless motion detector, Zigbee®

The wireless motion detector can be used to control other switching contacts. For example, when motion is detected, you can control the contact of another connectable switch, dimmer or motor control.

Since the motion detector is powered by a button battery and is supplied with a self-adhesive mounting plate, it can be easily attached anywhere.

This motion detector can only be used in combination with the wireless smart hub for Niko Home Control (552-00001). This makes it possible to configure additional functionalities with the Niko Home Control programming software.

- maximum range open field (detector to smart hub): 30 m
- maximum range indoor (detector to smart hub): 10 m
- communication protocol: Zigbee® 3.0
- operating frequency: 2.4 Ghz
- input voltage: battery CR2450
- ambient temperature: 0 – +40 °C
- mounting method: surface mounting
- mounting height: 2.5 – 2.8 m
- Detection angle: 110°
- Detection range (PIR): up to 5 m from a height of 2.5 m
- dimensions (HxWxD): 51 x 51 x 34 mm
- weight: 69 g
- maximum radio frequency power: 7 dBm
- detector settings: Niko Home Control programming software
- protection degree: IP20

### Connected switching socket outlet for Niko Home Control with pin earthing and shutters, Zigbee®

With this connected switching socket outlet with built-in consumption measurement, you choose extra comfort, peace of mind and energy awareness. The socket outlet can be perfectly installed in all new construction projects and can also easily replace an existing socket outlet in renovation projects (provided that appropriate wall mounting boxes are present) without adapting the wiring or circuit breakers.

You connect the socket outlet without additional wiring with a wireless switch and the wireless smart hub (552-00001) for Niko Home Control. That way you have full control over your socket outlets and you can easily create useful new functionalities, including all-off or all-on and panic functions, routines, calendar and scheduling functions, remote control via the app, insight in your energy consumption, consumption warnings on your smartphone, starting automatic actions when a consumption energy level is exceeded ...

**NEW**

- base for flush-mounting: flush-mounting depth 32.4 mm
- connection: plug-in terminals (3 x 2 x 2.5 mm<sup>2</sup>) with unlocking system
- input voltage: 230 Vac ± 10 %, 50 Hz
- standby consumption: 0.15 W
- ambient temperature: 0 – +40 °C
- protection degree: IP20-D
- marking: CE marked
- quality mark: CEBEC, NF
- maximum load: 16 A / 3680 W
- internal overcurrent protection: switches off at > 16 A
- internal overheating protection
- communication protocol: Zigbee® 3.0, 2.4 GHz
- Button on the device to switch the phase (L) on and off locally
- LED indicator for status and error information
- measuring precision: ± 0.5 W (1 - 5 W), ± 5 % (5 - 3680 W). Valid for a normal voltage (230 Vac). This device should not be used for billing purposes. The data recorded by this device should be used for information purposes only.

### Smart plug with pin earthing, Zigbee®

Use the smart plug to switch any plugged-in device on and off and to measure its energy consumption. Once the smart plug has been inserted into a wall-mounted socket outlet, you can switch the plugged-in device on and off locally using the button on the plug. To benefit from all the smart functionalities Niko Home Control has to offer such as smartphone control inside and outside the home (e.g. in an all-off function or solar mode) and to monitor your energy consumption, you can wirelessly connect the smart plug to the separately available wireless smart hub for Niko Home Control (552-00001). The easy way of connecting the smart plug makes it possible to move the plug around in your house to discover the energy consumption of multiple appliances with just one smart plug.

NEW

- dimensions (HxWxD): 60 x 60 x 80 mm
- input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- standby consumption:  $\leq$  0.5 W

#### COMPLETE UNIT

**552-80698** Pieces: 2 Smart plug with side earthing, Zigbee®

**Wireless switch with two buttons**

This wireless switch with two buttons can be used by a wireless receiver from the Easywave range. It can be used as one dual-button control (upper=on, lower=off), or as two one-button controls (toggle on/off or pulse). The switch can also be used in the Niko Home Control installation for bus wiring in combination with the USB RF interface Easywave (410-00099) for Niko Home Control or in the Niko Home Control installation for traditional wiring in combination with the wireless smart hub (552-00001).

- power supply: battery (supplied), type CR2430
- transmission range: max. 30 m indoors, 100 m in open spaces
- mounting: with the supplied screws or adhesive strips or (option) with a metal base on a standard flush-mounting box
- communication protocol: Easywave

**BASE**

**410-00001** Pieces: 6 With plastic mounting frame and battery

**Wireless switch with four buttons**

This wireless switch with four buttons can be used by a smart switch or a wireless receiver. It can be used as a two dual-button controls (upper:on, lower off) or as four one-button controls (on/off or pulse). The switch can also be used in the Niko Home Control installation for bus wiring in combination with the USB RF interface Easywave (410-00099) for Niko Home Control or in the Niko Home Control installation for traditional wiring in combination with the wireless smart hub (552-00001).

- power supply: battery (supplied), type CR2430
- transmission range: max. 30 m indoors, 100 m in open spaces
- mounting: with the supplied screws or adhesive strips or (option) with a metal base on a standard flush-mounting box
- communication protocol: Easywave

**BASE**

**410-00002** Pieces: 6 With plastic mounting frame and battery

**ACCESSORY**

**450-00067** Pieces: 20 Set of claws for wall-mounted printed circuit board

**BASE FOR MOUNTING ON THE FLUSH-MOUNTING BOX**

## Touchscreen

This touchscreen allows you to conveniently operate the entire Niko Home Control installation from one central point: switching and dimming the lighting, controlling the temperature, moving roller blinds and sunblinds to the position of your choice, monitoring the energy consumption and the status of the installation ... Thanks to a built-in light sensor, the screen brightness adapts to the ambient light.

Thanks to the connection to the Niko Home Control external video unit, access control is also possible. This way, you can answer incoming calls, open a connected door lock, peek outside and check missed calls. A feedback LED displays any missed calls, even when the device is in standby mode. Please note: we recommend providing at least one touchscreen on top of the smartphones and/or tablets because a wired device is always more reliable than a mobile one.

This touchscreen (550-20102) replaces touchscreen 2 (550-20101) completely. In existing Niko Home Control installations, it can replace as well as complement its predecessor. Its wired connection to the home network ensures a very reliable connection.

Only one flush-mounting box is needed to mount this touchscreen. You connect the touchscreen with one twisted pair cable (UTP, FTP or STP) to the Power over Ethernet power supply, which is available separately. Alternatively, you can also place a separate 24 V DC power supply in the cabinet. A total of ten IP devices (touchscreens, smartphones or PC applications) can be connected per installation.

- power supply voltage: 24 Vdc ( $\pm 10\%$ ) (SVV, JYSTY, TPVF, UTP, etc.) or Power over Ethernet (PoE) (UTP, STP, FTP) (48 V DC)
- electricity consumption: 500 mA (24 Vdc) or 250 mA (PoE 48 V DC)
- ambient temperature:
  - in operation: 0 – +40 °C
  - storage and transport: -10 – +65 °C
- Ethernet connection speed: 10 - 100 Mbit/s
- CE marked
- dimensions: 124 x 192 x 20 mm (HxWxD)
- screen size: 7"
- screen resolution: 1024 x 600
- weight: 570 g (excluding connectors and screws)
- protection degree: IP20

### COMPLETE DEVICE

**550-20102** Pieces: 1 Touchscreen

### COMPLETE UNIT

**550-00502** Pieces: 1 PoE power supply

### COMPLETE UNIT

**340-00050** Pieces: 6 Modular power supply 24 Vdc, 60 W

## External video unit

This ultra-flat external video unit for flush mounting is finished with a black front plate made of anodised aluminium (3 mm thick). The device is equipped with a 130° HD colour camera and a Plexiglas nameplate that can be engraved. The external video unit is supplied with a flush-mounting box. This unique lighting concept (patent pending) provides refined and homogeneous illumination of the engraved nameplate, guaranteeing good visibility in the dark. The touch button requires no maintenance and is extremely durable. Combined with the touchscreen as an internal video unit, access control can be integrated into a Niko Home Control installation. You can then use a smartphone or tablet as an additional internal video unit if both the external video unit and the mobile device have an active Internet connection and the installation has been registered at [mynikohomecontrol.niko.eu](http://mynikohomecontrol.niko.eu). Please note: we recommend providing at least one touchscreen on top of the smartphones and/or tablets because a wired device is always more reliable than a mobile one.

- power supply voltage: 48 Vdc  $\pm$  10%
- power consumption: 5 W
- ambient temperature: -30 – +60 °C
- dimensions flush-mounting box: 239 x 89 x 47 mm (HxWxD)
- dimensions external unit: 256 x 110 mm (HxW)
- HD camera resolution: 720 horizontal TV lines
- camera angle: 130°
- light sensitivity: 1 lux
- mounting: flush-mounting
- protection degree: IP53
- CE marked

# Software and apps for traditional wiring

No matter the type of cabling you choose: you only need one programming software. It means you don't have to worry about whether you have the right software.

## ADVANTAGES

### Easy to program

- intuitive design and user-friendly interface
- graphic visual representation of the installation
- upload a floor plan in no time
- wizards help you with advanced programming
- your client can do simple adjustments him/herself without touching the program
- the installation itself saves a back-up of the file
- look for our extended software manual at <https://guide.niko.eu>

### Easy to use

- user-friendly app for iOS and Android
- free to download from the app or play store
- clear overview of the controls
- your client can setup the dashboard as they like and can make small modifications in their configuration
- all in one: control, access control and energy monitoring

### Programming software Niko Home Control II

Software for programming Niko Home Control installations for bus or traditional wiring. The software is user-friendly, intuitive and visually structured. The software can be downloaded free of charge from the Niko website. The software is available for Windows and Mac.

Do you want to upgrade an existing Niko Home Control I installation with this software? Please read our FAQ on the website before upgrading.

#### NIKO HOME CONTROL II PROGRAMMING SOFTWARE

<b>550-99102</b>	Pieces: 1	Programming software for Windows
<b>550-99202</b>	Pieces: 1	Programming software for Mac

### Configuration and control app Niko Home

Set up and control your Niko Home Control installation for traditional wiring in a user-friendly way or use this app to control your Niko Home Control installation for bus wiring.

Your Niko Home Control installation needs to contain a wireless smart hub (552-00001) or connected controller (550-00003) and has to be connected to the internet. The installation needs to be running Niko Home Control II programming software 2.5.1 (or more recent). You can download the app for free from the app store or google play store.

Features:

- Set up, configure and control your Niko Home Control installation on traditional wiring
- Control your Niko Home Control installation on bus wiring
- Add your favourite controls to your Favourites screen.
- Receive preconfigured notifications from your installation.

#### NIKO HOME APP

## Chapter 3

# Wireless controls

- 3.A Smart switches
- 3.B Wireless controls
- 3.C Wireless functions
- 3.D Accessories for wireless applications

# Wireless controls

Sometimes you need to add controls in situations that are not ideal. Niko has a solution for adding controls to surfaces that are unsuited to wiring (like glass or concrete walls) or in situations where drilling or channelling work is not permitted (such as heritage-listed buildings or offices with movable partition walls): wireless switches, dimmers and functions.

## ADVANTAGES

### The smart switch: more flexibility and more possibilities

- replace an existing switch with a smart switch
- with configurable indication LED
- equipped with a built-in switching contact (10 A), a push-button input and an RF receiver and transmitter
- control the switching contact with extra push-buttons, wireless switches

### Wireless switches: stick it and it's done

- no need for drilling and channelling
- stick, screw or lay them wherever you want, even on glass, concrete, wood etc.
- insensitive to disruptions, frequency 868,3 MHz
- safely control your light from your bath or shower
- available in all Niko finishings

### Wireless receivers: numerous variants

- 1 receiver can be controlled by max. 32 transmitters
- 1 transmitter can control an unlimited number of receivers
- extensive possibilities: models for flush-mounting, for the electrical cabinet, for outside applications and for the socket outlet

## PRODUCT IN THE SPOTLIGHT

### Niko dimmer switch for the Hue system

- wireless and battery-free
- maintenance-free
- connect up to 25 Niko dimmer switches to 1 Hue Bridge v2 (not included)
- configure in the Hue app
- use as dimmer or switch for pre-set light moods
- available in all Niko finishings

NEW

#### Niko dimmer switch, Bluetooth®

- wireless and battery-free
- maintenance-free
- works with smart luminaires with integrated Bluetooth® technology, such as Casambi® enabled systems or Xicato® lighting solutions
- configure in the respective smart luminaire app or PC software (e.g. Casambi®, Xicato®, Sylsmart® etc.)
- use as dimmer or switch for pre-set light moods
- available in all Niko finishings

#### Niko dimmer switch, EnOcean®

- wireless and battery-free
- maintenance-free
- can be paired with every EnOcean® compatible receiver, including Niko presence detectors with EnOcean® interface
- configure via a special button combination on the dimmer switch, via the NFC interface or a QR code scan
- use as dimmer, switch or shutter control
- available in all Niko finishings

#### Niko dimmer switch, KNX®

- wireless and battery-free
- maintenance-free
- works with a media coupler in any KNX® system
- configure via ETS 5 software
- use as dimmer, switch, shutter control or scene selector
- available in all Niko finishings

**Smart single switch with push button and RF extensions, 10 A**

The smart switch has a switching contact to switch lighting on and off. It has a transmitter and receiver operating according to the Easywave protocol. If desired, extra controls can be added. These could be both classic wired push buttons and wireless controls according to the Easywave protocol. By doing so, it can effortlessly replace any traditional single, multiway, or intermediate switching. This makes the smart switch especially suitable for renovation projects or listed building interiors in which drilling or channelling work should be avoided. Please note, the only condition for the use of the smart switch is the presence of the neutral conductor in the flush-mounting box where the smart switch will be placed.

Besides being able to switch its own contact, the smart switch is also able to switch other receivers operating according to the Easywave protocol. This function can also be incorporated in a mood setting/preset. In doing so, you can switch all lighting included in the mood setting/preset with one push of the button. It is fitted with a feedback LED of which the behaviour can be adapted to the needs of the user.

- base for flush-mounting: flush-mounting depth 29.5 mm
- communication protocol: Easywave 868.3 MHz
- weight: 100 g
- dimensions (HxWxD): 70 x 70 x 42 mm
- input voltage: 230 V 50 Hz (N, L)
- standby consumption: 0.38 W
- ambient temperature: 0 – +35 °C
- protection degree: IP41
- marking: CE marked
- maximum load incandescent lamps: 2300 W
- maximum load 230 V LED lamps and economy lamps (CFLi): 100 W
- maximum load fluorescent lamps: 600 W
- maximum load low voltage halogen lamps: 600 VA

***This product can be used in combination with other products that use the Easywave protocol. It cannot be used in combination with the wireless smart hub (552-00001) nor the connected products in the 551-xxxx range using the Easywave # protocol.***

### Smart double switch with push button and RF extensions, 2 x 10 A

The smart switch has two switching contacts of 10 A each (in total max 16 A) to switch lighting on and off. It has a transmitter and receiver operating according to the Easywave protocol. If desired, extra controls can be added. These could be both classic wired push buttons and wireless controls according to the Easywave protocol. By doing so, it can effortlessly replace any traditional single, multiway, or intermediate switching. This makes the smart switch especially suitable for renovation projects or listed building interiors in which drilling or channelling work should be avoided. Please note, the only condition for the use of the smart switch is the presence of the neutral conductor in the flush-mounting box where the smart switch will be placed.

Besides being able to switch its own contact, the smart switch is also able to switch other receivers operating according to the Easywave protocol.

This function can also be incorporated in a mood setting/preset. In doing so, you can switch all lighting included in the mood setting/preset with one push of the button. It is fitted with a feedback LED of which the behaviour can be adapted to the needs of the user.

- base for flush-mounting: flush-mounting depth 29.5 mm
- communication protocol: Easywave 868.3 MHz
- weight: 100 g
- dimensions (HxWxD): 70 x 70 x 42 mm

**Smart universal push-button dimmer with RF transmitter and receiver, 3 – 200 W, 2-wire**

The smart dimmer is suitable for dimming resistive, inductive and capacitive loads as well as dimming dimmable halogen and LED lamps. It has a transmitter and receiver operating according to the Easywave protocol.

If desired, extra controls can be added. These could be both wired push buttons and wireless controls according to the Easywave protocol. The smart dimmer is connected with a 2-wire system and does not need a neutral conductor. By doing so, it can effortlessly replace an existing single, multiway, or intermediate switching.

It is highly suitable for the expansion of existing electrical installations where drilling or channelling work is not permitted or to avoid complicated cabling.

The smart dimmer can not only dim its own load but can also control other dim receivers which operate according to the Easywave protocol. It can also be incorporated in a mood setting which can be activated via a wireless control.

The dimmer has a feedback LED of which the operation can be set.

- communication protocol: Easywave 868.3 MHz
- dimensions: 70 x 70 x 42 mm (HxWxD)
- flush-mounting depth: 29.5 mm
- protection degree: IP41.
- input voltage: 230 Vac ± 10 %, 50 Hz (L,L')
- for use with or without light value memory
- for use with several control points, use N.O. push buttons, also when replacing single-pole, two-way or intermediate switches
- incandescent lamps and 230 V halogen lamps: 3 - 200 W
- dimmable LED lamps: 3 - 200 W (max. 10)
- ferromagnetic, toroidal and electronic transformer: 20 - 200 W
- overload protection with automatic reset function
- electronic short-circuit protection
- PLC interference suppression
- own power consumption: 0.38 W
- connection terminals: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: 0 – +35 °C
- Marking: CE marked

***This product can be used in combination with other products that use the Easywave protocol. It cannot be used in combination with the wireless smart hub (552-00001) nor the connected products in the 551-xxxx range using the Easywave # protocol.***

**Wireless switch with two buttons**

This wireless switch with two buttons can be used by a wireless receiver from the Easywave range. It can be used as one dual-button control (upper=on, lower=off), or as two one-button controls (toggle on/off or pulse). The switch can also be used in the Niko Home Control installation for bus wiring in combination with the USB RF interface Easywave (410-00099) for Niko Home Control or in the Niko Home Control installation for traditional wiring in combination with the wireless smart hub (552-00001).

- power supply: battery (supplied), type CR2430
- transmission range: max. 30 m indoors, 100 m in open spaces
- mounting: with the supplied screws or adhesive strips or (option) with a metal base on a standard flush-mounting box
- communication protocol: Easywave

**BASE**

**410-00001** Pieces: 6 With plastic mounting frame and battery

**ACCESSORY**

**450-00067** Pieces: 20 Set of claws for wall-mounted printed circuit board

**BASE FOR MOUNTING ON THE FLUSH-MOUNTING BOX**

**410-00021** Pieces: 10 For claw fixing (transmission range +/- 25 m indoors)

**410-00022** Pieces: 6 For screw fixing (transmission range +/- 25 m indoors)

### Wireless mini hand-held transmitter with 1 channel and 1 control button

This hand-held transmitter has one control button and can be used in combination with every Niko receiver. One function can be assigned to the control button. Visual check of the control via a LED. For use in a residential environment. Battery supplied.

In combination with the Niko Home Control USB RF interface (410-00099), the hand-held transmitter can also be used in Niko Home Control installations.

- power supply: battery (supplied), type CR2032
- transmission range: Max 30 m indoors, 100 m in open spaces
- dimensions: 56 x 36 x 16 mm (HxWxD)
- weight:  $\pm 21$  g (including battery)
- communication protocol: Easywave

#### COMPLETE UNIT

**05-311** Pieces: 10 Complete unit

### Wireless mini hand-held transmitter with 1 channel and 4 control buttons

This hand-held transmitter has four independent control buttons and can be used in combination with all Niko receivers. A different function can be assigned to every control button. Visual feedback of the control via an LED. The battery is supplied with the transmitter.

In combination with the Niko Home Control USB RF interface (410-00099), the hand-held transmitter can also be used in Niko Home Control installations.

- power supply: battery (supplied), type CR2032
- transmission range: max. 30 m indoors, 100 m in open spaces
- dimensions: 62 x 37 x 11 mm (HxWxD)
- weight: max. 28 g (including battery)
- communication protocol: Easywave

#### COMPLETE UNIT

**05-317** Pieces: 10 Complete unit

### Wireless hand-held transmitter with 4 channels and 13 control buttons

With this hand-held transmitter, you control a maximum of 52 circuits, independent of one another, but dependent on the receiver settings. You use the hand-held transmitter for 1-key, 2-key and 4-key functions. The operation status and channel selection is indicated with LEDs. This handheld transmitter **cannot** be used in Niko Home Control installations.

- power supply voltage: 2 x CR2032 batteries (supplied)
- transmission range: max. 30 meters indoors, 100 meters in open spaces
- dimensions: W61xH151xD21 mm.
- communication protocol: Easywave

#### COMPLETE UNIT

**05-312** Pieces: 1 Complete unit

### Wireless hand-held transmitter with 5 channels and 3 control buttons

This hand-held transmitter controls a maximum of 15 circuits independently (depending on the settings of the receivers) and can be used for one-, two- or four-button functions. Visual feedback of the channel selection and control via LEDs.

In combination with the Niko Home Control USB RF interface (410-00099), the hand-held transmitter can also be used in the Niko Home Control installations.

- dimensions: 108 x 38 x 14 mm (HxWxD)
- power supply: battery (supplied), type CR2032
- communication protocol: Easywave

#### COMPLETE UNIT

**05-318** Pieces: 1 Complete unit

### Wireless mini transmitter interface

The wireless transmitter interface for push buttons or switches converts the push-button or switching contacts into a wireless telegram:

- When connecting up to four push buttons: the wireless telegram is being sent as long as the push button is pressed (max. 10 s).
- When connecting up to two switches: the wireless telegram will be sent as soon as the contact is closed. When the contact is opened, a new telegram is sent. Any programming can be assigned when closing or opening the contact.

In combination with the Niko Home Control USB RF interface (410-00099), the hand-held transmitter can also be used in Niko Home Control installations.

- power supply: 3 V battery, type CR2032 (supplied)
- dimensions: 30 x 28 x 9 mm (HxWxD)
- communication protocol: Easywave

#### COMPLETE UNIT

**05-315** Pieces: 10 Complete unit

### Wireless two-channel transmitter with Easywave protocol

The wireless two-channel transmitter is suitable for flush mounting and may only be used to control wireless receivers. By using this two-channel transmitter, you can expand the switching function of existing switches or push buttons via a receiver. The two-channel transmitter checks whether a switch/push button is live and transmits the corresponding code (A, B, C or D) to the wireless receiver, which in turn switches the consumer. This wireless two-channel transmitter **cannot** be used in Niko Home Control installations.

- dimensions: 25 x 48 x 48 mm (HxWxD)
- weight: 32 g
- frequency: 868.3 MHz
- power supply voltage: 230 V, 50 Hz
- maximum power consumption: 0.42 W
- transmission range: max. 30 m indoors, 100 m in open spaces
- protection degree: IP20
- operating temperature: -20 – +60 °C

#### COMPLETE UNIT

**410-00362** Pieces: 1 Complete unit

### Wireless window or door contact

The wireless window or door contact (transmitter) is used to control wireless receivers. The magnetic contact transmits the status of objects via wireless signals to a wireless receiver. If the window or door is opened or closed, an Easywave code is transmitted, and the connected, wireless receiver switches, depending on the set operating mode. A battery, mounting bracket with magnet, and a mounting set are included. In combination with the Niko Home Control USB RF interface (410-00099), the wireless window or door contact can also be used in Niko Home Control installations.

- dimensions of contact: 12 x 65 x 28 (HxWxD)
- dimensions of magnet: 18 x 18 x 13 (HxWxD)
- weight of contact: 20.6 g
- weight of magnet: 2.2 g
- frequency: 868.3 MHz
- power supply: 3 V battery, type CR2032 (supplied)
- power consumption: 1.6  $\mu$ A
- transmission range: max. 30 m indoor, 100 m in open spaces
- protection degree: IP54
- operating temperature: -20 – +60 °C
- quality mark: CE marked in compliance with EN 60669-2-1
- communication protocol: Easywave

#### COMPLETE UNIT

**05-363** Pieces: 1 Complete unit

NEW

**Niko dimmer switch, EnOcean®**

With this wireless and battery-free dimmer switch in Niko design, you can remotely operate EnOcean® certified 868 MHz wireless receivers. Examples are Niko presence detectors with an EnOcean® interface (350-41680, 350-41780, 350-41781). No wall breaking or cable installation is needed. For best performance, follow the installation and radio planning guidelines. The pairing procedure with a wireless receiver determines the function of each button. Up to four buttons can be configured. The dimmer switch can be mounted on a European flush-mounting box, screwed onto a wall (screws not included) or glued to a flat surface with double-sided adhesive strips (included). The central plate and the faceplate must be ordered separately. The dimmer switch combines with any Niko Pure, Niko Intense and Niko Original faceplate in the colour of your choice.

- dimensions (HxWxD): 83 x 83 x 15 mm
- power supply: integrated kinetic energy harvester
- RF protocol: EnOcean®
- maximum RF power: 5 dBm / 3.1 mW
- configuration interface: Special Button Combinations (SBC) NFC forum type 2 tag
- mounting height: 110 cm
- temperature (storage / operating): -25 – +65 °C
- maximum range (indoor from switch to receiver): up to 30 m
- operating frequency: 868.3 MHz
- antenna: integrated antenna
- weight: 25 g
- protection degree: IP20
- marked: CE

**Niko dimmer switch, Bluetooth®**

With this wireless and battery-free dimmer switch in Niko design, you can remotely operate Bluetooth® low energy 2,4 GHz wireless receivers that are located in the same room. Examples are Niko presence detectors with a Bluetooth® interface or smart lighting with integrated Bluetooth® technology from Casambi® of Xicato®. For best performance, follow the installation and radio planning guidelines. Configure the dimmer switch buttons with the respective smart lighting smartphone app or software app (e.g. Casambi app, Xicato Control Software, SylSmart Standalone app, ...). Up to four buttons can be configured. No wall breaking or cable installation is needed. The dimmer switch can be mounted on a European flush-mounting box, screwed onto a wall (screws not included) or glued to a flat surface with double-sided adhesive tape (included). The central plate and faceplate must be ordered separately. The dimmer switch combines with any Niko Pure, Niko Intense and Niko Original faceplate in the colour of your choice.

- dimensions (HxWxD): 85 x 85 x 15 mm
- power supply: integrated kinetic energy harvester
- RF protocol: Bluetooth® Low Energy (BLE)
- configuration interface: NFC Forum Type 2 Tag (ISO/IEC 14443 Part 2 and 3)
- modulation: Gaussian frequency-shift keying (GFSK) / 1 Mbps
- operating frequency: 2402 MHz ... 2480 MHz
- mounting height: 110 cm
- temperature (storage / operating): -25 – +65 °C
- maximum range (indoor from switch to receiver): up to 10 m.  
Depending on the smart lighting, the receiver can also act as a relay and augment the range
- maximum RF power: 0.4 dBm
- antenna: Integrated antenna
- protection degree: IP20
- marking: CE

## Niko dimmer switch, KNX®

This wireless and battery-free dimmer switch in Niko design can operate as a switch, a dimmer, a roller shutter control or a scene selector in a KNX® system. This dimmer switch works together with the KNX® wireless media coupler (360-33001) who transmits the KNX® commands to the KNX® bus. This allows you to easily extend a KNX® system without breaking walls or installing extra cables. For best performance, follow the installation and radio planning guidelines.

Configure the dimmer switch buttons with the ETS software that is available on the KNX® Association website together with the KNX® programming adapter (360-39001). The following communication objects can be linked to the buttons: single channel, dimming and shutter control. The supported functions are: on, off, toggle, up, down, darker, brighter, scene number, send value in percentage, in angle, in 2 bits, in 8 bits. Up to six button combinations can be configured.

The dimmer switch can be mounted into a European flush-mounting box, screwed onto a wall (screws not included) or glued to a flat surface with double-sided adhesive tape (included). The central plate and the faceplate must be ordered separately. The dimmer switch combines with any Niko Pure, Niko Intense and Niko Original faceplate in the colour of your choice.

- dimensions (HxWxD): 83 x 83 x 15 mm
- power supply: integrated kinetic energy Harvester
- RF protocol: KNX RF1.RS-Mode
- modulation: Frequency-shift keying (FSK) / up to 16.384 kbps
- maximum RF power: -2 dBm / 0.63 mW
- mounting height: 110 cm
- temperature (storage / operating): -20 up to +45 °C
- maximum range (indoor from switch to receiver): Up to 30 m
- operating frequency: 868.3 MHz
- antenna: integrated antenna
- weight: 22 g
- protection degree: IP20
- marked: CE

### Modular wireless dimmer, 750 VA

The wireless dimmer for DIN rail mounting is suitable for a selection of dimmable LEDs, 230 V incandescent lamps, 230 V halogen lamps and all types of low-voltage halogen lamps. Automatic selection of the dimming principle. Control by a wired push-button or wireless transmitters. Up to 30 controls. Use with or without memory function. Additional memory for saving one atmosphere. Indication LEDs for the operation and feedback on errors. In compliance with the European directives for EMC and safety EN60669-2-1.

- five control modes
- single- or dual-button control
- switching time: 0 - 3 s
- switch-off delay: 0 s - 3 min
- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz  $\pm$  1 Hz
- overload protection with automatic reset function
- PLC filter for interference via the mains
- dimensions (2 DIN rail modules): 90 x 35 x 66 mm (HxWxD)
- weight:  $\pm$  144 g
- ambient temperature: 0 - +35 °C
- ferromagnetic & toroidal core transformer: 60-750 VA
- electronic transformer: 60-750 VA
- incandescent lamps & halogen lamps: 60-750 W

#### COMPLETE UNIT

**05-353**

Pieces: 10

Complete unit

### Modular wireless dim receiver

The dim receiver for DIN rail mounting is provided with two channels and a connector for the external antenna (05-309). Wireless transmitters can be connected to this receiver. Each channel consists of an NO contact (4 A/230 V) and a control output 1-10 V (45 mA). Electronic ballasts of dimmers (05-715, 65-410) can be directly controlled with a current signal 1-10 V in accordance with the EN60929 standard. In addition to the conventional dimming from 0 to 100%, it is also possible to activate a preset dimming level or an atmosphere.

- nine programming modes
- one-, two- or four-button control (depending on the mode)
- switching time: 0 - 3 s
- switch-off delay: 0 s - 120 min
- dimensions: DIN 4U
- weight: 282 g
- communication protocol: Easywave

#### COMPLETE UNIT

**05-350**

Pieces: 6

Complete unit

### Wireless two-channel receiver, IP66, for surface mounting

The two-channel receiver for surface mounting is provided with two switching contacts (10 A/230 V) (two-way contact and single-pole contact) and two push-button inputs. The receiver can be controlled without any wiring or via local push buttons. If the receiver is used as a roll-down shutter or ventilation control, there are five specific modes for setting the roll-down shutter functions (open, stop and close) or the different ventilation speeds. When used as a motor control, both contacts are used for one motor. The receiver can only be connected to one phase. The switching contacts cannot be used for safety extra-low voltage (SELV) circuits.

- five modes for the on/off function (separately adjustable per output)
- switching time: 0 - 3 s
- switch-off delay: 0 s - 120 min
- dimensions: 56 x 94 x 180 mm (HxWxL)
- weight: 645 g
- protection degree: IP66 (protected against dust and powerful water jets)
- communication protocol: Easywave

#### COMPLETE UNIT

**05-336**

Pieces: 1

Complete unit

### Wireless two-channel receiver, 12-24 VAC or VDC, for surface mounting

The two-channel receiver for surface mounting has four operating modes. Wireless transmitters can be connected to this receiver. An external pulse push button can also be connected per channel. The receiver can only be used for switching low-voltage loads. Possible applications: two-button control (on/off functions), push-button functions (on for as long the push button is pressed), pulse function (1 s) or two-button control (roll-down shutters/venetian blinds). The roll-down shutter/venetian blind function can only be supplied with direct current (dc).

- dimensions: 35 x 63 x 70 mm (HxWxL) (without antenna)
- power supply voltage: 12 – 24 Vac or Vdc
- maximum contact load:
- ac: 24 V, 1 A (24 VA)
- dc: 30 V, 1 A (30 W)
- communication protocol: Easywave

#### COMPLETE UNIT

**05-335** Pieces: 6 Complete unit

### Wireless repeater

The repeater is used in installations with insufficient range and has two operating modes: cascade and defined mode.

When using up to three repeaters in cascade mode, the range can be extended by up to 3 times.

In defined mode, a maximum of 32 control points can be learned.

An indication LED flashes when a command is received or sent.

The repeater does not work for motor control and dimmers (because you have to press and hold the button for a long time).

NEW

- dimensions: W48 x H48 x D25 mm (without antenna)
- input voltage: 230 V 50 Hz
- power consumption: 0.5 W standby
- frequency: 868.3 MHz
- operating temperature: -20 – +60 °C
- wire capacity: 0.5 – 2 x 2.5 mm<sup>2</sup>
- communication protocol: Easywave ABCD, EasywavePlus,
- EasywaveDaten
- weight: 40 g
- transmission range: 150 m in open field; up to approx. 30 m indoors
- transmission delay: 270 ms
- current consumption receiving: 3.2 mA
- current consumption transmitting: 4.7 mA

**Universal wireless one-channel dimmer, single-pole, for flush mounting**

The universal wireless one-channel dimmer (single-pole) is suitable for flush mounting and may only be used to wirelessly switch and dim lights up to a maximum of 250 W. You can also directly connect a fixed NO push button to this dimmer. With a wireless push button or a hand-held transmitter (one- or two-button control) connected to the dimmer, the lighting is always gradually switched on and off and dimmed up and down. To switch or to dim the lighting locally, you can also connect a fixed NO push button to the dimmer. The integrated electronic short-circuit, overload and overheating protection guarantees maximum safety during use. The dimmer may not be used to switch or to dim electric motors.

- dimensions: 25 x 48 x 48 mm (HxWxD)
- weight: 35 g
- frequency: 868.3 Mhz
- power supply voltage: 230 Vac, 50 Hz
- stand-by consumption: 0.7 W
- incandescent lamps: 7 – 250 W
- 230 V halogen lamps: 7 – 250 W
- dimmable economy lamps: 7 – 100 W
- dimmable LED lamps: 7 – 100 W
- ferromagnetic transformer: 20 – 250 VA
- toroidal core transformer: 20 – 250 VA
- electronic transformer: 7 – 250 W
- minimum load: 7 W
- maximum load: 250 W
- protection degree: IP20
- operating temperature: -20 – +60 °C
- quality mark: CE marked in compliance with EN 60669-2-1
- communication protocol: Easywave

**COMPLETE UNIT**

### Wireless one-channel receiver, for flush mounting

The wireless receiver with 230 V two-way contact (one channel) is suitable for flush mounting and may only be used as a wireless control in combination with small consumers. With this receiver, small consumers can be switched in three working modes (two modes for the on-off function and pulse mode). You can operate the receiver using either push buttons or hand-held transmitters.

- dimensions: 25 x 48 x 48 mm (HxWxD)
- frequency: 868.3 MHz
- power supply voltage: 230 Vac, 50 Hz
- stand-by consumption:  $\pm 0.8$  W
- output: potential-free relay contact (two-way switch)
- protection degree: IP20
- operating temperature: -20 – +60 °C
- quality mark: CE marked in compliance with EN 60669-2-1
- communication protocol: Easywave

### USB RF interface

The USB RF interface makes it possible to use Niko wireless Easywave controls (with the exception of the remote control 05-312) in the Niko Home Control installation for bus cabling.

This allows wireless controls to be installed:

- on surfaces unsuited to cabling (e.g. glass or concrete partitions)
- for the renovation of heritage-listed buildings
- for expansions of existing installations where drilling or channelling work is not permitted
- in office areas with movable partition walls
- when complex cabling is to be avoided.

NEW

The interface is shaped like a USB stick and can be connected to the connected controller (550-0000x) in the electrical cabinet, using the provided extension cable (3 m). The end of the extension cable is fitted with an assembly ring allowing the antennae to be attached to the outside of the electrical cabinet for optimal reception.

- one USB RF interface per installation
- for use with USB extension cable (3 m) provided
- input voltage: via USB port
- modulation: frequency shift
- usage frequency: 868.30 Mhz
- communication protocol: Easywave
- maximum radio frequency power of the Easywave signal: 5.85 dBm
- transmission range: max. 30 m indoors, 100 m in open spaces
- ambient temperature: 0 – +40 °C

#### COMPLETE UNIT

### Wireless 2-channel receiver for switching

This 2-channel receiver for DIN-rail mounting is controlled wirelessly via radio frequency. It has two, 16 A/230 V potential-free contacts and a connection for an external antenna (410-00359).

Each switch output can have 32 transmission codes linked to it.

The receiver can be controlled in on/off, pulse and dead man's switch modes.

The on/off mode also has two timer functions and a logic function.

- DIN dimensions: 2U
- Dimensions: 34.5 / 89.6 / 62.8 mm
- Communication protocol: Easywave 868.30 Mhz
- Input voltage: 230 V AC, 50 Hz
- Output: 2 potential-free relay contacts 16 A (normally open)
- Operating temperature: -20 – +45 °C
- Power consumption in stand-by: 0.4 W max. 1.2 W without load
- Weight: 108 g
- Protection degree: IP20

### Wireless 2-channel receiver for motor control

This 2-channel receiver for DIN-rail mounting is controlled wirelessly via radio frequency. It has 2 outputs, each with two 6 A/230 V changeover contacts and a connection for an external antenna (410-00359).

You use the module to open, close or stop roll-down shutters and venetian blinds. The terrace function makes it possible to lock the closing direction of one or more outputs, thereby preventing getting locked out unintentionally.

Technical specifications

- DIN dimensions: 2U
- Dimensions: 34.5 / 89.6 / 62.8 mm
- Communication protocol: Easywave 868.30 Mhz
- Input voltage: 230 V AC, 50 Hz
- Operating temperature: -20 °C – +45 °C
- Power consumption in stand-by: 0.4 W, 1 W switched (without load)

### External antenna for 05-35x

The external antenna is suitable for use with all modular wireless Niko receivers (868.3 MHz) and enables the reception of wireless signals in a metal electrical cabinet. The antenna is provided with a connection cable (3 m) and a connector.

To be used in combination with 05-336, 05-338, 05-350, 05-353

- communication protocol: Easywave

#### ACCESSORY

**05-309** Pieces: 5 External antenna with connector

NEW

### External antenna for 410-0035x

External antenna for wireless applications. Connectable to modules 410-00351 and 410-00352. The external antenna has a connection which makes reception in a metal cabinet possible. The connection cable of the external antenna is 3 meters long.

- Communication protocol: Easywave

#### COMPLETE UNIT

**410-00359** Pieces: 5 External antenna without connector for 410-00351 and 410-00352

### Diagnostic device

In complex or large installations, the diagnostic device (9 V block battery not supplied) helps you to determine in advance whether the wireless applications can be used or not. The device will determine the wireless signal strength in a given area and recognise all 868.3 MHz signals. Nine indication LEDs will display the reception quality of the transmission signal or the strength of the interference signals present. This way you can check if the range of the wireless transmitter is sufficient.

- communication protocol: Easywave

## Chapter 4

# Switching material and socket outlets

- 4.A Flush-mounting switching material
- 4.B Flush-mounting socket outlets
- 4.C Media network
- 4.D Niko surface-mounting kit
- 4.E Niko Hydro
- 4.F Trunking systems

# Flush-mounting switching material and socket outlets

The Niko switches and socket outlets set the standard and are of ultra-reliable quality. They are long lasting, robust and easy to install. We design and produce all our materials to last at least 30 years, even when exposed to extreme loads.

## ADVANTAGES

### Universal mechanism

- 3 mounting steps: mechanism + finishing set + faceplate
- one universal mechanism for Niko Original, Niko Intense and Niko Pure: install the function today, add the finishing set and faceplate later
- ultra-solid, unbreakable and untearable metal frame
- fast and reliable screw or plug-in terminals
- for claw or screw fixation
- terminal capacity: 2 x 2,5mm<sup>2</sup> / terminal

### Fast and easily installed

- all terminals are located at the top of the base
- you strip and cut all wires equally in one go
- you have more room to fold the wires and to place the mechanism inside the flush-mounting box
- wiring diagram, switching symbol and terminal identification in indelible ink
- the stripping length is easy to measure on the base

### Perfect coupling

- vertical, centre distance 71 or 60 mm: easy to slide
- vertical, centre distance 71 mm: folding zones at the bottom to connect the next frame
- horizontal: upright folded dovetails for perfect positioning
- multiple mounting options: claws, banana-shaped screw holes, panel screw holes

### Limited flush-mounting depth

- more room for the connection inside the flush-mounting box
- switch: 18 mm
- socket outlet: 21 or 28.5 mm

4.A

4.B

4.C

4.D

4.E

4.F

#### Optional solid metal claws

- large standard gripping depth: 31 mm
- stay in place during mounting
- can be firmly tightened: the mechanisms don't get skewed and cannot be torn out of the wall
- easily replaced by long claws
- easily removed to mount in flush-mounting boxes for hollow walls

#### LED lighting elements

- automatic connection makes direct contact thanks to simple clicking system
- also available with wire connection

Niko's finishings are distinguished by their **quick and easy assembly**. Only 3 stages of assembly saves time. Is the wall not quite flat? No problem, as the faceplate is **height adjustable** in each of the corners.

The Niko product range evolves constantly. Would you like to know if a function is available in Niko Pure, Niko Intense or Niko Original? Take a look at [www.niko.eu](http://www.niko.eu) and discover the possibilities, colours and materials.

NEW

### Digital black, connected customisable control screen, 230 V

The Digital black is a completely customisable touchscreen which has an extremely user-friendly interface with clear symbols. The screen is automatically activated when your hand comes near. When there is no Niko Home Control installation available, the built-in switching contact can be controlled via the touchscreen or an N.O. push button extension (170-00005). When the connection to a Niko Home Control installation has been made, it becomes possible to switch or dim your lights, set moods, set ventilation modes, adjust blinds and sunblinds to the desired position, in one operation. In short, all possible types of controls are available in your Niko Home Control installation. Do you have a Niko Home Control thermostat (550-1305x) or an active connection with one of our heating partners? Then you can easily set the temperature with the Digital black. With the corresponding Niko Home app not only can you choose which controls are displayed or where they are displayed on the screen, but also the way you navigate through your control screens. You can download this app for free in the respective app store for your mobile device.

The Digital black can be easily mounted in any standard flush-mounting box using the familiar claw or screw fixing and is powered on 230 V AC (L- + N-wire required). This 230 V AC variant is equipped with a switching contact 10 A (resistive), meaning that it can easily be replaced with a conventional single-pole switch. In combination with the wireless smart hub for Niko Home Control (552-00001) and additional controls from the Niko Home Control range for traditional wiring, you can easily add automation to your conventional installation.

The screen communicates via your wireless home network with the rest of your Niko Home Control system. You need an active internet connection to activate the Digital black. This internet connection ensures that your Digital black and Niko Home Control installation are always up-to-date and have the most recent functionalities.

- recommended mounting height: 110 - 160 cm
- power supply voltage: 230 V AC  $\pm$  10 %, 50 Hz (L- + N-wire required)
- Wi-Fi: 2.4 GHz bgn (HT20)
- ambient temperature: 0 - 40 °C
- proximity sensor: 0 – 30 cm
- light sensor for automatic adjustment of the screen intensity
- Maximum number of Digital blacks per installation: 20
- screen size: 3.6"
- screen resolution: 1024 x 768 pixels
- display dimensions: 83 x 83 x 11.3 mm (HxWxD)
- dimensions flush-mounting mechanism: 75 x 70 x 31.5 mm (HxWxD)
- protection degree: IP40
- CE marked

#### COMPLETE UNIT

<b>551-18000</b>	Pieces: 1	With screw terminals and claw fixing
<b>551-18001</b>	Pieces: 1	With screw terminals and screw fixing

Flush surround plates to be ordered separately.  
Product drawings purely illustrative.

## Single-pole switch

10 A  
250 Vac

## BASE

	<b>170-01105</b>	Pieces: 10	With plug-in terminals, for claw fixing
	<b>170-01115</b>	Pieces: 10	With plug-in terminals, for screw fixing
	<b>170-01100</b>	Pieces: 10	With screw terminals, for claw fixing
	<b>170-01101</b>	Pieces: 10	With screw terminals, for screw fixing
	<b>170-71105</b>	Pieces: 10	With plug-in terminals, for claw fixing (centre distance: 71 mm)
	<b>170-71115</b>	Pieces: 10	With plug-in terminals, for screw fixing (centre distance: 71 mm)
	<b>170-71100</b>	Pieces: 10	With screw terminals, for claw fixing (centre distance: 71 mm)
	<b>170-71101</b>	Pieces: 10	With screw terminals, for screw fixing (centre distance: 71 mm)

## FINISHING SET

**Roll-down shutter switch, electrically separated**

This switch is used for controlling the motors of roll-down shutters, garage ports, venetian blinds and awnings via a bistable control (selection rotary direction-START-STOP). Select the rotary direction on the right-hand key and subsequently press 'START' to activate the motor. No need to stay near the switch while the motor is running to the end-run position. To change the rotary direction, first press 'STOP' at the top of the left-hand key, then select the new rotary direction on the right-hand key and subsequently press 'START' at the bottom of the left-hand key. This control is suitable for motors whose rotary direction is not to be changed frequently, and that does not require you to wait until the motor has reached its end-run position. This type of switch allows the motor capacitors to discharge, avoiding the end-run switches to stick.

## Roll-down shutter push button, electrically separated

This push button is used for controlling the motors of roll-down shutters, garage ports, venetian blinds and awnings. Press the push button to activate the selected rotary direction. Upon releasing the push button, the motor will stop running (monostable). Keep pressing the push button until you have reached the position of your choice. The motor control switch (170-0590X), on the other hand, does not require you to wait until the end-run position has been reached.

## Electronic thermostat

Two-point control for central heating, electric heating or air conditioning.

- power supply voltage: 230 Vac, 50 Hz
- two operating modes: heating and air conditioning
- three-position switch: on (day setting), eco (night setting) and off (standby)
- adjustment range: 5 - 30 °C (adjustable)
- programming precision:  $\pm 1$  °C
- hysteresis: 1 °C
- mounting height: 1.5 m
- two-way contact: 8 A (potential-free)

## Speed regulator for motors (ventilation)

- only to be used with electronic precharge 09-016-10
- built-in two-way switch
- power supply voltage: 230 Vac  $\pm$  10%, 40 - 60 Hz
- maximum load: 200 VA
- minimum load: 20 W
- minimum rotational speed adjustable
- thermal overload protection without reset function
- short-circuit protection via fuse (F 3.15 AH)
- built-in spare fuse
- connection terminals: 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- ambient temperature: 20 °C

## Led lighting elements

The LED lighting element with automatic connection has a signalling function when combined with a single-pole switch, a two-way or intermediate switch, an NO push button or an NO or NC push button.

In combination with a two-pole switch, this LED lighting element with automatic connection has a control function.

### LED LIGHTING ELEMENTS SPECIFICALLY FOR SWITCHES WITH PLUG-IN TERMINALS (NOT FOR NIKO HYDRO)

	<b>170-77023</b>	Pieces: 10	With automatic connection, white, 230 Vac

### E10 lamps for 6 A push buttons

#### ACCESSORY

**170-37001** Pieces: 10 With amber 230 Vac LED

**170-37002** Pieces: 10 With blue 230 Vac LED

**170-37003** Pieces: 10 With red 230 Vac LED

### Long claw

#### ACCESSORY

**170-71003** Pieces: 20 For switches and socket outlets

### Claws

Set of claws, screws and nuts to switch from screw fixing to claw fixing. The set is suitable for 50 bases.

#### ACCESSORY

**170-71005** Pieces: 100 For switches

**170-71006** Pieces: 100 For socket outlets with screw terminals

**170-71007** Pieces: 100 For socket outlets with plug-in terminals

**170-71008** Pieces: 100 For 45 x 45 mm functions (RJ45, TV ...)

### Label holder

The label holder is used for labelling, for example, switching material. It can be repositioned at another location and can be combined with all functions and the three series of faceplates (Niko Pure, Niko Intense and Niko Original). The label holder can be positioned left, right, at the bottom or at the top, and remains in position when removing the faceplate, e.g. for paintwork or cleaning.

- maximum label dimensions: 6 x 42 mm

- maximum text size: Arial 16 pt

#### ACCESSORY

**170-00096** Pieces: 50 Label holder

## Protective cap for paintwork

The protective cap is always placed over a mechanism equipped with a finishing set. It is suitable for the Niko Pure, Niko Intense and Niko Original series.

### ACCESSORY

**170-00099** Pieces: 100 Protective cap for paintwork

## Surface-mounting boxes

These surface-mounting boxes are suitable for all flush-mounting devices from the Niko Original series (except for the time switches). They are mounted directly on the wall (screws supplied).

### SINGLE SURFACE-MOUNTING BOX

**100-77100** Pieces: 10

**101-77100** Pieces: 10

**102-77100** Pieces: 10

### Electronic precharge

The electronic precharge replaces the classic ohmic load and can be easily flush mounted due to the extremely compact housing made of heat-resistant, thermoplastic material. It is safe in all flush-mounting circumstances due to a heating of merely 35 °C higher than the ambient temperature. The electronic precharge is up to 56% cooler than the normal solutions based on resistances (54% energy-saving compared to the classic ohmic load). It has to be connected in parallel to the primary circuit of the load.

- dimensions: 65 x 48 x 28 mm (HxWxD)
- weight: 0.270 kg
- ambient temperature: max. 40 °C

#### ACCESSORY

**09-016-10** Pieces: 6 Electronic precharge

NEW

**Connected switching socket outlet for Niko Home Control with pin earthing and shutters, Zigbee®**

With this connected switching socket outlet with built-in consumption measurement, you choose extra comfort, peace of mind and energy awareness. The socket outlet can be perfectly installed in all new construction projects and can also easily replace an existing socket outlet in renovation projects (provided that appropriate wall mounting boxes are present) without adapting the wiring or circuit breakers. You connect the socket outlet without additional wiring with a wireless switch and the wireless smart hub (552-00001) for Niko Home Control. That way you have full control over your socket outlets and you can easily create useful new functionalities, including all-off or all-on and panic functions, routines, calendar and scheduling functions, remote control via the app, insight in your energy consumption, consumption warnings on your smartphone, starting automatic actions when a consumption energy level is exceeded ...

- base for flush-mounting: flush-mounting depth 32,4 mm
- connection: plug-in terminals (3 x 2 x 2.5 mm<sup>2</sup>) with unlocking system
- input voltage: 230 Vac ± 10 %, 50 Hz
- standby consumption: 0.15 W
- ambient temperature: 0 - 40 °C
- protection degree: IP20-D
- marking: CE marked
- quality mark: CEBEC, NF
- maximum load: 16 A / 3680 W
- internal overcurrent protection: switches off at > 16 A
- internal overheating protection
- communication protocol: Zigbee® 3.0, 2.4 GHz
- Button on the device to switch the phase (L) on and off locally
- LED indicator for status and error information
- measuring precision: ± 0,5 W (1 - 5W), ± 5 % (5 - 3680 W). Valid for a normal voltage (230 Vac). This device should not be used for billing purposes. The data recorded by this device should be used for information purposes only.
- maximum per Niko Home Control installation: 25

### Connected switching socket outlet for Niko Home Control with side earthing and shutters, Zigbee®

With this connected switching socket outlet with built-in consumption measurement, you choose extra comfort, peace of mind and energy awareness. The socket outlet can be perfectly installed in all new construction projects and can also easily replace an existing socket outlet in renovation projects (provided that appropriate wall mounting boxes are present) without adapting the wiring or circuit breakers.

You connect the socket outlet without additional wiring with a wireless switch and the wireless smart hub (552-00001) for Niko Home Control. That way you have full control over your socket outlets and you can easily create useful new functionalities, including all-off or all-on and panic functions, routines, calendar and scheduling functions, remote control via the app, insight in your energy consumption, consumption warnings on your smartphone, starting automatic actions when a consumption energy level is exceeded ...

NEW

- flush-mounting depth: 35.5 mm
- connection: plug-in terminals (3 x 2 x 2.5 mm<sup>2</sup>) with unlocking system
- suitable for standard flush-mounting boxes (min. depth: 50 mm)
- input voltage: 230 Vac ± 10 %, 50 Hz
- standby consumption: 0.15 W
- ambient temperature: 0 - 40 °C
- protection degree: IP20-D
- marking: CE marked
- maximum load: 16 A / 3680 W
- internal overcurrent protection: switches off at > 16 A
- internal overheating protection
- communication protocol: Zigbee® 3.0, 2.4 GHz
- Button on the device to switch the phase (L) on and off locally
- LED indicator for status and error information
- measuring precision: ± 0,5 W (1 - 5W), ± 5 % (5 - 3680 W). Valid for a normal voltage (230 Vac). This device should not be used for billing purposes. The data recorded by this device should be used for information purposes only.
- maximum per Niko Home Control installation: 25

### Socket outlet with side earthing, shutters and overvoltage protection

This socket outlet is used to protect sensitive electronic equipment (e.g. TV, hi-fi, pc, washing machines, dishwashers and medical equipment) against voltage peaks on the mains due to mains failure or indirect lightning strokes. It does not protect against voltage peaks entering the equipment via other ways (e.g. cable distribution, data lines and telephone lines). The socket outlet exclusively protects the connected device within the technical specifications as described below. The socket outlet carries the CEBEC quality mark in accordance with the IEC61643-1 and EN61643-11 standards (class III, type 3). The varistors that limit the voltage between the phase (L) and zero conductor (N) are thermally monitored. If the red LED lights up, the protection is no longer functioning (the protected device remains connected to the mains) and the overvoltage module needs to be replaced.

- nominal voltage: 250 Vac
- nominal current: 16 A
- overvoltage limitation (Up) (L-L/L-PE): 1.5 kV
- maximum peak voltage (Uoc): 4 kV
- flush-mounting depth: 38.5 mm
- suitable for flush-mounting boxes with a flush-mounting depth of 50 mm
- short-circuit current (Icc): 1.5 kA
- ambient temperature : -5 - 40 °C

### Double smart USB-A and USB-C charger 3.5 A

This smart USB charger charges one or two mobile devices, such as mobile telephones, tablets, cameras, MP3 players and navigational devices. The devices must be suitable for charging via a USB-A or USB-C port.

The “smart” functionality ensures that the mobile device is charged in the fastest way possible (dynamic device recognition).

The current is divided over both outputs and amounts to 3.5 A maximum over both outputs combined. The maximum current amounts to 3.5 A on the individual output. When both outputs are used simultaneously, the available current will be divided. 5,0 V is delivered per output. The power depends on the current and voltage and amounts to 17.5 W maximum on both outputs combined.

- mounting: flush-mounting box with flush-mounting depth of minimum 50 mm
- power supply voltage: 100 – 230 V AC  $\pm$  10%, 50 – 60 Hz
- maximum power consumption: 200 mA (230 V AC)
- stand-by consumption: < 100 mW (230 V AC)
- output voltage: 5 V DC  $\pm$  5%
- double USB 3.0 connection: type A and type C
- maximum output current: 3500 mA at Ta 35 °C
- connection terminals: 2 (maximum capacity per screw terminal: 2 x 2.5 mm<sup>2</sup>)
- overvoltage category III
- charging behaviour in compliance with IEC62694
- CE marked
- USB C ready, if the correct cable is used
- dynamic device recognition

# Media network

Keep your home up to date by adapting optimally to your devices, such as TV's, radio's, tablets or smartphones. Niko's data solutions are an ideal way to adapt your home to every phase of your life and to your own lifestyle.

## ADVANTAGES

### Large range of data connections

- total flexibility: every type of data connection is supported
- independent of the cable operator
- connect without tools
- connectors consist of 1 piece, with limited depth
- cable connection possible from above
- wide range of choices in RJ45 connectors:
  - Cat. 5E: 1000 Mbit/s, 100 MHz, 1 Gb, max. 100 meter
  - Cat. 6: 1000 Mbit/s, 250 MHz, 1-10 Gb, max. 100 meter (max. 55 meter for 10 Gb network)
  - Cat. 6A: 10,000 Mbit/s, 500 MHz, 10 Gb, max. 100 meter
  - choose between unshielded or shielded twisted pair connectors
  - single or double RJ45 connection
  - single connection also available in combination with coax TV connection

### Future proof

- RJ45 category 6A for high-demanding home networks
- coax connection with a bandwidth of 2 GHz
- smart USB-charger available with 2 USB-A or USB-A and USB-C ports (see chapter flush-mounted switching material and socket outlets)

### Timeless design

- compatible with Niko Pure, Niko Intense and Niko Original

## Hdmi connection

For concealing HDMI cables in the wall or in TV and office furniture. Two socket outlets with HDMI-HDMI connection are used to join the cable in an item of furniture or in a false wall without conduit. If a conduit is present (for example, in a masonry wall), one side of the HDMI connector is connected to a socket outlet with HDMI-HDMI connection and the other side is cut off, pulled through the conduit and attached to the screw connector of the socket outlet with HDMI-screw connection.

- mounting: flush-mounting box with a minimum flush-mounting depth of 60 mm
- cable: with angular HDMI connector
- HDMI connection: type A, female
- screw connection: removable screw connector; 2 x 10 connection terminals
- cable housing and heat shrink tubing included

### ADAPTERS FOR OBLIQUE FINISHING SETS FOR NIKO 650-450XX, DOUBLE

**170-65904** Pieces: 10 Double adapter angled 9.4

### ADAPTERS FOR OBLIQUE FINISHING SETS FOR NIKO 02-399-XX, DOUBLE

**170-65404** Pieces: 10 Double adapter angled 4.4

# Niko surface-mounting kit

Building and renovation projects can be finished a lot faster thanks to the surface-mounting kit. In combination with Niko's flush-mounting functions, this kit is the ideal surface-mounting solution.

## ADVANTAGES

### Easy

- only 4 reference codes
- simple and double version
- available in cream and white
- horizontal and vertical mounting possible
- no need for a separate mounting plate

### Functional

- extended possibilities: combine with the complete range of flush-mounting functions
- quick and easy mounting and wiring
  - suitable for mounting on every surface
  - limit-sized flush-mounting boxes offer large wiring space
  - perfect finish when mounted on baseboards and frames thanks to easily removable break-out ports
  - suitable for connection of cables and tubes via the optional metrical tube entries

### Elegant

- beautiful design aligned with Niko Original and Niko Intense
- perfectly suits your living environment

### Sustainable quality

- shape-keeping plastic pc/asa
- condensation waterproof (IP21)
- impact resistant: IK06

# Niko Hydro

Niko Hydro has been specially created for challenging and wet environments. The full range is also available in white or black. In this way, Niko delivers on the latest trend for black and white façades.

## ADVANTAGES

### Easy and fast

- mechanism surface-mounting = mechanism flush-mounting
  - the familiar way of working
  - time-saving
  - limited mounting depth = more room for wiring
- heightened surface-mounting box
  - the wiring stays in the surface-mounting box underneath the base
  - the clicked-on mechanism is not pushed out
  - hands-free mounting of the hinged lid
- available with screw terminals and plug-in terminals

### Reliable

- splashproof: IP55
- impact resistant: IK07
- high-chemical resistance
- unlosable screws
- the mechanism is attached to the hinged lid at delivery

### Aesthetic

- beautiful flush-mounting solution for brickwork and panels
- membrane entries for the single and double surface-mounting box
- sober and subtle design
- full product range in grey, black and white: integrates harmoniously into the surroundings
- colour proof: colour in the mass

### Functional

- adapter frame to connect 45 x 45 mm Niko data modules, telephone socket outlets, audio connections and TV socket outlets
- switches 16 A, led signalling device, bicycle charging station, key switch etc.

### Garden post with socket outlet 16 A/250 Vac, side earthing and spike

The garden post includes one to three socket outlets (16 A/250 Vac) with side earthing, shutters and plug-in terminals. The garden post has an IP55 protection degree and is equipped with a spike that needs to be driven directly into the earth. Its functional and beautiful design makes the garden post a perfect fit for outdoor areas, such as on terraces and in outdoor kitchens. Moreover, the entire unit is splashproof, which makes it extremely well-suited for use in damp areas and demanding environments.

- spike included
- input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- material: stainless steel
- dimensions: (1-fold) 240 x 83 x 68 mm (HxWxD)
- dimensions: (2-fold) 347 x 83 x 68 mm (HxWxD)
- dimensions: (3-fold) 422 x 83 x 68 mm (HxWxD)
- dimensions spike: 250 x 100 x 80 mm (HxWxD)

The garden post includes one to three socket outlets (16 A/250 Vac) with pin earthing, shutters and plug-in terminals. The garden post has an IP55 protection degree and is equipped with a baseplate for installation on a solid surface. Its functional and beautiful design makes the garden post a perfect fit for outdoor areas, such as on terraces and in outdoor kitchens. Moreover, the entire unit is splashproof, which makes it extremely well-suited for use in damp areas and demanding environments.

- baseplate included
- input voltage: 230 Vac ± 10 %, 50 Hz
- material: stainless steel
- dimensions: (1-fold) 240 x 83 x 68 mm (HxWxD)
- dimensions: (2-fold) 347 x 83 x 68 mm (HxWxD)
- dimensions: (3-fold) 422 x 83 x 68 mm (HxWxD)
- dimensions baseplate: 150 x 150 mm

### Garden post with spike for Niko Hydro functions

The garden post can hold one to three Niko Hydro functions of your choice. The garden post has an IP55 protection degree and is equipped with a spike that needs to be driven directly into the earth. Its functional and beautiful design makes the garden post a perfect fit for outdoor areas, such as on terraces and in outdoor kitchens. Moreover, the entire unit is splashproof, which makes it extremely well-suited for use in damp areas and demanding environments. Please note that the adapter frame xxx-85000 must be used to build 45 x 45 mm functions, such as data modules, telephone sockets, audio connections and TV/FM sockets, into the garden post.

- spike included
- input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- material: stainless steel
- dimensions: (1-fold) 240 x 83 x 68 mm (HxWxD)
- dimensions: (2-fold) 347 x 83 x 68 mm (HxWxD)
- dimensions: (3-fold) 422 x 83 x 68 mm (HxWxD)
- dimensions spike: 250 x 100 x 80 mm (HxWxD)

# Trunking systems

Integrating cables in an interior without channelling or drilling? With Niko's trunking system you can deliver a clean, seamless finish that is easy and quick to install.

## ADVANTAGES

### Compact

- limited number of products
- full solution for every location

### Flexible

- suitable for horizontal and vertical mounting
- suitable for mounting on laboratory tables

### Easy mounting

- 1 installer can do the job
- the base plate has a drill guidance every 25 cm
- large wiring capacity
- socket outlets and data outlets are directly clicked onto the duct
- robust and solid thanks to the double-walled concept
- a raised frame enables additional cable capacity in single and double ducts
- perfect separation between high and low-voltage currents

### Sustainable quality

- material: PVC
- RAL 9010, coloured in the mass
- protection degree: IP40
- impact resistance: IK07

### Outdoor motion detector, 200°, 230 V, 11 m

This 1-channel outdoor motion detector is suitable for use in a driveway or garden. The detection range is 12 metres. The detection area can be divided using an adjustable cover mask. The motion sensor can be horizontally aimed. The device has a built-in light sensor and switches the lighting on automatically or manually with an NC push button (to be ordered separately). After the pre-set time delay, the light is switched off automatically.

- Dimensions (HxWxD): 70 x 100 x 100 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 1000 W
  - Maximum load fluorescent lamps ( $\cos\phi \geq 0,5$ ): 500 VA
  - Maximum load low voltage halogen lamps: 500 W
- Maximum load economy lamps (CFLi): 100 W
- Maximum load LED lamps 230 V: 100 W
- Detection angle: 200°
- Light intensity range: 5 lux – 1000 lux
- Switch-off delay: pulse, 30 s – 15 min
- Protection degree: IP44
- Mounting height: 2 – 4 m
- Ambient temperature: -20 – +55 °C

**351-03170: Available until the end of the second quarter of 2022 and afterwards until the end of stock.**

#### COMPLETE UNIT

**351-03160** Pieces: 1 Detector, white

**351-03165** Pieces: 1 Detector, black

**351-03170** Pieces: 1 Detector, alu

### Outdoor motion detector 140° 230 V AC, 12 m

This outdoor motion detector is suitable for use in a driveway or garden. The detection range is 12 metres. The detection area can be divided using an adjustable cover mask. The motion sensor can be horizontally aimed. The device has a built-in light sensor and switches the lighting on automatically or manually with an NC push button (to be ordered separately). After the pre-set time delay, the light is switched off automatically.

- Dimensions (HxWxD): 70 x 100 x 100 mm
- Dimensions visible (HxWxD): 70 x 100 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 – 60 Hz
- Number of channels: 1 channel
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 1000 W
  - Maximum load low voltage halogen lamps: 500 W
  - Maximum load economy lamps (CFLi): 100 W
  - Maximum load LED lamps 230 V: 100 W
- Detection angle: 140°
- Detection range (PIR): half circle, up to 11 m in diameter from a height of 3 m
- Response value luminosity: 5 lux – 1000 lux
- Switch-off delay: 30 s – 15 min
- Protection degree: IP44
- Mounting height: 2 – 4 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +55 °C

**Available until the end of the second quarter of 2022 and afterwards until the end of stock.**

#### COMPLETE UNIT

**351-03140** Pieces: 1 Detector, white

**351-03145** Pieces: 1 Detector, black

### Outdoor motion detector Swiss Garde 200°, 230 V, 14 m

This outdoor motion detector with a detection range of 14 metres is suitable for use along driveways, under carports or in the garden. The motion detector can be mounted onto the ceiling or the wall and can be aimed upwards, downwards, left and right. The device has a built-in light sensor and switches the lighting automatically. After the pre-set time delay, the light is switched off automatically. The detector can be configured both manually and by remote control.

- Dimensions (HxWxD): 74 x 70 x 106 mm
- Dimensions visible (HxWxD): 74 x 70 x 106 mm
- Input voltage: 230 Vac ± 10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1150 W
  - Maximum load economy lamps (CFLi): 350 W
- Maximum load LED lamps 230 V: 350 W
- Detection angle: 200°
- Detection range (PIR): up to 14 m in diameter from a height of 3 m
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: pulse, 10 s – 20 min
- Protection degree: IP55
- Mounting height: 2 – 8 m
- Mounting method: surface-mounting
- Ambient temperature: -30 – +55 °C

### Outdoor motion detector, 180°, 230 V, 16 m

The outdoor motion detector with one channel to be surface mounted on a wall or partition is suitable for use on driveways and in gardens. Equipped with an integrated light sensor. Automatic on/off (after switch-off delay) or manual on/off via an NC push button (to be ordered separately). The detection area can be divided by means of an adjustable cover mask. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 125 x 72 x 63 mm
- Dimensions visible (HxWxD): 125 x 72 x 63 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), light-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 180°
- Detection range (PIR): up to 16 m in diameter from a height of 3 m
- Light intensity range: 5 –  $\infty$  lux
- Switch-off delay: 8 s – 30 min
- Protection degree: IP54
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), light-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 180°
- Detection range (PIR): up to 13 m in diameter from a height of 3 m
- Light intensity range: 5 –  $\infty$  lux
- Switch-off delay: 8 s – 30 min
- Protection degree: IP54
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

#### COMPLETE UNIT

**350-20158** Pieces: 1 Detector

### Outdoor motion detector, 180°, 230 V, 16 m, with orientable lens

One-channel outdoor motion detector for use along driveways, in gardens, ... Provided with an integrated light sensor. Automatically on or manually on via a NC push button (230 V) (to be ordered separately). Automatically off after switch-off delay. Provided with a rotatable motion sensor. The detection area can be subdivided by means of an adjustable cover mask. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 70 x 90 x 130 mm
- Dimensions visible (HxWxD): 70 x 90 x 130 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), light- and motion-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 80 A/20 ms
- Detection angle: 180°
- Detection range (PIR): up to 16 m in diameter from a height of 3 m
- Light intensity range: 5 –  $\infty$  lux
- Switch-off delay: 8 s – 30 min
- Protection degree: IP54
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

### Swiss Garde outdoor motion detector, 120°, 230 V, 16 m

This outdoor motion detector, which is not activated by pets, is perfectly suitable for every detection around the house. The detection range is 16 meters. The motion sensor can be precisely aimed, both horizontally (left, right) and vertically (high, low). The device has a built-in light sensor and switches the lighting on automatically or manually with a N.O. push button (to be ordered separately). After the pre-set time delay, the light is switched off automatically. This detector can be configured both manually and by remote control.

- Dimensions (HxWxD): 112 x 105 x 148 mm
- Dimensions visible (HxWxD): 112 x 105 x 148 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO 8.7 A
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2000 W
  - Maximum load low voltage halogen lamps: 1000 W
  - Maximum load economy lamps (CFLi): 300 W
- Maximum load LED lamps 230 V: 300 W
- Detection angle: 120°
- Detection range (PIR): up to 16 m in diameter from a height of 3 m
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: pulse, 10 s – 20 m
- Protection degree: IP54
- Mounting height: 2 – 5 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

**Available until the end of the second quarter of 2022 and afterwards until the end of stock.**

### Twilight switch, 230 V, one channel, 10 A, 2 - 200 lux

Twilight switch for outdoor wall mounting (IP54). Suitable for switching outdoor lighting. Large sensor surface for accurate light measuring. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 103 x 73 x 47 mm
- Dimensions visible (HxWxD): 103 x 73 x 47 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 3000 W
  - Maximum load low voltage halogen lamps: 500 W
  - Maximum load economy lamps (CFLi): 350 W
- Maximum load LED lamps 230 V: 350 W
- Maximum load low-pressure sodium/mercury lamps: 1500 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Light intensity range: 2 lux – 200 lux
- Protection degree: IP54
- Mounting method: surface-mounting
- Ambient temperature: -50 – +50 °C

#### COMPLETE UNIT

**350-10030** Pieces: 1 Twilight switch

**Twilight switch, 230 V, one channel, 16 A, 3 - 300 lux**

The twilight switch for outdoor wall mounting is suitable for controlling outdoor lighting (gardens, car parks, outdoor areas and footpaths). In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 95 x 68 x 38 mm
- Dimensions visible (HxWxD): 95 x 68 x 38 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO,  $\mu$ 16 A
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 500 W
- Maximum load economy lamps (CFLi): 350 W
- Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Light intensity range: 3 lux – 300 lux
- Protection degree: IP54
- Mounting method: surface-mounting
- Ambient temperature: -50 – +50 °C

**COMPLETE UNIT**

**350-10033** Pieces: 1 Twilight switch

**Twilight switch, 24 V, one channel (4 A)**

Twilight switch for outdoor wall mounting (IP54), suitable for switching outdoor lighting. Light sensitivity adjustable from 2 to 200 lux. Large sensor surface for accurate light measuring. In conformity with the European directive for EMC and safety EN60669-2-1.

- Input voltage: 24 Vac/Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Relay contact 1: NO (max.  $\mu$ 4 A), potential-free
- Light intensity range: 2 lux – 200 lux
- Protection degree: IP54
- Mounting method: surface-mounting
- Ambient temperature: -50 – +50 °C

**COMPLETE UNIT**

**350-10032** Pieces: 5 Twilight switch

**Daylight control module with twilight switch, 230 V, 3 - 300 lux**

Daylight control module with twilight switch is durable and functional. It is a complete set containing the daylight control module and twilight switch. The daylight control module is suitable for car parks, outdoor areas, footpaths... The lighting is switched on automatically once the light level is below the preset level (standard setting: 35 lux). In the morning the lighting switches off automatically once the set lux level is exceeded by 10 %. The lux level is easy to set using the potentiometer on the daylight control module. There is a double cable connecting the daylight control module and the twilight switch.

- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Relay contact 1: NO. (max.  $\mu$ 16 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 3000 W
  - Maximum load economy lamps (CFLi): 1000 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Light intensity range: 3 lux – 300 lux
- Ambient temperature: -5 – 50 °C

**COMPLETE UNIT**

**360-36194** Pieces: 1 Daylight control module

### Daylight control module with combination of light, movement and time

Energy-saving thanks to an optimum use of lighting. Modular lighting control to be used in combination with a photo cell and motion detector(s). Automatically switching on depending on the measured daylight level and motion detection. Automatically switching off in case of sufficient daylight or after a switch-off delay. Optional control via an NO push button (to be ordered separately). Suitable for indoor and outdoor applications.

- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- dimensions (2 DIN rail modules) (HxWxD): 90 x 35 x 55 mm
- relay contact: NO (max.  $\mu$ 10 A)
  - incandescent lamps: 2300 W
  - 230 V halogen lamps: 23300 W
  - all low-voltage halogen lamps: 1200 VA
  - fluorescent lamps (non-compensated): 1200 VA
  - maximum capacitive load: 140  $\mu$ F
- maximum switching current: 165 A/20 ms or 800 A/200  $\mu$ s
- secondary voltage: 24 Vdc  $\pm$  10%, max. 40 mA, no short circuit protection
- Light intensity range: 3 - 300 lux, 30 - 3 klux, 300 - 30 klux
- hysteresis on luminosity: + 10%
- switch-off delay: 0 - 60 min
- protection degree: IP20
- ambient temperature: 5 - +50 °C

### Universal remote control for smartphone

Niko has developed a universal remote control for all Niko detectors which can be adjusted remotely. It consists of 2 components:

- The free Niko detector tool app, to be downloaded on your smartphone or tablet (both iOS and Android).
- The universal remote control, to be connected to the audio input of your smartphone.

Advantages:

- You only need one remote control for all installed detectors.
- The app explains step by step how to program and control each detector.
- You can immediately test the detector while walking through the room.
- The difficult configurations (such as daylight control) can be saved, to prevent the loss of data.

For most new detectors you can choose between manual set-up or via remote control. The detector always makes use of the most recent settings. The app provides easy access to all product information.

Important points:

- Ensure that the sound volume of your smartphone is sufficiently loud.
- Operates with android version 4.4 and IOS v8 or higher.

**Wall motion detector, 180°, 230 V, 9 m**

This motion detector is used for LED, economy lamps, 230 V halogen lamps, low voltage halogen lamps and fluorescent lamps. For indoor use only.

- switch-off delay:  $\pm 1 - 30$  min
- Light intensity range:  $\pm 10 - 1000$  lux
- mounting height: 0.8 – 1.2 m
- relay contact : NO. (max  $\mu 10$  A)
  - incandescent lamps: 2300 W
  - 230 V halogen lamps: 2300 W
  - low-voltage halogen lamps: 500 VA
  - (non-compensated) fluorescent lamps: 500 VA
- LED lamps 230 V and economy lamps (CFLi): 350 W
- detection angle: horizontal 180°, vertical 60°
- detection range: 8 - 9 m
- connection terminals: 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- connection possibility for an external push button or switch
- may be used as master or as secondary detector in case of several detection points per lighting circuit

### Motion detector Swiss Garde 360°, 230 V, 26 m, for flush-mounting box

The motion detector with one channel for flush-mounting in ceilings is suitable for switching indoor lighting on and off. You can always activate the light with a NO push button (230 Vac) (to be ordered separately). The detector is equipped with an integrated light sensor.

- Dimensions (HxWxD): 105 x 105 x 86 mm
- Dimensions visible (HxWxD): 105 x 105 x 50 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load fluorescent lamps ( $\cos\phi \geq 0.5$ ): 1150 VA
  - Maximum load low voltage halogen lamps: 1150 W
  - Maximum load economy lamps (CFLi): 350 W
- Maximum load LED lamps 230 V: 350 W
- Detection angle: 360°
- Detection range (PIR): max. 26 m from 8 m height
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: pulse, 10 s – 20 min
- Protection degree: IP20
- Mounting height: 2 – 8 m
- Mounting method: flush-mounting or surface-mounting
- Ambient temperature: -20 – +40 °C

**Swiss Garde motion detector, 360°, 230 V, 26 m, for surface mounting, IP55**

The motion detector with one channel for surface mounting on ceilings is suitable for switching indoor lighting on and off. The detector is equipped with an integrated light sensor.

- Dimensions (HxWxD): 125 x 125 x 75 mm
- Dimensions visible (HxWxD): 125 x 125 x 75 mm
- Input voltage: 230 Vac ± 10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1150 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Detection angle: 360°
- Detection range (PIR): up to 26 m in diameter from a height of 8 m
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: pulse, 10 s – 20 min
- Protection degree: IP55
- Mounting height: 2 – 8 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +55 °C

**COMPLETE UNIT**

**351-25050** Pieces: 1 Detector

**ACCESSORY – UNIVERSAL REMOTE CONTROL**

**350-41936** Pieces: 1 Universal remote control for smartphone

**ACCESSORY – IR REMOTE CONTROL**

**Motion detector for corridors 360°, 230 V, 40 m, for flush-mounting box**

The one channel corridor motion detector is suitable for automatic indoor lighting control (on/off). It can be installed in a flush-mounting box in the ceiling. Flush-mounting box with springs and an IP54 surface-mounting box can be ordered separately. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 105 x 105 x 60 mm
- Dimensions visible (HxWxD): 105 x 105 x 38 mm
- Input voltage: 230 Vac ± 10 %, 50 Hz
- Maximum power consumption: 0.5 W
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), potential-free
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load fluorescent lamps ( $\cos\phi \geq 0.5$ ): 1200 VA
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 800 VA
- Maximum load LED lamps 230 V: 300 W
- Maximum load LED driver: 800 VA
- Maximum capacitive load: 140  $\mu$ F
- Detection angle: 360°
- Light intensity range: 10 lux – 2000 lux,  $\infty$
- Switch-off delay: pulse, 30 s – 30 min
- Protection degree: IP20
- Mounting height: 2 – 2.5 m
- Mounting method: flush-mounting box
- Ambient temperature: -20 – +40 °C

**COMPLETE UNIT**

**350-500111** Pieces: 1 Detector

**ACCESSORY – FLUSH-MOUNTING BOX WITH SPRING CLIPS**

### Motion detector high frequency, 360°, 230 V, 10 m, for flush-mounting

The HF motion detector with one channel for flush-mounting is suitable for switching indoor lighting on and off. You can always activate the light with a NO push button (230 Vac) (to be ordered separately). The detector is equipped with an integrated light sensor.

- Dimensions (HxWxD): 35 x 52 x 90 mm
- Dimensions visible (HxWxD): 35 x 52 x 90 mm
- Input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: 4.35 A
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 1000 W
  - Maximum load low voltage halogen lamps: 500 W
  - Maximum load economy lamps (CFLi): 100 W
- Maximum load LED lamps 230 V: 100 W
- Detection angle: 360°
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: 10 s – 5 min
- Protection degree: IP20
- Mounting height: 2 – 4 m
- Mounting method: flush-mounting
- Ambient temperature: -20 – +70 °C

### Universal remote control for smartphone

Niko has developed a universal remote control for all Niko detectors which can be adjusted remotely. It consists of 2 components:

- The free Niko detector tool app, to be downloaded on your smartphone or tablet (both iOS and Android).
- The universal remote control, to be connected to the audio input of your smartphone.

#### Advantages:

- You only need one remote control for all installed detectors.
- The app explains step by step how to program and control each detector.
- You can immediately test the detector while walking through the room.
- The difficult configurations (such as daylight control) can be saved, to prevent the loss of data.

For most new detectors you can choose between manual set-up or via remote control. The detector always makes use of the most recent settings. The app provides easy access to all product information.

#### Important points:

- Ensure that the sound volume of your smartphone is sufficiently loud.
- Operates with android version 4.4 and IOS v8 or higher.

**Mini presence detector, 360°, 230 V, 9 m, for flush mounting, IP65**

The mini presence detector with one channel and daylight control for flush mounting in ceilings is suitable for switching indoor lighting on and off. The mini detector is equipped with an integrated light sensor. Automatic on/off (presence detector). Thanks to its compact dimensions and design, the mini detector is discreetly present in the room. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 36 x 36 x 49.3 mm
- Dimensions visible (HxWxD): 36 x 36 x 13.3 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Number of channels: 1 channel
- Drill diameter: 30 mm
- Relay contact 1: NO. (max.  $\mu$ 10 A), light- and motion-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 500 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): 9.5 m from a height of 3 m
- Light intensity range: 20 lux – 1000 lux
- Switch-off delay: pulse, 2 min – 1 h
- Protection degree: IP65
- Mounting height: 2 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: -5 – +50 °C

**Presence detector dual tech, 360°, 230 V, 19 m, master, for flush-mounting box**

Intelligent presence detector for ceiling mounting in offices. Suitable for switching indoor lighting. Rapid detection of even the slightest movements, thanks to passive infrared (PIR) and ultrasonic (US) technology. Presence detection behind office partitions by means of US detection. Equipped with an integrated light sensor. For surface- or flush mounting.

- Dimensions (HxWxD): 120 x 120 x 60 mm
- Dimensions visible (HxWxD): 120 x 120 x 34 mm

### Presence detector dual tech, 360°, 230 V, 19 m, secondary, for flush-mounting box

Intelligent presence detector for ceiling mounting in offices. Suitable for switching indoor lighting. Fast detection, up to the slightest movements, by passive infrared technology (PIR) and ultrasonic technology (US). Presence detection behind office walls by means of US detection. Only operates in combination with master 350-20065. The detection area can be divided by means of an adjustable cover mask.

- Dimensions (HxWxD): 120 x 120 x 60 mm
- Dimensions visible (HxWxD): 120 x 120 x 34 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Detection angle: 360°
- Detection range (PIR): 9.5 m from a height of 3 m
- Detection range (US): 12 x 19 m
- Protection degree: IP20
- Mounting height: 2 – 3 m
- Mounting method: flush-mounting box
- Ambient temperature: 0 – +45 °C

#### COMPLETE UNIT

### Presence detector dual tech, 360°, 230 V, 40 m, for surface mounting, IP54

Stand-alone intelligent presence detector for ceiling mounting, ideal for offices. Suitable for switching indoor lighting. Rapid detection of even the slightest movements, thanks to passive infrared (PIR) and High Frequency (HF) technology. Presence detection behind office partitions by means of HF detection. The detector offers 5 possible combinations of the 2 technologies. Equipped with an integrated light sensor.

- Dimensions (HxWxD): 83 x 130 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO 8.7 A
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2000 W
  - Maximum load low voltage halogen lamps: 1000 W
  - Maximum load economy lamps (CFLi): 300 W
  - Maximum load LED lamps 230 V: 300 W
- Detection angle: 360°
- Detection range (PIR): up to 40 m in diameter from a height of 3 m
- Detection range (HF): up to 12 m in diameter from a height of 4 m
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: pulse, 10 s – 20 min
- Protection degree: IP54
- Mounting height: 2 – 4 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

### Flat presence or absence detector, 360°, master, 1 channel, 12 m, for flush mounting

1 channel detector for flush mounting in ceilings. Stand-alone or as master combinable with a maximum of 20 secondary detectors (350-41601). It can be easily installed and mounted thanks to spring clips. The detector has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. For use in small rooms, offices, storage spaces ... The detector can be used as a presence detector (automatic on/off) or absence detector (manual on/automatic off).

- Dimensions (HxWxD): 95 x 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Drill diameter: 77 mm
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): up to 12 m in diameter from a height of 3 m
- Light intensity range: 50 lux – 1000 lux
- Switch-off delay: 5 m – 1 h
- Protection degree: IP20
- Mounting height: 2,4 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: 5 – +40 °C

#### COMPLETE UNIT

### Flat presence or absence detector, 360°, secondary, 1 channel, 12 m, for flush mounting

This secondary detector operates in conjunction with references 350-41600, 350-41620.

Simple installation and easy mounting thanks to spring clips. The detector has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. The secondary detector follows the settings of the master.

- Dimensions (HxWxD): 95 x 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Drill diameter: 77 mm
- Detection angle: 360°
- Detection range (PIR): up to 12 m in diameter from a height of 3 m
- Protection degree: IP20
- Mounting height: 2,4 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: 5 – +40 °C

#### COMPLETE UNIT

**350-41601** Pieces: 1 Detector

**Flat presence or absence detector, 360°, master, with 2 potential-free contacts, 12 m, for flush mounting**

Stand-alone or as master combinable with a maximum of 20 secondary detectors (350-41601). The detector has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. It can be easily installed and mounted thanks to spring terminals. Particularly suitable for the switching of installations with 3 phases where the light circuits need to be distributed to several circuit breakers for safety reasons. For use in offices, schools, conference rooms. The two contacts are always controlled simultaneously.

- Dimensions (HxWxD): 95 x 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz

**350-41936** Pieces: 1 Universal remote control for smartphone

#### ACCESSORY – IR REMOTE CONTROL

**350-20057** Pieces: 1 IR remote control for installers

#### ACCESSORY – SURFACE-MOUNTING BOX

**390-20056** Pieces: 1 Mounting box

#### ACCESSORY – FLUSH-MOUNTING BOX FOR 350-20065 AND 351-20066

**390-20057** Pieces: 1 Flush-mounting box with spring terminals

**Presence or absence detector, 360°, master or stand-alone, 230 V, 1 channel, 14 m, for flush mounting**

The presence or absence detector with one channel for flush mounting in ceilings is suitable for switching the indoor lighting on and off. The detector is equipped with an integrated light sensor. Automatic on/off (presence detector) or manual on/automatic off (absence detector) via a NO push button (230 Vac) (to be ordered separately).

- Dimensions (HxWxD): 105 x 105 x 71 mm
- Dimensions visible (HxWxD): 105 x 105 x 35 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Number of channels: 1 channel
- Drill diameter: 48 mm
- Relay contact 1: NO 8.7 A
  - Maximum load incandescent and halogen lamps (cosφ=1): 2000 W
  - Maximum load low voltage halogen lamps: 1000 W
  - Maximum load economy lamps (CFLi): 300 W
- Maximum load LED lamps 230 V: 300 W
- Detection angle: 360 °
- Detection range (PIR): up to 14 m in diameter from a height of 3 m
- Light intensity range: 5 lux – 2000 lux
- Switch-off delay: 10 s – 20 m
- Protection degree: IP20
- Mounting height: 2 – 6 m
- Mounting method: flush-mounting
- Ambient temperature: -20 – +45 °C

**COMPLETE UNIT**

**351-25457** Pieces: 1 Detector

**ACCESSORY – UNIVERSAL REMOTE CONTROL**

**350-41936** Pieces: 1 Universal remote control for smartphone

**ACCESSORY – IR REMOTE CONTROL**

**351-25320** Pieces: 1 IR remote control for installers

**ACCESSORY – MINI REMOTE CONTROL FOR USERS**

**351-25310** Pieces: 1 IR remote control for users

**ACCESSORY – SURFACE-MOUNTING BOX**

**351-25420** Pieces: 1 Round surface-mounting box

**Presence or absence detector, 360°, secondary, 230 V, 14 m, for flush mounting**

The presence or absence detector for flush mounting in ceilings is suitable for switching the indoor lighting on and off. Automatic on/off (presence detector) or manual on/automatic off (absence detector). The detection area can be divided by means of an adjustable cover mask. Use exclusively in combination with a Master (351-25451/56/57/63/66/67).

- Dimensions (HxWxD): 105 x 105 x 71 mm
- Dimensions visible (HxWxD): 105 x 105 x 35 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Number of channels: 1 channel
- Drill diameter: 48 mm
- Detection angle: 360 °
- Detection range (PIR): up to 14 m in diameter from a height of 3 m
- Protection degree: IP20
- Mounting height: 2 – 6 m
- Mounting method: flush-mounting or surface-mounting
- Ambient temperature: -20 – +45 °C

### Presence or absence detector, 360°, 230 V, 24 m, master, one channel, for flush mounting

The presence or absence detector with one channel and daylight control for flush mounting in ceilings is suitable for switching indoor lighting on and off. The detector is equipped with an integrated light sensor. Automatic on/off (presence detector) or manual on/automatic off (absence detector). The detection area can be divided by means of an adjustable cover mask. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 100 x 100 x 73.4 mm
- Dimensions visible (HxWxD): 100 x 100 x 46.4 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), light- and motion-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
  - Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): circle, up to 24 m in diameter from a height of 3 m
- Light intensity range: 20 lux – 1000 lux,  $\infty$
- Switch-off delay: 2 m – 1 h
- Protection degree: IP54
- Mounting height: 2 – 3.4 m
- Mounting method: flush-mounting
- Ambient temperature: -5 – +50 °C

### Universal remote control for smartphone

Niko has developed a universal remote control for all Niko detectors which can be adjusted remotely. It consists of 2 components:

- The free Niko detector tool app, to be downloaded on your smartphone or tablet (both iOS and Android).
- The universal remote control, to be connected to the audio input of your smartphone.

#### Advantages:

- You only need one remote control for all installed detectors.
- The app explains step by step how to program and control each detector.
- You can immediately test the detector while walking through the room.
- The difficult configurations (such as daylight control) can be saved, to prevent the loss of data.

For most new detectors you can choose between manual set-up or via remote control. The detector always makes use of the most recent settings. The app provides easy access to all product information.

#### Important points:

- Ensure that the sound volume of your smartphone is sufficiently loud.
- Operates with android version 4.4 and IOS v8 or higher.

#### ACCESSORY – UNIVERSAL REMOTE CONTROL

**350-41936** Pieces: 1 Universal remote control for smartphone

**Presence detector, 360°, 230 V, 20 m, for surface mounting**

One-channel presence detector with daylight control for ceiling mounting, suitable for switching indoor lighting. Provided with an integrated light sensor. Automatically on/off (after switch-off delay) or manually on/off via NO push button (230 Vac) (to be ordered separately). The detection area can be subdivided by means of an adaptable cover mask. In conformity with the European directive for EMC and safety EN60669-2-1.

- Dimensions (HxWxD): 127 x 127 x 59 mm
- Dimensions visible (HxWxD): 127 x 127 x 59 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Number of channels: 1 channel
- Relay contact 1: NO. (max.  $\mu$ 10 A), light- and motion-sensitive
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
  - Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360 °
- Detection range (PIR): circle, up to 20 m in diameter from a height of 3 m
- Light intensity range: 10 lux – 1000 lux
- Switch-off delay: 1 m – 30 m
- Protection degree: IP20
- Mounting height: 2.5 – 3.4 m
- Mounting method: surface-mounting
- Ambient temperature: -5 – +50 °C

# DALI

**In this chapter:**

- DALI presence or absence detectors
- DALI multi-zone detectors
- DALI rotary dimmer
- DALI power supply, link module, relay module, push-button interface

Article number

Description

	350-41650	Flat presence or absence detector with 3 zone DALI daylight control and extra functionalities, 360°, 12 m, master or stand-alone, 360°, for flush mounting
	350-41657	Flat presence or absence detector with 3 zone DALI daylight control, 360°, 12 m, master, for flush mounting
	350-41659	Flat presence or absence detector with 3 zone DALI daylight control, 12 m, secondary, for flush mounting
	350-41680	Flat presence or absence detector with 3 zone DALI daylight control and extra functionalities, 360°, 12 m, master or stand-alone, for flush mounting, with EnOcean
	350-41750	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for flush mounting
	350-41752	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, secondary, for flush mounting
	350-41751	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for surface mounting
	350-41753	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, secondary, for surface mounting
	350-41760	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 32 m, master or stand-alone, for flush mounting in high ceilings
	350-41762	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 32 m, secondary, for flush mounting in high ceilings
	350-41761	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 32 m, master or stand-alone, for surface mounting on high ceilings
	350-41763	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 32 m, secondary, for surface mounting on high ceilings
	350-41780	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for flush mounting, with EnOcean
	350-41781	Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for surface mounting, with EnOcean
	350-70985	Compact power supply for DALI bus systems
	350-70021	DALI link module
	350-70020	DALI push-button interface
	350-70980	DALI relay module
	310-0210x	DALI rotary dimmer

### Flat presence or absence detector with 3 zone DALI daylight control and extra functionalities, 360°, 12 m, master or stand-alone, 360°, for flush mounting

Presence detector, DALI daylight control for flush mounting in ceilings of 2.4 - 3 m. Stand-alone or as master combinable with a maximum of 10 secondary detectors (350-41659). For use in offices, schools, conference rooms... in large and small spaces. The detector has a maximum of 3 daylight controlled zones, and an extra contact which can be used. It has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. Depending on the chosen application the lighting must always be switched on manually using a push button, and is automatically switched off if there is sufficient daylight or no one is in the room (absence detector). Or the lighting is switched on automatically when movement is registered and there is insufficient daylight. In this case, the lighting is also automatically switched off if there is sufficient daylight or no one is in the room (presence detector). The lighting remains on as long as the detector detects movement and the measured level of daylight is lower than the set value. The switch-off delay, the lux value at which the lighting must switch on and the sensitivity of the detector are easily set with the IR remote control for smartphone (optional)

- Dimensions (HxWxD): 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Drill diameter: 77 mm
- Relay contact 1: NO, (max.  $\mu$ 10 A), potential-free
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
- Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): up to 12 m in diameter from a height of 3 m
- Response value luminosity: 2 lux – 1000 lux
- Switch-off delay: 1 m – 2 h 46 m 39 s
- Protection degree: IP20
- Mounting height: 2.4 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: 5 – +40 °C

#### COMPLETE UNIT

**Flat presence or absence detector with 3 zone DALI daylight control, 360°, 12 m, master, for flush mounting**

Flat presence or absence detector, DALI daylight control for flush-mounting in ceilings of 2.4 - 3 m. Stand-alone or as master combinable with a maximum of 10 secondary detectors (350-41659). For use in offices, schools, conference rooms... in large and small spaces. The detector has a maximum of 3 daylight controlled zones and has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. The switch-off delay, the lux value at which the lighting must switch on and the sensitivity of the detector can easily set with the IR remote control (optional) or with the universal remote control for smartphone (optional).

- Dimensions (HxWxD): 95 x 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Drill diameter: 77 mm
- Detection angle: 360°
- Detection range (PIR): up to 12 m in diameter from a height of 3 m
- Response value luminosity: 10 lux – 1000 lux
- Switch-off delay: 5 m – 1 h
- Protection degree: IP20
- Mounting height: 2.4 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: 5 – +40 °C

**COMPLETE UNIT**

**350-41657** Pieces: 1 Detector

**ACCESSORY – IR REMOTE CONTROL**

**350-41935** Pieces: 1 IR remote control for users

**Flat presence or absence detector with 3 zone DALI daylight control, 12 m, secondary, for flush mounting**

This presence detector (DALI daylight control, secondary detector) is suitable for flush mounting in ceilings and can only be used in combination with the master (350-41657, 350-41650 and 350-41680) to increase its detection range. The detector has a very flat design of only 5 mm, so that it can be mounted almost flush with the ceiling. The device follows the settings of the master. The sensitivity of the secondary detector, though, can be set separately. A maximum of ten secondary detectors can be connected per master.

- Dimensions (HxWxD): 95 x 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Drill diameter: 77 mm
- Detection angle: 360°
- Detection range (PIR): up to 12 m in diameter from a height of 3 m
- Protection degree: IP20
- Mounting height: 2.4 – 3 m
- Mounting method: flush-mounting
- Ambient temperature: 5 – +40 °C

### Flat presence or absence detector with 3 zone DALI daylight control and extra functionalities, 360°, 12 m, master or stand-alone, for flush mounting, with EnOcean

The 360° DALI presence detector is suitable for the control of DALI devices in a maximum of 3 daylight zones. Depending on the incoming daylight, the light intensity of each zone will be adjusted separately. The detector can also control, switch on and off or dim one or two secondary zones (depending on the selected settings). The detector is designed for indoor applications and has an integrated light sensor. It is suitable for use in offices, schools and public buildings and can be used in both large and small rooms. The device also has an integrated relay for controlling either lighting or ventilation (to be ordered separately). The detector is equipped with an integrated EnOcean receiver, enabling wireless control with EnOcean transmitters.

- Dimensions (HxWxD): 95 x 95 mm
- Dimensions visible (HxWxD): 95 x 95 x 5 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz

### Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for flush mounting

Presence detector ensuring that a constant level of light is maintained in the room while someone is present. The sensor regulates a maximum of 4 zones, of which 2 to 3 daylight-controlled and 1 or 2 secondary zones. With a push button you can manually dim the light or switch it on/off (to be ordered separately). The detector also has an extra relay contact. The detector is directly connected to the DALI bus. The detector assigns every luminaire its own address (DALI addressable). This ensures that each luminaire can be allocated to any zone and zones can be updated without altering the cabling. The detector is shipped with a flush-mounting box with spring clips.

- Dimensions (HxWxD): 100 x 100 x 74.7 mm
- Dimensions visible (HxWxD): 100 x 100 x 46.4 mm
- Input voltage: 230 V ± 10 %, 50 Hz
- Drill diameter: 88.5 mm
- Relay contact 1: NO. (max.  $\mu$ 10 A)
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
  - Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360 °
- Detection range (PIR): up to 24 m in diameter from a height of 3 m
- Response value luminosity: 100 lux – 2000 lux
- Switch-off delay: 5 m –  $\infty$
- Protection degree: IP54
- Mounting height: 2 – 3.5 m
- Mounting method: flush-mounting
- Ambient temperature: -5 – +50 °C

  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
  - Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): circle, 16 – 24 m
- Response value luminosity: 100 lux – 2000 lux
- Switch-off delay: 5 m –  $\infty$
- Protection degree: IP54
- Mounting height: 2 – 3.4 m
- Mounting method: flush-mounting
- Ambient temperature: -5 – +50 °C

### Detector with 3 zone DALI daylight control and extra functionalities, 360°, 24 m, master or stand-alone, for surface mounting, with EnOcean

Presence detector ensuring that a constant level of light is created in the room while someone is present. The sensor regulates a maximum of 4 zones, of which 2 to 3 daylight-controlled and 1 or 2 secondary zones. With a push button you can manually dim the light or switch it on/off (to be ordered separately). The detector also has an extra relay contact. The detector is directly connected to the DALI bus. The detector assigns every luminaire its own address (DALI addressable). This ensures that each luminaire can be allocated to any zone and zones can be updated without altering the cabling.

- Dimensions (HxWxD): 117.3 x 117.3 x 64.1 mm
- Dimensions visible (HxWxD): 117.3 x 117.3 x 64.1 mm
- Input voltage: 230 V  $\pm$  10 %, 50 Hz
- Relay contact 1: NO (max.  $\mu$ 10 A), potential-free
  - Maximum load incandescent and halogen lamps ( $\cos\phi=1$ ): 2300 W
  - Maximum load low voltage halogen lamps: 1200 W
  - Maximum load economy lamps (CFLi): 350 W
  - Maximum load LED lamps 230 V: 350 W
  - Maximum capacitive load: 140  $\mu$ F
- Maximum switching current: 165 A/20 ms – 800 A/200  $\mu$ s
- Detection angle: 360°
- Detection range (PIR): up to 24 m in diameter from a height of 3 m
- Response value luminosity: 100 lux – 2000 lux
- Switch-off delay: 5 m –  $\infty$
- Protection degree: IP54
- Mounting height: 2 – 3.4 m
- Mounting method: surface-mounting
- Ambient temperature: -5 – +50 °C

#### COMPLETE UNIT

**350-41781** Pieces: 1 Detector

#### ACCESSORY – UNIVERSAL REMOTE CONTROL

**350-41936** Pieces: 1 Universal remote control for smartphone

#### ACCESSORY – IR REMOTE CONTROL

**350-41934** Pieces: 1 IR-remote control for users

#### ACCESSORY – IR REMOTE CONTROL

**350-41935** Pieces: 1 IR remote control for users

### Compact power supply for DALI bus systems

This compact power supply is used to supply power to the DALI bus and its connected control devices. The power supply can either be integrated in the luminaire itself, or placed on the suspended ceiling. The maximum load is 250 mA.

- power supply voltage: 85 to 265 V, frequency 50/60 Hz
- dimensions (HxWxL): 30 x 20 x 160 mm
- standby consumption: < 1 W
- output: DALI
- output voltage: 16 Vdc  $\pm$  5 %
- max. load DALI output: 250 mA/4 W
- ambient temperature: 0 – +50 °C
- protection degree: IP20
- air humidity: 20 - 95% RH, non condensing

#### COMPLETE UNIT

**350-70985** Pieces: 1 Complete unit

### DALI link module

With this DALI link module, you can connect several DALI buses together, making it possible to control zones which are separated by folding doors, adjoining zones, or installations with more than the maximum number of 64 DALI units per bus. The module's design makes it easy to integrate into the installation, and it does not require a 230 V supply.

The module can be used with the Niko DALI addressable masters with additional functionalities.

- dimensions (HxWxD): 21 x 30 x 159 mm
- power supply: via the DALI bus
- power consumption of input 1/2: 14/4 mA
- ambient temperature: +5 – +40 °C
- air humidity: 20 - 95% RH, non condensing

#### COMPLETE UNIT

**350-70021** Pieces: 1 DALI link module

### DALI push-button interface

Push-button interface for control of DALI buses. Push-button interface transforms the switch impulse of external push buttons (e.g. 4-fold push button) into a DALI command. You can easily mount the compact interface in the flush-mounting box behind a potential-free push button.

You can connect 4 push buttons to this interface. Depending on the setting, you can switch a selected light group on or off

with every push button (with a brief press) or dim it (by holding down), or select a light scene (pressing briefly). Suitable for all DALI addressable Niko detectors (350-41650, 350-41680, 350-41750, 350-41751, 350-41760, 350-41761, 350-41780 and 350-41781).

- power supply voltage: via the DALI bus
- dimensions (HxWxD): 35 x 30 x 12 mm
- maximum power consumption: 6 mA
- ambient temperature: +5 – +40 °C

#### COMPLETE UNIT

**350-70020** Pieces: 1 DALI push-button interface for control of DALI buses

**DALI rotary dimmer**

This DALI rotary control is used to control DALI controlled light luminaires. The dimmer can be set to control 15 DALI groups separately or set in broadcast mode, to control all DALI controlled devices simultaneously. This dimmer is not equipped with a built-in power supply for the DALI bus (you can use the external Niko power supply 350-70985 or DALI DIN rail bus power supply 67-710). The rotary dimmer can also be used in combination with the Niko DALI addressable detectors to manually dim the light. It is possible to manually change the dimming speed (the so-called fade rate) - without the use of a PC.

- for use in DALI systems
- power supply voltage: that of the DALI bus (not built-in)
- complies with the EN 60669-2-1
- groups: 15 (configurable) individually or all at once (broadcast)
- dimming speed: adjustable
- wire capacity: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: +5 – +50 °C
- maximum power consumption: 6 mA

- KNX motion detectors
- KNX motion detectors for corridors
- KNX outdoor motion detectors

## NEW

### Mini presence detector P34MR, KNX, 8-10 m, 360°, for flush mounting ref. 350-34001

- Flat lens
- Includes plug in connector for easy installation
- Easy configuration (well-structured ETS file)
- 5 channels: 4 channels for lighting control, alarm and HVAC + light measurement
- Various applications: presence, lux, constant light switch, HVAC, alarm
- Flat design, available in white and black finish (exchangeable deco ring)
- IP54
- Small form factor (28 mm drill diameter, 40 mm depth in ceiling)

### Presence detector P34MR, KNX, 9-10 m, 360°, for flush mounting and flush-mounting box ref. 350-34002

- Flat lens
- Plug-in terminals for fast installation
- Easy configuration (well-structured ETS file)
- 5 channels: 4 channels for lighting control, alarm and HVAC + light measurement
- Various applications: presence, lux, constant light switch, HVAC, alarm
- Flat design, available in white and black finish (exchangeable deco ring)
- Up to IP54 in combination with surface mounting accessory
- For flush mounting or flush-mounting box
- Surface mounting via accessory

NEW

### Mini presence detector P34MR, KNX, 8-10 m, 360°, for flush mounting

This flat lens mini presence detector with 5 channels is suitable for KNX systems. It can be flush mounted in the ceiling or in thin ceiling profiles. A black deco ring can be ordered separately. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Input voltage: 30 Vdc via KNX-bus
- Maximum current consumption: 10 mA
- Number of channels: 5 channels
- Light intensity range: 10 lux – 2000 lux
- Switch-off delay: 1 s – 18 h 12 min 15 s
- Detection angle: 360 °
- Detection range (PIR): up to 10 m in diameter from a height of 3 m
- Ambient temperature: -20 – +50 °C
- Mounting method: flush-mounting
- Drill diameter: 28 mm
- Mounting height: 2 – 4 m
- Colour: white (RAL 9010)
- Dimensions (HxWxD): 45 x 45 x 50 mm
- Protection degree: IP54
- Impact resistance: IK02

**Available in the fourth quarter of 2021. This product is still in development. The technical specifications could be subject to change.**

#### COMPLETE UNIT

**350-34001** Pieces: 1 Detector

#### ACCESSORY – DECO RING, BLACK

**390-34011** Pieces: 10 Deco ring for P34MR mini detector, black

NEW

### Presence detector P34MR, KNX, 9-10 m, 360°, for flush mounting and flush-mounting box

This flat lens presence detector with 5 channels is suitable for KNX systems. It can be flush mounted in the ceiling or installed in a flush-mounting box. A black deco ring and a surface-mounting box can be ordered separately. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Input voltage: 30 Vdc via KNX-bus
- Maximum current consumption: 10 mA
- Number of channels: 5 channels
- Light intensity range: 10 lux – 2000 lux
- Switch-off delay: 1 s – 18 h 12 min 15 s
- Detection angle: 360 °
- Detection range (PIR): up to 10 m in diameter from a height of 3 m
- Ambient temperature: -20 – +50 °C
- Mounting method: flush-mounting
- Drill diameter: 58 mm
- Mounting height: 2 – 4 m
- Colour: white (RAL 9010)
- Dimensions (HxWxD): 75 x 75 x 41 mm
- Protection degree: IP40 (Flush-mounting box) / IP44 (spring clips)
- Impact resistance: IK02

**Available in the fourth quarter of 2021. This product is still in development. The technical specifications could be subject to change.**

#### COMPLETE UNIT

**350-34002** Pieces: 1 Detector

#### ACCESSORY – DECO RING, BLACK

**390-34012** Pieces: 10 Deco ring for P34MR detector, black

#### ACCESSORY – SURFACE MOUNTING BOX

**390-34102** Pieces: 1 Surface mounting box for P34MR

**390-34112** Pieces: 1 Surface mounting box for P34MR, black

### Motion detector M34LR, KNX, 39-41 m, 360°, for flush-mounting box

This motion detector with 5 channels is suitable for KNX systems. It can be installed in a flush-mounting box. Spring clips for flush-mounting and a surface-mounting box can be ordered separately. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Input voltage: 30 Vdc via KNX-bus
- Maximum current consumption: 10 mA
- Number of channels: 5 channels
- Light intensity range: 10 lux – 2000 lux
- Switch-off delay: 1 s – 18 h 12 min 15 s
- Detection angle: 360°
- Detection range (PIR): up to 41 m in diameter from a height of 3 m
- Ambient temperature: -20 – +50 °C
- Mounting method: flush-mounting box
- Drill diameter: 56 mm
- Mounting height: 2 – 3 m
- Colour: white (RAL 9010)
- Dimensions (HxWxD): 111 x 111 x 70 mm
- Protection degree: IP40
- Impact resistance: IK02

Available in the fourth quarter of 2021. This product is still in development. The technical specifications could be subject to change.

#### COMPLETE UNIT

**350-34003** Pieces: 36 Detector

#### ACCESSORY – SURFACE MOUNTING BOX

**390-34103** Pieces: 1 Surface mounting box for M34LR

**390-34203** Pieces: 1 Spring clips for M34LR/M34HC

### Motion detector M34HC, KNX, 15-29 m, high ceiling, 360°, for flush-mounting box

This motion detector for high ceiling with 5 channels is suitable for KNX systems. It can be installed in a flush-mounting box. Spring clips for flush-mounting and a surface-mounting box can be ordered separately. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Input voltage: 30 Vdc via KNX-bus
- Maximum current consumption: 10 mA
- Number of channels: 5 channels
- Light intensity range: 10 lux – 2000 lux
- Switch-off delay: 1 s – 18 h 12 min 15 s
- Detection angle: 360°
- Detection range (PIR): up to 29 m in diameter from a height of 10 m
- Ambient temperature: -20 – +50 °C
- Mounting method: flush-mounting box
- Drill diameter: 56 mm
- Mounting height: 2 – 10 m
- Colour: white (RAL 9010)
- Dimensions (HxWxD): 102 x 102 x 51 mm
- Protection degree: IP20
- Impact resistance: IK02

Available in the fourth quarter of 2021. This product is still in development. The technical specifications could be subject to change.

### Motion detector for corridors, 360°, KNX, 40 m, for flush-mounting box

The corridor motion detector with two channels is suitable for KNX systems. It can be installed in a flush-mounting box in the ceiling. Spring clips and an IP54 surface-mounting box can be ordered separately. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Dimensions (HxWxD): 105 x 105 x 60 mm
- Dimensions visible (HxWxD): 105 x 105 x 38 mm
- Input voltage: 30 Vdc via KNX-bus
- Number of channels: 2 channel
- Detection angle: 360°
- Light intensity range: 10 lux – 2000 lux, ∞
- Switch-off delay: 30 s – 60 min
- Protection degree: IP20
- Mounting height: 2 – 2.5 m
- Mounting method: flush-mounting box
- Ambient temperature: -20 – +45 °C

#### COMPLETE UNIT

**350-530311** Pieces: 1 Detector

#### ACCESSORY – IR REMOTE CONTROL

**350-939998** Pieces: 1 IR-remote control for 35 m corridor detector KNX

#### ACCESSORY – FLUSH-MOUNTING BOX WITH SPRING CLIPS

**350-991999** Pieces: 1 Flush-mounting box with spring clips

#### ACCESSORY – IP54 SURFACE-MOUNTING BOX

**350-992901** Pieces: 1 Surface-mounting box for 35 m detector for corridors

### Outdoor motion detector, KNX, 360°, 16 m, for surface mounting

The outdoor motion detector with two channels is suitable for KNX systems. It can be surface mounted on walls or ceilings and is easy to install thanks to the plug-in terminals. The detector can also be used for indoor applications. In conformity with the European directive for EMC and safety EN 60669-2-1.

- Dimensions (HxWxD): 79 x 90 x 150 mm
- Dimensions visible (HxWxD): 79 x 90 x 150 mm
- Input voltage: 30 Vdc via KNX-bus
- Detection angle: 360°
- Light intensity range: 5 lux – 2000 lux ∞
- Switch-off delay: 5 s – 1 h
- Protection degree: IP55
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

#### COMPLETE UNIT

**350-213001** Pieces: 1 Detector

#### ACCESSORY – IR REMOTE CONTROL FOR 350-213001

**350-999908** Pieces: 1 IR-remote control for outdoor motion detector KNX

**Mini presence detector, 360°, Niko Home Control, 9 m**

The mini detector detects movement and changes in light intensity. Using this information various Niko Home Control actions can be activated or deactivated. The product is suitable for ceiling mounting in suspended ceilings, both indoors and outdoors.

- Dimensions (HxWxD): 13 x 36 mm
- Dimensions visible (HxWxD): 13 x 36 mm
- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Drill diameter: 30 mm
- Detection angle: 360 °
- Detection range (PIR): 9.5 m from a height of 3 m
- Light intensity range: 2 lux – 2500 lux
- Ambient temperature: -10 – +50 °C
- Mounting method: flush-mounting

**COMPLETE UNIT**

**550-20220** Pieces: 1 Detector

**Wall motion detector, 180°, Niko Home Control, 9 m**

This motion detector is suitable for indoor use only. Niko Home Control supplies power to the motion detector. No additional power supply is required. To be used as a motion detector or as a motion detector in combination with a photo cell.

- resting potential: 26 Vdc (SELV, safety extra-low voltage)
- detection angle: 180° horizontal, 60° vertical
- detection range: 9 m (horizontal)
- recommended mounting height: 90 - 110 cm
- light sensitivity: 5 - 1200 lux
- switch-off delay: 10 s
- manual mode option
- ambient temperature: -5 – +45 °C
- CE marked

**COMPLETE UNIT**

**550-20210** Pieces: 6 For claw fixing  
**550-20211** Pieces: 6 For screw fixing (centre distance: 71 mm)  
**550-20212** Pieces: 6 For screw fixing

**Outdoor motion detector, 180°, Niko Home Control, 16 m, with orientable lens**

This motion detector is suitable for use on driveways, on outdoor patios, in garden areas or in garages. The detector is equipped with an integrated light sensor. The sensor can be rotated horizontally within a 25° angle to modify the direction of detection. If you do not want the motion detector to detect any motion within a certain section of the detection area, you cover the sensor lens using the cover cap supplied. Niko Home Control supplies power to the motion detector. No additional power supply is required.

- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Detection angle: 180 °
- Detection range (PIR): up to 16 m in diameter from a height of 3 m
- Switch-off delay: 8 s – 30 m
- Protection degree: IP54
- Mounting height: 2.5 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +45 °C

**COMPLETE UNIT**

**550-20200** Pieces: 1 Detector, white

**ACCESSORY**

**390-20050** Pieces: 1 Ceiling mounting bracket

Flush surround plates to be ordered separately.  
 Product drawings purely illustrative.

**Outdoor motion detector, 180°, Niko Home Control, 13 m, with orientable lens, black**

This motion detector is suitable for use on driveways, on outdoor patios, in garden areas or in garages. The detector is equipped with an integrated light sensor. The sensor can be rotated horizontally within a 25° angle to modify the direction of detection. If you do not want the motion detector to detect any motion within a certain section of the detection area, you cover the sensor lens using the cover cap supplied. Niko Home Control supplies power to the motion detector. No additional power supply is required.

- Input voltage: 26 Vdc (SELV, safety extra-low voltage)
- Protection degree: IP54
- Detection angle: 180°
- Mounting height: 2.5 m
- Detection range (PIR): up to 13 m in diameter from a height of 3 m
- Mounting method: surface-mounting
- Switch-off delay: 8 s – 30 m
- Ambient temperature: -20 – +45 °C

### Motion detector, 90°, 24 V, 6 m

Motion detector suitable for motion detection in warehouses. To be used in combination with a daylight control module (360-35010) for lighting control. At a maximum mounting height of 8 m, the detection area covers a surface of 16 x 1 m (LxW). For outdoor applications, use the IP54 protection cap (390-20010). This protection cap needs to be ordered separately.

- Input voltage: 24 Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Relay contact 1: on/off (NPN transistor)
- Detection angle: 90 °
- Detection range (PIR): up to 6 m from a height of 3 m
- Protection degree: IP20
- Mounting height: 2.5 – 8 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C
- Maximum power consumption: 5 mA

#### COMPLETE UNIT

**350-20011** Pieces: 1 Detector

#### ACCESSORY

**390-20010** Pieces: 10 IP54 protection cap

#### ACCESSORY

**390-20000** Pieces: 1 Vandalproof protection cap, wall mounting

### Motion detector, 90°, 24 V DC, 0.5 - 15 m, light sensor

Motion detector with built-in light sensor. Suitable for motion detection at an angle of 90° and over a distance of 0.5 to 15 m. To be used in combination with a daylight control module (360-35010) for lighting control. The use of the IP54 protection cap (390-20010) is obligatory for outdoor use. This protection cap needs to be ordered separately.

- Input voltage: 24 Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Detection angle: 90 °
- Detection range (PIR): up to 15 m from a height of 2.5 m
- Protection degree: IP20
- Mounting height: 2 – 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

#### COMPLETE UNIT

**350-30010** Pieces: 1 Detector

#### ACCESSORY

**390-20010** Pieces: 10 IP54 protection cap

#### ACCESSORY

**390-20000** Pieces: 1 Vandalproof protection cap, wall mounting

### Motion detector, 90°, 24 V, 22 m

90° motion detector, 24 V, with a potential-free contact for mounting on walls and ceilings. The detector is durable, functional and compact. The motion detector has a built-in walking test and adjustable sensitivity (5 levels) and can be combined with Niko Home Control. To be used in combination with the digital potential-free sensor module (550-00210). For use in small offices, storage areas, corridors, conference rooms ... The motion detector is suitable for the control of HVAC, ventilation, building management systems, Niko Home Control ... The switch-off delay of the potential-free relay and the sensitivity of the detector can be set on the device. Also suitable for outdoor applications. In this case a protective cover (to be ordered separately) is used to make the motion detector splashproof (protection degree IP54).

- Input voltage: 24 Vac/Vdc  $\pm$  10 %
- Maximum power consumption: <18 mA
- Number of channels: 1 channel
- Detection angle: 90°
- Detection range (PIR): circle, 22 m
- Switch-off delay: 2 s – 30 m
- Protection degree: IP20
- Mounting height: 3 m
- Mounting method: surface-mounting
- Ambient temperature: -20 – +50 °C

#### COMPLETE UNIT

**350-41279** Pieces: 1 Detector

#### ACCESSORY

**390-20010** Pieces: 10 IP54 protection cap

#### ACCESSORY

**390-20000** Pieces: 1 Vandalproof protection cap, wall mounting

### Motion detector, 360°, 24 V, 8 m, for surface mounting

The motion detector has a limited diameter (80 mm) and thickness (3 cm) and an adjustable sensitivity (4 levels). For use in small offices, storage areas, corridors, conference rooms, ... The detector is suitable for the control of ventilation, building management systems, Niko Home Control .. To be used in combination with the digital potential-free sensor module (550-00210). It is possible to set both the switch-off delay of the potential-free relay and the sensitivity of the detector on the device using the DIP switches.

- Dimensions (HxWxD): 80 x 80 x 30,6 mm
- Input voltage: 24 Vac/Vdc  $\pm$  10 %
- Relay contact : NO. 0.2 A/max 48 V
- Relay contact 1: NO (max. 48 V/0.2 A), potential-free
- Number of channels: 1 channel
- Detection angle: 360°
- Detection range (PIR): up to 8 m in diameter from a height of 3 m
- Switch-off delay: 5 s, 30 s – 1 h
- Protection degree: IP20
- Mounting height: 2.5 – 4 m
- Mounting method: surface-mounting
- Ambient temperature: -5 – +50 °C

#### COMPLETE UNIT

**350-41549** Pieces: 1 Detector

### Light sensor, IP54, 3 - 60 klux

Photo cell for outdoor applications (IP54). To be used in combination with a daylight control module (360-35010). The photo cell has a variable light sensitivity between 3 and 300 lux, 30 and 3 Klux, 300 and 30 Klux or 600 and 60 Klux.

- Dimensions (HxWxD): 52 x 52 x 34,5 mm
- Input voltage: 24 Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Light intensity range: 3 lux – 60000 lux
- Protection degree: IP54
- Mounting method: surface-mounting
- Ambient temperature: -40 – +50 °C

#### COMPLETE UNIT

**350-10012** Pieces: 10 Detector

**Twilight switch, 24 V, one channel (4 A)**

Twilight switch for outdoor wall mounting (IP54), suitable for switching outdoor lighting. Light sensitivity adjustable from 2 to 200 lux. Large sensor surface for accurate light measuring. In conformity with the European directive for EMC and safety EN60669-2-1.

- Input voltage: 24 Vac/Vdc  $\pm$  10 %
- Number of channels: 1 channel
- Relay contact 1: NO (max.  $\mu$ 4 A), potential-free
- Light intensity range: 2 lux – 200 lux
- Protection degree: IP54
- Mounting method: surface-mounting
- Ambient temperature: -50 – +50 °C

**COMPLETE UNIT****350-10032**

# Chapter 6

## Lighting and lighting control

- 6.A Flush-mounting dimming
- 6.B Modular dimming
- 6.C LED lighting
- 6.D Orientation lighting
- 6.E Transformers

# Flush-mounting dimming

With dimmers you can control the brightness of your lighting so you always have the right atmosphere in your home. Set your lighting to full brightness when you working at night. Or choose a dimmed light for a dinner party with friends. There is a Niko dimmer for every type of lamp. And even better, your lights operate in a stable way without interfering with other devices.

## ADVANTAGES

### Large portfolio

- dimmers for all types of dimmable lighting: economy lamps, incandescent lamps, halogen lamps and LED lamps
- extensions available for multiple control points
- for new build and renovation: 2-wire and 3-wire rotating and push-button dimmers

### Stable control

- various dimming profiles: every lamp type is dimmed according to its ideal curve
- the boost function also dims lamps that need extra power to start up
- low minimum load: from 3 W

### Handy control

- memory function: when turned off the dimmer remembers the last set dimming position
- dim up from the minimum dim level: long push on the button (push button dimmer) or turn right (rotating dimmer) when the lighting is off

### Standard PLC interference suppression

- for all universal dimmers
- removes interfering signals from the electricity net as much as possible, in order to limit buzzing and flickering, and reduce humming to a minimum

### Standard protection

- overvoltage protection
- short-circuit protection

### DALI rotating dimmer

- dims DALI controlled light fixtures
- stand-alone as well as in combination with the Niko DALI detectors
- dims 1 zone or all zones at the same time

NEW

**LED compensator**

- ideal for challenging 2-wire LED dimming situations
- removes ghosting effects
- removes flickering and blinking
- complementary to the PLC interference suppression (already added to every universal dimmer)

## QUICK SELECTION GUIDE

	Universal			Specific	
	2-wire	3-wire	LED	DALI	1-10 V control
<b>Rotating button</b>	310-03900 	310-01900 310-02000  	310-04900 	310-02100 	310-01100 
<b>Push-button</b>	310-02900 		310-02800 (3-wire, Ledino) 		

Other types of dimmers can be found on the product pages.

**Universal rotary dimmer 3 - 300 W, 2 wire**

Dimmer for LED lamps, 230 V halogen lamps, all low-voltage halogen lamps and dimmable incandescent lamps, 2 wired.

- for use with or without light value memory
- to switch the lighting on and off from another location, use N.O. push buttons (170-0000x), also when replacing single-pole, two-way or intermediate switches
- power supply voltage: 230 Vac ± 10%, 50 Hz
- incandescent lamps: 3 - 300 W
- 230 V halogen lamps: 3 - 300 W
- dimmable LED lamps: 3 - 200 W (maximum number of lamps will depend on the used lamp type)
- ferromagnetic transformer: 20 - 300 VA
- toroidal core transformer: 20 - 300 VA
- electronic transformer: 20 - 300 VA
- minimum load: 3 W
- maximum load: 300 W
- overload protection with automatic reset function
- electronic short-circuit protection
- powerline communication interference suppression
- power consumption standby: 0.15 W
- connection terminals: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: 35 °C

**BASE**

**310-03900** Pieces: 6 With screw terminals and claw fixing

**310-03901** Pieces: 6 With screw terminals, for screw fixing

Product drawings purely illustrative.

### Universal rotary dimmer 5 - 325 W, 3 wire

Dimmer for dimmable LED lamps, 230 V halogen lamps, all low-voltage halogen lamps, dimmable economy lamps and incandescent lamps. This dimmer is connected with a 3-wire system.

- to be used with or without light value memory
- for use with more than one control point, in combination with (a maximum of five) rotary button extensions (310-02000)
- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- incandescent lamps: 5 - 325 W
- 230 V halogen lamps: 5 - 325 W
- dimmable economy lamps: 5 - 200 W (max. 10)
- dimmable LED lamps: 5 - 200 W (maximum number of lamps will depend on the used lamp type)
- ferromagnetic transformer: 20 - 325 VA
- toroidal core transformer: 20 - 325 VA
- electronic transformer: 20 - 325 VA
- minimum load: 5 W
- maximum load: 325 W
- overload protection with automatic reset function
- electronic short-circuit protection
- powerline communication interference suppression
- connection terminals: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: 35 °C

### Rotary button extension, 3 wire

Rotary button extension for the universal rotary dimmer with PLC interference suppression 5 - 325 W, 3 wire.

- up to five extensions per universal rotary dimmer 5 - 325 W (310-01900)
- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- connection terminals: 2 x 2.5 mm<sup>2</sup>

## Rotary dimmer for dimmable LED lamps, 4 – 200 W, 2 wire

Rotary dimmer for dimmable LED lamps in trailing edge.

It can also dim incandescent lamps, 230 Vac Halogen lamps and low voltage halogen lamps with electronic transformer.

2-wire connected.

- rotary control
- trailing edge dimmer
- selectable light value memory mode (ON, OFF)
- adjustable boostlevel
- adjustable minimum dimlevel
- overload and overtemperature protection
- dimmable LED lights: 4 - 200 W (maximum number of lamps will depend on the used lamp type)
- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- incandescent lamps: 4 – 200 W
- 230 V halogen lamps: 4 - 105 W
- electronic transformers: 4 – 105 VA (trailing edge only)
- minimum load: 4 W
- maximum load: 200 W
- standby consumption: 0.15 W
- screw terminals: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: 0 – +40 °C

## DALI rotary dimmer

This DALI rotary control is used to control DALI controlled light luminaires. The dimmer can be set to control 15 DALI groups separately or set in broadcast mode, to control all DALI controlled devices simultaneously. This dimmer is not equipped with a built-in power supply for the DALI bus (you can use the external Niko power supply 350-70985 or DALI DIN rail bus power supply 67-710). The rotary dimmer can also be used in combination with the Niko DALI addressable detectors to manually dim the light. It is possible to manually change the dimming speed (the so-called fade rate) - without the use of a PC.

- for use in DALI systems
- power supply voltage: that of the DALI bus (not built-in)
- complies with the EN 60669-2-1
- groups: 15 (configurable) individually or all at once (broadcast)
- dimming speed: adjustable
- wire capacity: 2 x 2.5 mm<sup>2</sup>
- ambient temperature: +5 – +50 °C
- maximum power consumption: 6 mA

### BASE

**310-02100** Pieces: 6 With screw terminals and claw fixing

**310-02101** Pieces: 6 With screw terminals, for screw fixing

**Rotary dimmer for systems with 1-10 V current control**

Dimmer for switching and controlling dimmable electronic control gear (ECG) for fluorescent lighting, compact fluorescent lighting and dimmable LED lighting.

Expiring product

- to be used for single-pole switching
- built-in single-pole switch (max. 2 A)
- maximum control: 45 mA
- minimum control: 0.1 mA
- compatible with all electronic control gear in compliance with EN60929
- adjustment range depends on the electronic control gear connected and the manufacturer
- connection terminals: 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- ambient temperature: 20 °C

**DALI push-button interface**

Push-button interface for control of DALI buses. Push-button interface transforms the switch impulse of external push buttons (e.g. 4-fold push button) into a DALI command. You can easily mount the compact interface in the flush-mounting box behind a potential-free push button.

You can connect 4 push buttons to this interface. Depending on the setting, you can switch a selected light group on or off

with every push button (with a brief press) or dim it (by holding down), or select a light scene (pressing briefly). Suitable for all DALI addressable Niko detectors (350-41650, 350-41680, 350-41750, 350-41751, 350-41760, 350-41761, 350-41780 and 350-41781).

- power supply voltage: via the DALI bus
- dimensions (HxWxD): 35 x 30 x 12 mm
- maximum power consumption: 6 mA
- ambient temperature: +5 – +40 °C

**COMPLETE UNIT**

**350-70020** Pieces: 1 DALI push-button interface for control of DALI buses

**LED compensator**

The LED compensator is used with LED lamps when lamp flicker is seen with a 2-wire dimmer. Please note: PLC interference effects that cause flicker symptoms in certain EU countries, will not be blocked by this product.

You can also use the LED compensator as a load to the connected dimmer (55X-722X1) to complete the commissioning with the wireless smart hub for Niko Home Control (552-00001).

It will remove afterglow with lamps or reduce switching delays between led drivers in a light circuit.

One or more LED compensators are installed parallel over a LED lamp, between the phase wire and the neutral wire.

- input voltage: 230 Vac  $\pm$  10 %, 50 Hz
- nominal standby consumption: 1.4 W
- dimensions (HxWxD): 30.8 mm x 22.1 mm x 17.1 mm (cabling excluded)
- weight: 21 g  $\pm$  1 g
- operating temperature: 0 - 40 °C
- protection degree: IP51

# Modular dimming

Sometimes dimming actions are better coordinated from the electrical cabinet instead of installing separate dimmers for every light. Niko's modular dimmers make it easy. Just like regular dimmers, they are of high quality and you can add as many control points as you like.

## ADVANTAGES

### Modular dimming

- install the modular dimming in the electrical cabinet
- control the dimmer in various ways:
  - push-button
  - 0-10 V control
  - 1-10 V control
  - DALI dimmer

### Universal dimmer

- dims every type of dimmable lighting: economy lamps, incandescent lamps, halogen lamps and LED lamps
- dims every lamp according to its ideal dimming curve
- decide on the fixture or lamp type later
- low minimum load: from 5 W
- standard overvoltage and short-circuit protection

### Standard PLC interference suppression

- for all universal dimmers
- removes interfering signals from the electricity net as much as possible, in order to limit buzzing and flickering, and reduce humming to a minimum

### Universal modular dimmer PLC interference suppression 5 - 350 W

Dimmer for all types of lamps: dimmable LED lamps, 230 V halogen lamps, all types of low-voltage halogen lamps, dimmable economy lamps and incandescent lamps. Control via an NO push button (230 Vac or 8-24 Vac/Vdc). Use with or without memory function, staircase function or all-off function. In compliance with the European directives for EMC and safety EN60669-2-1.

- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- incandescent lamps: 5 - 350 W
- 230 V halogen lamps: 5 - 350 W
- ferromagnetic transformer: 20 - 350 VA
- toroidal core transformer: 20 - 350 VA
- electronic transformer: 20 - 350 VA
- economy lamps: 5 - 200 W
- LED lamps: 5 - 200 W (maximum number of lamps will depend on the used lamp type)
- minimum load: 5 W
- overload protection with automatic reset function
- electronic short-circuit protection
- powerline communication interference suppression
- connection terminals: 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- ambient temperature: 35 °C
- dimensions (1 DIN rail module): 89 x 17.5 x 60 mm (HxWxD)
- weight:  $\pm$  70 g

#### COMPLETE UNIT

**330-00700** Pieces: 10 Complete unit

### Universal modular dimmer PLC interference suppression 5 - 350 W, analogue

Dimmer for all types of lamps: dimmable LED lamps, 230 V halogen lamps, all types of low-voltage halogen lamps, dimmable economy lamps and incandescent lamps. 0-10 V control or 1-10 V current control. In compliance with the European directives for EMC and safety EN60669-2-1.

- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz
- 0-10 V input impedance: 33 k $\Omega$
- 1-10 V input impedance: 22 k $\Omega$
- incandescent lamps: 5 - 350 W
- 230 V halogen lamps: 5 - 350 W
- ferromagnetic transformer: 20 - 350 VA
- toroidal core transformer: 20 - 350 VA
- electronic transformer: 20 - 350 VA
- economy lamps: 5 - 200 W
- LED lamps: 5 - 200 W (maximum number of lamps will depend on the used lamp type)
- minimum load: 5 W
- overload protection with automatic reset function
- electronic short-circuit protection
- powerline communication interference suppression
- connection terminals: 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- ambient temperature: 35 °C
- dimensions (1 DIN rail module) : 89 x 17.5 x 60 mm (HxWxD)
- weight:  $\pm$  70 g

#### COMPLETE UNIT

**330-00701** Pieces: 10 Complete unit

### Universal modular dimmer 750 VA (3 A)

Dimmer for incandescent lamps, 230 V halogen lamps and all types of low-voltage halogen lamps. Automatic selection of the dimming principle. Control via an NO push button, control without voltage, 0-10 V control, 1-10 V current control or directly on the device. Up to 30 NO push buttons in parallel. Use with or without memory function. Additional memory for saving one atmosphere via push-button control. Indication LEDs for the operation and feedback on errors. In compliance with the European directives for EMC and safety EN60669-2-1.

- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz  $\pm$  1 Hz
  - incandescent lamps: 750 W
  - 230 V halogen lamps: 750 W
  - ferromagnetic transformer: 750 VA
  - toroidal core transformer: 750 VA
  - electronic transformer: 750 VA
  - minimum load: 60 W/60 VA
  - hum-free
  - overload protection with automatic reset function
  - electronic short-circuit protection
  - powerline communication interference suppression
  - connection terminals: 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
  - ambient temperature: 35 °C
  - dimensions (2 DIN rail modules): 90 x 35 x 66 mm (HxWxD)
  - weight:  $\pm$  144 g
- Replaces 05-707

#### COMPLETE UNIT

**05-715** Pieces: 10 Complete unit

### Universal modular dimmer 1400 VA (6 A)

Dimmer for incandescent lamps, 230 V halogen lamps and all types of low-voltage halogen lamps. Automatic selection of the dimming principle. Control via an NO push button, control without voltage, 0-10 V control, 1-10 V current control or directly on the device. Up to 30 NO push buttons in parallel. Use with or without memory function. Additional memory for saving one atmosphere via push-button control. Integrated staircase function. Minimum dimming level adjustable between 1 and 40% and maximum dimming level between 60 and 100%. Indication LEDs for the operation and feedback on errors. In compliance with the European directives for EMC and safety EN60669-2-1.

- power supply voltage: 230 Vac  $\pm$  10%, 50 Hz  $\pm$  1 Hz
- incandescent lamps: 1400 W
- 230 V halogen lamps: 1400 W
- ferromagnetic transformer: 1400 VA
- toroidal core transformer: 1400 VA
- electronic transformer: 1400 VA
- minimum load: 100 W/100 VA
- hum-free
- overload protection with automatic reset function
- electronic short-circuit protection
- powerline communication interference suppression
- connection terminals: 2 x 2.5 mm<sup>2</sup> or 1 x 4 mm<sup>2</sup>
- ambient temperature: 35 °C
- dimensions (6 DIN rail modules): 89 x 105 x 60 mm (HxWxD)
- weight:  $\pm$  440 g

**Modular DALI power supply**

A DALI power supply always has to be connected to the bus. The maximum current on the DALI bus amounts to 250 mA. The modular power supply is provided with an electronic overload, short-circuit and overheating protection. Protections are indicated with a red LED. The presence of power supply is indicated with a green LED. If the Niko power supply is connected to components of other manufacturers, a safety extra-low voltage (SELV) is no longer guaranteed. The power supply can also be used for other systems than DALI, on the condition that they have the same specifications.

- power supply voltage: 230 Vac, 50 Hz
- secondary voltage: 16 or 22.5 Vdc (adjustable)
- weight: 400 g
- dimensions (4 DIN rail modules): 89 x 70 x 54.5 mm (HxWxD)
- DALI compatibility: 7.5 – 22.5 Vdc, current protection activated from 240 mA onwards

**COMPLETE UNIT**

**67-710** Pieces: 6 Complete unit

### Compact power supply for DALI bus systems

This compact power supply is used to supply power to the DALI bus and its connected control devices. The power supply can either be integrated in the luminaire itself, or placed on the suspended ceiling. The maximum load is 250 mA.

- power supply voltage: 85 to 265 V, frequency 50/60 Hz
- dimensions (HxWxL): 30 x 20 x 160 mm
- standby consumption: < 1 W
- output: DALI
- output voltage: 16 Vdc + - 5 %
- max. load DALI output: 250 mA/4 W
- ambient temperature: 0 – +50 °C
- protection degree: IP20
- air humidity: 20 - 95% RH, non condensing

# LED lighting

The right light is always important. With LED lighting, you can provide the right atmosphere or choose the colour or white tone that fits the occasion.

## ADVANTAGES

### Several types of power supplies

- for DIN rail mounting or with transformer case for flush-mounting in false walls or ceilings

### RGB(W) controlling possibilities

- via the LED controller: control the colour intensity of adjustable white, RGB or RGB(W) LED strips (100 W per channel)

## PRODUCT IN THE PICTURE

### Wireless wall control

- attach to any surface
- to be combined with 4 channel constant voltage controller
- 4 buttons with clear icons
  - switch on/off
  - memorise colour setting and call favourites
  - dim
  - select colour (temperature)
- control up to 10 constant voltage controllers (connected via a wired master-secondary configuration) for a synchronised control of a larger number of LED strips
- connect up to 15 wireless wall controls to 1 constant voltage controller
- available in every Niko colour
- finish with Niko Pure, Niko Intense or Niko Original faceplates

### 4-channel constant voltage LED controller, wireless

- ideal to control LED strips (constant voltage, common anode) from 12 to 24 Vdc
- the controller can control the following types of LED strips: RGB, RGBW, tunable white and monochrome
- 4 LED channels: R-WW, G-CW, B-WW, W-CW
- wireless system according to the Easywave protocol (RF 868 MHz)
- Compatible with wireless controls according to the Easywave protocol (RF 868 MHz)

### Power supply for LED strips, 24 Vdc - 60 W - IP67

The 60 W power supply is suitable for supplying power to LED strips. This power supply has an IP67 protection degree, is dust-free and waterjet proof. As a result, it is extremely well-suited for installation in a damp room, such as a bathroom or kitchen. The cables are fixed with resin.

- dimensions: 53 x 150 x 35 mm (HxWxD)
- weight:  $\pm$  495 g
- primary wire connection: 2 x 0.8 mm<sup>2</sup>; L: 30 cm
- power supply voltage: 230 V; 50 Hz
- secondary wire connection: 2 x 0.8 mm<sup>2</sup>; L: 30 cm
- dim wire connection: 2 x 0.3 mm<sup>2</sup>; L: 30 cm
- output voltage: 24 Vdc
- nominal power: 60 W
- protection degree: IP67
- ambient temperature: 50 °C; Tc: 85 °C

#### COMPLETE UNIT

**340-00028** Pieces: 1 Power supply 24 Vdc, 60 W, IP67 for LED strips

### Power supply for LED strips, 24 Vdc - 120 W - IP67

The 120 W power supply is suitable for supplying power to LED strips. This power supply has an IP67 protection degree, is dust-free and waterjet proof. As a result, it is extremely well-suited for installation in a damp room, such as a bathroom or kitchen. The cables are fixed with resin.

- dimensions: 63 x 190 x 37 mm (HxWxD)
- weight:  $\pm$  868 g
- primary wire connection: 2 x 0.8 mm<sup>2</sup>; L: 30 cm
- power supply voltage: 230 V; 50 Hz
- secondary wire connection: 2 x 2 mm<sup>2</sup>; L: 30 cm
- dim wire connection: 2 x 0.8 mm<sup>2</sup>; L: 30 cm
- output voltage: 24 Vdc
- nominal power: 120 W
- protection degree: IP67
- ambient temperature: 50 °C; Tc: 85 °C

#### COMPLETE UNIT

**340-00029** Pieces: 1 Power supply 24 Vdc, 120 W, IP67 for LED strips

### DIN rail power supply for LED strips, 24 Vdc - 60 W

The 60 W power supply is suitable for DIN rail mounting. The power supply is equipped with a primary input and four secondary terminals to connect two loads. Usage of screw terminals, both at primary and at secondary side. The output power range is adjustable. In compliance with the European directives for EMC and safety.

- dimensions (only 3 DIN rail modules): 90 x 52.5 x 55 mm (HxWxD)
- weight:  $\pm$  270 g
- operating temperature -30 – +70 °C
- ambient temperature: 35 °C
- protection against short-circuit, overvoltage and overload (automatic reset function)
- input terminals (1 pair): 1 x 2.5 mm<sup>2</sup>
- power supply voltage: 85 - 264 V AC; 47 - 63 Hz
- output terminals (2 pairs): 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- output power range: 21.6 - 29 V DC
- nominal current: 2.5 A
- nominal power: 60 W
- ripple voltage: 150 mVp-p
- stand-by power consumption: <0.5 W
- SELV (safety extra-low voltage)

#### COMPLETE UNIT

**340-00050** Pieces: 6 Modular power supply 24 Vdc, 60 W

### DIN rail power supply for LED strips, 24 Vdc - 100 W

The power supply is suitable for DIN rail mounting. The power supply is equipped with a primary input and four secondary terminals to connect two loads. Usage of screw terminals, both at primary and at secondary side. The output power range is adjustable. In compliance with the European directives for EMC and safety

- dimensions (only 4 DIN rail modules): 90 x 70 x 55 mm (HxWxD)
- weight:  $\pm$  270 g
- operating temperature -30 – +70 °C
- ambient temperature: 35 °C
- protection against short-circuit, overvoltage and overload (automatic reset function)
- input terminals (1 pair): 1 x 2.5 mm<sup>2</sup>
- power supply voltage: 85 - 264 V AC; 47 - 63 Hz
- output terminals (2 pairs): 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- output power range: 21.6 - 29 V DC
- nominal current: 4.2 A

- stand-by power consumption: <0.5 W
- SELV (safety extra-low voltage)

#### COMPLETE UNIT

**340-00051** Pieces: 6 Modular power supply 24 Vdc, 100 W

### Wireless 4-channel constant voltage controller

The 4-channel controller is suitable for controlling LED strips (constant voltage, common anode) from 12 to 24 Vdc. The controller has a maximum power of 50 W per channel for 12 Vdc LED strips and of 100 W per channel for 24 Vdc LED strips. The controller can control the following types of LED strips: RGB, RGBW, tunable white and monochrome. We recommend using the specifically designed RGB(W) wall controller in 4-button mode (article numbers 410-00002 + xxx-90002) for controlling the colour LED strips.

- wireless system
- frequency: 868 MHz
- transmission range:  $\pm$  30 m indoors, 100 m in open spaces
- primary connection: 1 x 2.5 mm<sup>2</sup> of 2 x 1.5 mm<sup>2</sup>
- secondary connection: 1 x 1.5 mm<sup>2</sup>
- dimensions: 176 x 62 x 36 mm (HxWxD)
- protection degree: IP20
- minimum drill diameter: 75 mm
- minimum flush-mounting height in suspended ceiling: 170 mm"

#### COMPLETE UNIT

**410-00121** Pieces: 1

### Wireless switch with four buttons

This wireless switch with four buttons can be used by a smart switch or a wireless receiver. It can be used as a two dual-button controls (upper: on, lower off) or as four one-button controls (toggle on/off or pulse). The switch can also be used in the Niko Home Control installation in combination with the Niko Home Control RF interface Easywave.

### PWM dimmer, 100 W

The PWM dimmer will be used to dim LED strips with monochrome LEDs, up to a maximum capacity of 100 W. The light intensity is dimmed linearly by using an NO push button. Press the NO push button briefly for switching on and off, and hold it down for brightening and dimming the light.

Replaces 340-10027 and 340-10028.

- power supply voltage: 8 - 24 Vdc
- frequency: 295 Hz
- double primary connection: max. 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- double secondary connection: max. 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- double connection for NO push button: max. 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- dimensions: 100 x 48 x 28 mm (HxWxD)
- minimum flush-mounting diameter: 55 mm
- minimum flush-mounting height in false ceiling: 100 mm
- protection degree: IP20
- ambient temperature: -5 – +55 °C
- CE marked

#### COMPLETE UNIT

**340-00048** Pieces: 5 PWM dimmer, 100 W

### RGB controller, max. 50 w

The RGB controller will be used to control Niko LED strips with RGB LEDs, up to a maximum capacity of 50 W. In addition to the on/off function, there are two modes that can be selected with an NO push button. Press the NO push button briefly for running through the different modes (on, fade, fixed colour, off), and hold it down for adjusting the speed of the 'fade' mode or the intensity of the 'fixed colour' mode.

- power supply voltage: 8 - 24 Vdc
- double primary connection: max. 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- four-fold secondary connection (connection to Niko LED strips): 3 PWM outputs and 1 common connection
- double connection for NO push button: max. 2 x 1.5 mm<sup>2</sup> or 1 x 2.5 mm<sup>2</sup>
- dimensions: 116 x 52 x 32 mm (HxWxD)
- minimum flush-mounting diameter: 55 mm
- minimum flush-mounting height in false ceiling: 100 mm
- protection degree: IP20
- ambient temperature: -5 – +55 °C
- CE marked

#### COMPLETE UNIT

**340-00110** Pieces: 10 RGB controller, max. 50 W

# Orientation lighting

Thanks to orientation lighting, you can wander through your home safely without having to turn on the light. Orientation lighting can also be used as decoration, flush-mounted in the wall next to your staircase or in the hallway. Reassure your child during the night by adding one to their bedroom. You can safely leave it on for the entire night: it will not warm up.

## ADVANTAGES

### Easy installation

- works directly on 230 V
- fits in a standard flush-mounting box with a minimum depth of 40 mm
- no need for a patch kit

### Safe and energy-efficient

- energy use as low as 0.2 W
- generates no heat, IR or UV radiation
- also available with an emergency battery in case of power outage

### Timeless design

- finish with Niko Pure, Niko Intense or Niko Original faceplates
- available in various light colours and white tones

6.A

6.B

6.C

6.D

6.E

**Orientation lighting with backup battery and white leds, 830 lux - 6500 K**

Suitable for indoor use. In case of a power failure, the integrated backup battery takes over for a period of 15 minutes.

- works directly on 230 Vac (no transformer needed)
- only suitable for a flush-mounting box with a flush-mounting depth of minimum 50 mm
- no plaster kit needed
- terminal connection: min. 2 x 1.5 mm<sup>2</sup>, max. 2 x 2.5 mm<sup>2</sup>
- power consumption: 0.6 W
- light intensity at diffuser: 830 lux
- protection degree: IP41
- impact-resistance: IK06
- no heat, IR or UV radiation
- average life span of LEDs: 60 000 h
- battery: environmentally friendly NiMH battery
- battery recharge cycle: ± 24 h

**COMPLETE UNIT**

	<b>170-38010</b>	Pieces: 6	With plug-in terminals and claws
	<b>170-38011</b>	Pieces: 6	With plug-in terminals, for screw fixing

**ACCESSORY**

	<b>170-38020</b>	Pieces: 1	Backup battery
---	------------------	-----------	----------------

**Orientation lighting with warm white LEDs, 360 lux - 2800 K**

- works directly on 230 Vac (no transformer needed)
- only suitable for a flush-mounting box with a flush-mounting depth of minimum 50 mm
- no plaster kit needed
- terminal connection: min. 2 x 1.5 mm<sup>2</sup>, max. 2 x 2.5 mm<sup>2</sup>
- power consumption: 0.25 W
- light intensity at diffuser: 360 lux
- protection degree: IP41
- impact-resistance: IK06
- no heat, IR or UV radiation
- average life span of LEDs: 60 000 h

**COMPLETE UNIT**

	<b>170-38500</b>	Pieces: 6	With plug-in terminals and claws
	<b>170-38501</b>	Pieces: 6	With plug-in terminals, for screw fixing

**Orientation lighting with white leds, 830 lux - 6500 K**

- works directly on 230 Vac (no transformer needed)
- only suitable for a flush-mounting box with a flush-mounting depth of minimum 50 mm
- no plaster kit needed
- terminal connection: min. 2 x 1.5 mm<sup>2</sup>, max. 2 x 2.5 mm<sup>2</sup>
- power consumption: 0.2 W
- light intensity at diffuser: 830 lux
- protection degree: IP41, IK06
- impact-resistance: IK06
- no heat, IR or UV radiation
- average life span of LEDs: 60 000 h

**BASE**

	<b>170-38000</b>	Pieces: 6	With plug-in terminals and claws
	<b>170-38001</b>	Pieces: 6	With plug-in terminals, for screw fixing

**Orientation lighting with white leds, 2100 lux - 6500 K**

- works directly on 230 Vac (no transformer needed)
- only suitable for a flush-mounting box with a flush-mounting depth of minimum 50 mm
- no plaster kit needed
- terminal connection: min. 2 x 1.5 mm<sup>2</sup>, max. 2 x 2.5 mm<sup>2</sup>
- power consumption: 0.6 W
- light intensity at diffuser: 2100 lux
- protection degree: IP41
- impact-resistance: IK06
- no heat, IR or UV radiation
- average life span of LEDs: 60 000 h

**COMPLETE UNIT**

**170-38200** Pieces: 6 With plug-in terminals and claws

**170-38201** Pieces: 6 With plug-in terminals, for screw fixing

**Orientation lighting with blue leds, 270 lux**

- works directly on 230 Vac (no transformer needed)
- only suitable for a flush-mounting box with a flush-mounting depth of minimum 50 mm
- no plaster kit needed
- terminal connection: min. 2 x 1.5 mm<sup>2</sup>, max. 2 x 2.5 mm<sup>2</sup>
- power consumption: 0.6 W

# Transformers

## ADVANTAGES

### User-friendly and fast installation

- 30% time savings thanks to the click cover
- connect 2 spots directly thanks to 2 secondary exits
- easy to daisy chain thanks to 2 primary entrances
- extra time savings by transformers equipped with halogen cap, euro plug or Q distribution block

### Compact

- ideal for installation in small spaces or low ceilings
- all transformers fit through a circular 55 mm hole, & some even through a circular 38 mm hole
- flush-mounting depth: minimum 100 mm
- IP65 transformers available for installation in humid environments (like bathrooms or kitchens)

### Compact electronic transformers

- even more compact than before
- a circular hole of 38 mm suffices
- wiring along the side is ideal for narrow spaces (like porch profiles)
- universally dimmable
- 4-year warranty

Ref. No	Description
320-00121	Compact electronic transformer 70 W, wire PRI and SEC
320-00122	Compact electronic transformer 105 W, wire PRI and SEC

### 150 W transformers

- 30% time saving thanks to the click cover
- connect 4 spots directly
- possibility to daisy chain 8 times
- universally dimmable
- 4-year warranty

Ref. No	Description
320-00123	Electronic transformer 150 W, terminal PRI and SEC
320-00124	Electronic transformer 150 W, wire PRI and SEC

## Select the best transformer for the job

### The selected halogen spot has a terminal

It is best combined with a Niko transformer with a wire connection on the secondary side to ensure a smooth connection.

Applications	Ref. No	Power	Connection PRI
flush-mounting in false ceilings (diameter 55 mm)	320-00124	150 W	dual isolated power cable
flush-mounting (diameter 38 mm)	320-00121	70 W	dual isolated power cable
	320-00122	105 W	dual isolated power cable
IP65 transformers for humid environments and outside use	320-00106	70 W	rubber cable
	320-00107	105 W	rubber cable

### The selected halogen spot has a wire output shorter than 20 cm

It is best combined with a Niko transformer with a wire output on the secondary side to ensure a smooth connection.

Applications	Ref. No	Power	Connection PRI
flush-mounting in false ceilings (diameter 55 mm)	320-00124	150 W	dual isolated power cable
flush-mounting (diameter 38 mm)	320-00121	70 W	dual isolated power cable
	320-00122	105 W	dual isolated power cable
IP65 transformers for humid environments and outside use	320-00106	70 W	rubber cable
	320-00107	105 W	rubber cable

### The selected halogen spot has no connection possibilities

It is best combined with a Niko transformer with a lamp cap to ensure a quick installation.

Applications	Ref. No	Power	Connection PRI
flush-mounting in false ceilings (diameter 55 mm)	320-00103	70 W	2 pairs of terminals

### The selected halogen spot has a wire output longer than 20 cm

It is best combined with a Niko transformer with terminal connection on the secondary side to ensure a smooth connection.

Applications	Ref. number	Power	Connection PRI
flush-mounting in false ceilings (diameter 55 mm)	320-00104	105 W	2 pairs of terminals
	320-00124	150 W	2 pairs of terminals

### Electronic 70 W transformer, terminal PRI and SEC

This universal dimmable electronic transformer (70 W) is used for the connection of low-voltage loads (12 V - SELV). This transformer is very compact and therefore very suitable for connection in small spaces. Strain relief is ensured with the easy-to-install click cap. Two loads can be easily connected to the two secondary outputs, and the two primary inputs make interconnection easy (max. 8x). CE marking, CEBEC and ENEC approved.

- dimensions: 116 x 52 x 32 mm (HxWxD)
- weight: 105 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 20-70 W
- 4-fold, primary terminal connection: 1 x 2.5 mm<sup>2</sup> or 2 x 1.5 mm<sup>2</sup> with screw terminal
- V pri: 230 Vac ± 10%, 50-60 Hz
- 4-fold, secondary terminal connection: 1 x 2.5 mm<sup>2</sup> or 2 x 1.5 mm<sup>2</sup> with screw terminal
- V sec: 11.5 V, 35 kHz
- min. diameter: 55 mm
- flush-mounting height in false ceiling: min. 100 mm
- protection degree: IP20
- filament test at 850 °C
- ambient temperature: 50 °C; Tc: 80 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- suitable for normal combustible surfaces
- self-resetting, built-in protection against short-circuit, overload and overheating
- guarantee: 4 years

### Electronic 150 W transformer, terminal PRI and sec

This universal dimmable electronic transformer (150 W) is used for the connection of low-voltage loads (12 V - SELV). This transformer is very compact and therefore very suitable for connection in small spaces. Strain relief is ensured with the easy-to-install click cap. The transformer is equipped with screw terminals on both the primary and the secondary sides. Up to four loads (4 x 35 W or 3 x 50 W) can be easily connected to the 4 secondary outputs. The 2 primary inputs make interconnection easy (max. 8 times). CE marking; CEBEC and ENEC approved.

- dimensions: 184 x 52 x 32 mm (HxWxD)
- weight: 220 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 35-150 W
- 4-fold primary terminal connection: 1 x 2.5 mm<sup>2</sup> or 2 x 1.5 mm<sup>2</sup> with screw terminal
- V primary: 230 Vac ± 10%, 50-60 Hz
- 8-fold secondary terminal connection: 1x2.5 mm<sup>2</sup> or 2 x 1.5 mm<sup>2</sup> with screw terminal
- V secondary: 11.5 V, 35 kHz
- min. diameter: 55 mm
- mounting height in false ceiling: min. 100 mm
- protection degree: IP20
- filament test at 850 °C
- ambient temperature: 50 °C; Tc: 85 °C
- class II devices: SELV (safety extra low voltage)
- suitable for the power supply of class III loads
- suitable for flush-mounting in furniture
- suitable for normal non-flammable surfaces
- self-restoring, built-in protection against short-circuiting, overloading and overheating
- warranty: 4 years

#### COMPLETE UNIT

### Electronic 70 W transformer, wire PRI and SEC, IP68

This universal dimmable electronic transformer (70 W) is used for the connection of low-voltage loads (12 V - SELV). This transformer is very compact and therefore very suitable for connection in small spaces. The transformer has an IP68 protection degree, is dustfree and jetproof. It is exceptionally suited for installation in damp rooms such as bathrooms and kitchens. The cables are fixed with resin. On the primary side, the transformer is equipped with a rubber cable that can be connected to a mini-connection box (320-00210). This guarantees a quick and correct connection. The silicone wire on the secondary side is directly connected with a spotlight. CE marking, CEBEC and ENEC approved.

- dimensions: 86 x 52 x 32 mm (HxWxD)
- weight: 140 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 20-70 W
- secondary connection: rubber cable - 2 x 1 mm<sup>2</sup>; length: 50 cm
- V pri: 230 Vac ± 10%, 50-60 Hz
- secondary connection: silicon wire (170 °C) - 2 x 0.75 mm<sup>2</sup>; length: 30 cm
- V sec: 11.5 V, 35 kHz
- min. diameter: 55 mm
- flush-mounting height in false ceiling: min. 100 mm

### Compact cast resin electronic 70 W transformer, wire PRI and SEC, round

This universal dimmable round electronic transformer (70 W) is used for the connection of low-voltage loads (12 V - SELV). The cables are fixed by means of resin. On the primary side, the transformer is equipped with a double insulated wire. This wire can be connected to a mini connection box (320-00210) which guarantees a quick and correct connection. The silicon wire on the secondary side can be directly connected to a spotlight. This transformer is very compact and, thanks to its round shape, can be easily concealed when working with spotlights. CE marking and ENEC approved.

- dimensions: 29 x 52.5 mm (HxD)
- weight: 125 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 20-70 W
- primary connection: double insulated mains lead with cord end terminals (2 x 0.75 mm<sup>2</sup>; length: 30 cm)
- primary voltage: 230 Vac  $\pm$  10%, 50-60 Hz
- secondary connection: silicon wire (170 °C) (2 x 0.75 mm<sup>2</sup>; length: 20 cm)
- secondary voltage: 11.5 V, 35 kHz
- min. diameter: 53 mm
- protection degree: IP20
- ambient temperature: 50 °C; Tc: 80 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- suitable for normal combustible surfaces
- self-resetting, built-in protection against short-circuit, overload and overheating
- warranty: 4 years

#### COMPLETE UNIT

**320-00132** Pieces: 10 Complete unit

### Compact cast resin electronic 70 W transformer, wire PRI and SEC, flat

This universal dimmable flat electronic transformer (70 W) is used for the connection of low-voltage loads (12 V - SELV). The cables are fixed by means of resin. On the primary side, the transformer is equipped with a double insulated wire. This wire can be connected to a mini connection box (320-00210) which guarantees a quick and correct connection. The silicon wire on the secondary side can be directly connected to a spotlight. This transformer is very compact and, thanks to its shape, is highly suitable for installation in small spaces. CE marking.

- dimensions: 29 x 103 x 21.5 mm (HxWxD)
- weight: 120 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 20-70 W
- primary connection: double insulated mains lead with cord end terminals (2 x 0.75 mm<sup>2</sup>; length: 30 cm)
- primary voltage: 230 Vac ± 10%, 50-60 Hz
- secondary connection: silicon wire (170 °C) (2 x 0.75 mm<sup>2</sup>; length: 30 cm)
- secondary voltage: 11.5 V, 35 kHz
- minimum diameter: 38 mm
- protection degree: IP20
- ambient temperature: 50 °C; Tc: 80 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- suitable for normal combustible surfaces
- self-resetting, built-in protection against short-circuit, overload and overheating
- warranty: 4 years

### Compact cast resin electronic 105 W transformer, wire PRI and SEC, flat

This universal dimmable flat electronic transformer (105 W) is used for the connection of low-voltage loads (12 V - SELV). The cables are fixed by means of resin. On the primary side, the transformer is equipped with a double insulated wire. This wire can be connected to a mini connection box (320-00210) which guarantees a quick and correct connection. The silicon wire on the secondary side can be directly connected to a spotlight. This transformer is very compact and, thanks to its shape, is highly suitable for installation in small spaces. CE marking.

- dimensions: 29 x 103 x 21.5 mm (HxWxD)
- weight: 140 g
- dimmable with phase control, reverse phase control and universal dimmers
- load (min-max): 35-105 W
- primary connection: double insulated mains lead with cord end terminals (2 x 0.75 mm<sup>2</sup>; length: 30 cm)
- primary voltage: 230 Vac ± 10%, 50-60 Hz
- secondary connection: silicon wire (170 °C) (2 x 0.75 mm<sup>2</sup>; length: 30 cm)
- secondary voltage: 11.5 V, 35 kHz
- min. diameter: 38 mm
- protection degree: IP20
- ambient temperature: 45 °C; Tc: 85 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- suitable for normal combustible surfaces
- self-resetting, built-in protection against short-circuit, overload and overheating
- warranty: 4 years

### IP68 kit

The IP68 kit is the waterproof solution for all outdoor applications. The kit contains:

- an electronic 105 W transformer, terminal PRI and SEC (320-00104),
- a casting pot,
- a sack of resin,
- a convenient box with a holder for the casting pot.

### Ferromagnetic 35 W transformer with wire output, IP40

This ferromagnetic transformer (35 W) is used for the connection of low-voltage loads (12 V - SELV). On the primary side, the transformer is equipped with a double-insulated wire with cord end terminals that can be connected to a mini-connection box (320-00210). This guarantees a quick and correct connection. The silicone wire on the secondary side is directly connected with the load. CE marking, CEBEC and ENEC approved. In compliance with the safety directive EN60669-2-1.

- dimensions: 45 x 76 x 59 mm (HxWxD)
- weight: 750 g
- dimmable with phase control and universal dimmers
- maximum output power: 35 W
- primary connection: double-insulated wire with cord end terminals - 2 x 0.75 mm<sup>2</sup>; length: 30 cm
- V primary: 230 V, 50 Hz
- secondary connection: teflon wire (170 °C) - 2 x 0.75 mm<sup>2</sup>; length: 30 cm
- V secondary: 11.5 V
- min. diameter: 63.5 mm
- protection degree: IP40
- ambient temperature: 25 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- integrated thermal protection
- resettable protection against short-circuit, overload and overheating (interrupt power to reactivate the protection)
- guarantee: 4 years

#### COMPLETE UNIT

**320-00001** Pieces: 10 Complete unit

### Ferromagnetic 35 W transformer with terminal connections

This ferromagnetic transformer (35 W) is used for the connection of low-voltage loads (12 V - SELV). Both the primary and the secondary side of the transformer are equipped with two screw terminals for wire with a diameter of 6 mm<sup>2</sup>. CE marking; CEBC and ENEC approved.

- dimensions: 36 x 182 x 41 mm (HxWxD)
- weight: 1 kg
- dimmable with phase control and universal dimmers
- maximum output power: 35 W
- primary connection: 2 screw terminals of 6 mm<sup>2</sup>
- V primary: 230 V, 50 Hz
- secondary connection: 2 screw terminals of 6 mm<sup>2</sup>
- V secondary: 11.5 V
- min. diameter: 55 mm
- protection degree: IP20
- ambient temperature: 25 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- suitable for flush-mounting in furniture
- integrated thermal protection
- resettable protection against short-circuit, overload and overheating (interrupt power to reactivate the protection)
- guarantee: 4 years

### Short circuit-resistant ferromagnetic 105 W block transformer (terminal connections)

This short circuit-resistant ferromagnetic transformer (105 W) is used for the connection of low-voltage loads (12 V - SELV). The transformer is equipped with a built-in, resettable protection. On the primary side, the transformer is equipped with two screw terminals and on the secondary side with four screw terminals for wire with a diameter of 4 mm<sup>2</sup>. Incl. attachment brackets. CE marking. Complies with the EN 61558-2-6 safety standard.

- dimensions: 119 x 85.5 x 72 mm (HxWxD)
- weight: 1.9 kg
- dimmable with phase control and universal dimmers
- maximum output power: 105 W
- primary connection: 2 screw terminals of 4 mm<sup>2</sup>
- V primary: 230 V, 50 Hz
- secondary connection: 4 screw terminals of 4 mm<sup>2</sup>
- V secondary: 11.6 V
- protection degree: IP20
- ambient temperature: 25 °C
- class II devices: SELV (safety extra-low voltage)
- suitable for supplying power to class III loads
- resettable protection against short-circuit, overload and overheating (interrupt power to reactivate the protection)
- guarantee: 4 years

### Ferromagnetic 150 W block transformer (terminal connections)

This ferromagnetic transformer (150 W) is used for the connection of low-voltage loads (12 V - SELV). On the primary side, the transformer is equipped with two screw terminals and on the secondary side with four screw terminals for wire with a diameter of 4 mm<sup>2</sup>. Incl. attachment brackets. CE marking. Complies with the EN 61558-2-6 safety standard.

- dimensions: 133 x 95 x 80 mm (HxWxD)
- weight: 2.7 kg
- dimmable with phase control and universal dimmers
- maximum output power: 150 W
- primary connection: 2 screw terminals of 4 mm<sup>2</sup>
- V primary: 230 V, 50 Hz
- secondary connection: 4 screw terminals of 4 mm<sup>2</sup>
- V secondary: 11.6 V
- protection degree: IP20
- ambient temperature: 25 °C

## Chapter 7

# Access control

- 7.A Digital solutions
- 7.B Analogue video solutions
- 7.C Analogue audio solutions
- 7.D Installation tools
- 7.E Bell push button

# Digital solutions

Digital access control offers crystal-clear images. Would you like to connect your digital video unit to the existing wiring of your doorbell? That is now possible! Niko's 2-wire IP access control solution is ideal for people who want to switch to digital access control during their renovation, without having to make major changes to their electrical installation. And for those people building a new home, enjoy the benefits of the external video unit for Niko Home Control or the 2-wire IP technology.

## ADVANTAGES

### 2-wire IP access control

#### Easy to install

- replace an existing doorbell with the 2-wire external video unit without changing the wiring
- thanks to the wide camera angle you can place the external video unit in virtually any desired position
- plug-and-play app: scan the QR code
- plug-and-play internal video unit: follow the steps on the screen

#### Safe and reliable

- crystal-clear video quality, even at night (infrared)
- camera keeps every visitor on screen (wide camera angle of 155°)
- connect the external video unit with your personal Niko access control account via a one-time registration
- screen your direct environment whenever you want to by using the 'peek outside' function

#### Easy to use

- stream live video footage to your smartphone (iOS and Android) and to the internal video unit when someone's at the door
- open the electric door lock from a distance using your smartphone
- share your Niko access control account with your family or trusted friends

#### Superior design

- both video units have a stylish, modern design
- the external video unit is equipped with a robust aluminium body
- the external video unit goes with every façade
- the engraved name plate lights up at night

### Video kit, 2-wire, with access control module, external and internal video unit

This video kit contains:

- External video unit, 2-wire, surface-mounted, 1 button
- Access control module, 2-wire, with integrated power supply
- Internal video unit for 2-wire-based access control systems

This compact external video unit is equipped with an HD colour camera, microphone and loudspeaker. The camera with integrated infrared LEDs guarantees better visibility at night (razor-sharp black and white image). You can personalize the unit with a name plate (optionally in engravable PMMA plastic). The internal unit offers outstanding image and sound quality and allows hands-free communication with the visitor. The internal unit is equipped with a flat touch-sensitive screen, which enhances its styling and ease-of-maintenance. The door lock can be connected to the access control module (recommended) or directly to the external unit.

You can register your external video unit via the Niko access control app (Android or iOS) to enable control of the installation via your smartphone. Make sure your access control module is connected to your network router.

The kit can be expanded with:

- One external video unit 510-31001
- Up to 4 internal video units 510-50000

#### Access control module

- power: 230 Vac 50 Hz
- dimensions (HxWxD): 90 x 143.7 x 65.9 mm (8 TE)
- door lock powered: 12 V ac – 1 A
- door lock relay: 24 V – 1 A
- chime relay: 24 V – 1 A

#### Internal video unit

- input voltage: 230 Vac
- screen resolution: 1024 x 600
- screen size: 7"
- dimensions (HxWxD): 115 x 179 x 26.75 mm

#### External video unit

- camera resolution: 2 MP
- IR range: 3 m
- maximum number of door locks: 2
- door lock powered 12 V ac – 1 A
- door lock relay : 24 V – 1 A
- dimensions (HxWxD) 181.1 x 109.4 x 31.1 mm
- wide-angle camera: 155°
- housing: 3 mm aluminium
- protection degree: IP54

#### COMPLETE UNIT

**510-01501** Pieces: 1

#### ACCESSORY

**510-81001** Pieces: 10 Replacement nameplate + removal tool

### Video kit, 2-wire, with access control module and external video unit

This video kit contains:

- External video unit, 2-wire, surface-mounted, 1 button
- Access control module, 2-wire, with integrated power supply

This compact external video unit is equipped with an HD colour camera, microphone and loudspeaker. The camera's infrared LEDs guarantee better visibility at night (razor-sharp black and white image). You can personalize the unit with a name plate (optionally in engravable PMMA plastic). The door lock can be connected to the access control module (recommended) or directly to the external video unit.

You can register your external video unit via the Niko access control app (Android or iOS) to enable control of the installation via your smartphone. Make sure your access control module is connected to your network router.

The kit can be expanded with:

- One external video unit 510-31001
- Up to 5 internal video units 510-50000

Access control module

- power: 230 Vac 50 Hz
- dimensions (HxWxD): 90 x 143.7 x 65.9 mm (8 TE)

### Compact 2-wire external video unit

This compact external video unit is equipped with an HD colour camera, microphone and loudspeaker. The camera with integrated infrared LEDs provides better visibility at night (razor-sharp black and white image). You can personalize the unit with a name plate (optionally in engravable PMMA plastic). The maintenance-free push-button contacts guarantee a long lifespan. The door lock can be connected to the the access control module (recommended) or directly to the external video unit.

You can receive calls from your external video unit on your smartphone via the Niko access control app (Android or iOS).

This external video unit requires the access control module 510-21400 to supply its power. Complete your access control system with the internal video unit 510-50000.

- camera resolution: 2 MP
- IR range: 3 m
- maximum number of door locks: 2
- door lock powered 12 V ac – 1 A
- door lock relay : 24 V – 1 A
- dimensions (HxWxD) 181.1 x 109.4 x 31.1 mm
- wide-angle camera: 155°
- housing: 3 mm aluminium
- protection degree: IP54

### Internal video unit 2-wire

This wall-mounted touchscreen allows you to communicate with callers at your door through a built-in microphone and speakers. See who is calling and unlock the door. Use the 'Peek outside' functionality to look outside whenever you want. Missed calls? A feedback LED notifies you of any unanswered calls. Check your call history of short video snippets to see who wanted to visit you.

The internal video unit is easy to install and configure. The internal video unit can only be used in combination with the access control module 510-21400 and one or maximum two 2-wire external video unit(s) 510-31001.

- wiring: 2-wire
- screen resolution: 1024 x 600
- screen size: 7"
- colour screen
- dimensions (HxWxD): 115 x 179 x 26.75 mm
- protection degree: IP20

#### COMPLETE UNIT

**510-50000** Pieces: 1 Internal video

### Access control module 2-wired

The DIN-rail access control module is the central module of the 2-wire Niko access control installation. It directly connects the external video unit(s) with the touchscreen(s) and/or the internet for use via the Niko access control app.

- The power supply module providing an input voltage of 24 V DC to the bus.
- The connection to (5) internal video units 510-50000 and (2) external video units 510-31001.
- The connection to the internet via UTP cable to the router. This enables the user to control the installation anywhere in the world (via mobile networks such as 3G, 4G or WiFi) using mobile devices (smartphones with iOS or Android). This also ensures the time stamps for all connected internal video units and mobile devices.

The module has a RESET button to restart all connected devices. Each installation must consist of one access control module. You can register your external video unit via the Niko access control app (Android or iOS) to enable control of the installation via your smartphone. Make sure your access control module is connected to your network router.

- cabling: 2 wire, AWG24 to AWG15
- power: 230 Vac 50 Hz
- dimensions (HxWxD): 90 x 143.7 x 65.9 mm (8 TE)
- door lock powered: 12 V ac – 1 A
- door lock relay: 24 V – 1 A
- chime relay: 24 V – 1 A
- protection degree: IP20

#### COMPLETE UNIT

**510-21400** Pieces: 1 DIN-rail controller for external video unit

# Analogue solutions

From an indestructible doorbell to the more sophisticated video or audio units: Niko has a wide range of internal and external units for access control. Some are even the most compact on the market. Easy to install and easy to extend.

## ADVANTAGES

### Compact, sustainable external video and audio units

- extremely solid: all external units are made of thick aluminium (between 3 and 7 mm)
- the surface-mounting units are only 16 to 20 mm thick
- anodised twice – resistant to all types of weather
- suitable for situations with limited space: on the frame of an outer door, on the pole of a gate or on a fence
- bright and even nameplate lighting switched by a light sensor; the nameplate is lit only when it's dark
- all external video units are equipped with a colour camera
- for mail cabinets as well as for flush-mounting and surface-mounting

### Internal video and audio units with sleek design

- extreme compact design
- internal video unit with touch-sensitive controls
- internal units can be mounted on a flush-mounting box
- extended functionality

### Configuration software

- easy programming
- service tool available for analysis and programming
- extendible

Suited for apartments as well as free-standing homes

**Compact external video unit for surface mounting with one column of bell push buttons and colour camera, 16 mm**

The solid unit for surface mounting, which is completely finished in up to 4 mm thick aluminium, is equipped with a built-in colour camera, an adjustable microphone and loudspeaker and a text field for personalisation that will only be illuminated in the dark. The colour camera is equipped with infrared LEDs for a better visibility at night. The maintenance-free, gold-plated push-button contacts guarantee a long lifespan.

- surface-mounting height: 16 mm
- ambient temperature: -20 - 50 °C
- electronic parts protected against water and corrosion
- CE marking
- memory for two serial numbers per push button
- confirmation tone for the visitor
- configurable with the Niko configuration software for access control

Colour camera specifications:

- type: Sony Super HAD CCD-sensor
- resolution: 420 horizontal TV lines
- focal length: 3.7 mm (F=2)
- light sensitivity: 0.2 lux
- video output: 1 Vpp, symmetrical
- diagonal coverage angle: 90°

**COMPLETE UNIT**

<b>10-161</b>	Pieces: 1	With 1 bell push button, 175 x 104 x 16 (19) mm (HxWxD)
<b>10-162</b>	Pieces: 1	With 2 bell push buttons, 175 x 104 x 16 (19) mm (HxWxD)
<b>10-163</b>	Pieces: 1	With 3 bell push buttons, 175 x 104 x 16 (19) mm (HxWxD)

**External video unit for surface mounting with two columns of bell push buttons and colour camera, 20 mm**

The solid unit for surface mounting, which is completely finished in up to 7 mm thick aluminium, is equipped with a built-in colour camera, an adjustable microphone and loudspeaker and text fields for personalisation provided with vandal proof plexiglas (5 mm thick). The colour camera is equipped with infrared LEDs for a better visibility at night. The maintenance-free, gold-plated push-button contacts guarantee a long lifespan. The unit for surface mounting has two columns of bell push buttons, and is therefore suitable for large housing complexes. This device is available with maximum 88 bell push buttons by means of the extension modules. The extension module has the same finish as the external unit. Since the module is opened at the bottom, it has to be mounted sidelong on the external unit.

- surface-mounting height: 20 mm
- electronic parts protected against water and corrosion
- CE marking
- memory for two serial numbers per push button
- confirmation tone for the visitor
- removable EEPROM memory
- configurable with the Niko configuration software for access control

Colour camera specifications:

- type: CMOS sensor
- resolution: 380 horizontal TV lines
- focal length: 2.0 mm (F=2.5)
- light sensitivity: 0 lux with IR, 1 lux without IR
- video output: 1 Vpp, symmetrical
- diagonal coverage angle: 130°

**COMPLETE UNIT**

<b>10-404</b>	Pieces: 1	With 4 bell push buttons, 166 x 135 x 20 mm (HxWxD)
<b>10-406</b>	Pieces: 1	With 6 bell push buttons, 185 x 135 x 20 mm (HxWxD)
<b>10-408</b>	Pieces: 1	With 8 bell push buttons, 204 x 135 x 20 mm (HxWxD)
<b>10-410</b>	Pieces: 1	With 10 bell push buttons, 223 x 135 x 20 mm (HxWxD)
<b>10-412</b>	Pieces: 1	With 12 bell push buttons, 242 x 135 x 20 mm (HxWxD)
<b>10-416</b>	Pieces: 1	With 16 bell push buttons, 280 x 135 x 20 mm (HxWxD)

**EXTENSION MODULE**

<b>10-112-01</b>	Pieces: 1	With 12 bell push buttons, 128 x 135 x 20 mm (HxWxD)
<b>10-114-01</b>	Pieces: 1	With 14 bell push buttons, 147 x 135 x 20 mm (HxWxD)
<b>10-116-01</b>	Pieces: 1	With 16 bell push buttons, 166 x 135 x 20 mm (HxWxD)
<b>10-118-01</b>	Pieces: 1	With 18 bell push buttons, 185 x 135 x 20 mm (HxWxD)

**ACCESSORY**

<b>10-876</b>	Pieces: 1	Protection cap, 83 x 139 x 60 mm (HxWxD)
---------------	-----------	--

### External video unit for flush mounting with one, two or three columns of bell push buttons and colour camera

The ultraflat unit for flush mounting, which is completely finished with an aluminium front plate (3 mm thick), is equipped with a built-in colour camera, an adjustable microphone and loudspeaker and text fields for personalisation provided with vandal-proof plexiglas (5 mm thick). The maintenance-free, gold-plated push-button contacts guarantee a long lifespan. The flush-mounting box is supplied with this device (see technical information for the dimensions of the flush-mounting box).

- electronic parts protected against water and corrosion
- CE marking
- memory for two serial numbers per push button
- confirmation tone for the visitor
- removable EEPROM memory
- configurable with the Niko configuration software for access control

#### Colour camera specifications:

- type: CMOS-sensor
- resolution: 380 horizontal TV lines
- aperture: F2
- focal length: 2.0 mm
- light sensitivity: 0 Lux with IR on; 1 Lux with IR off
- video output: 1 Vpp, symmetrical
- diagonal capture angle: 130°

#### COMPLETE UNIT

<b>10-301</b>	Pieces: 1	With 1 bell push button, 252 x 150 x 3 mm (HxWxD)
<b>10-302</b>	Pieces: 1	With 2 bell push buttons, 252 x 150 x 3 mm (HxWxD)
<b>10-303</b>	Pieces: 1	With 3 bell push buttons, 252 x 150 x 3 mm (HxWxD)
<b>10-304</b>	Pieces: 1	With 4 bell push buttons, 252 x 150 x 3 mm (HxWxD)
<b>10-306</b>	Pieces: 1	With 6 bell push buttons, 296 x 150 x 3 mm (HxWxD)
<b>10-308</b>	Pieces: 1	With 8 bell push buttons, 340 x 150 x 3 mm (HxWxD)
<b>10-310</b>	Pieces: 1	With 10 bell push buttons, 274 x 274 x 3 mm (HxWxD)
<b>10-312</b>	Pieces: 1	With 12 bell push buttons, 296 x 274 x 3 mm (HxWxD)
<b>10-314</b>	Pieces: 1	With 14 bell push buttons, 318 x 274 x 3 mm (HxWxD)
<b>10-316</b>	Pieces: 1	With 16 bell push buttons, 340 x 274 x 3 mm (HxWxD)
<b>10-318</b>	Pieces: 1	With 18 bell push buttons, 296 x 398 x 3 mm (HxWxD)
<b>10-321</b>	Pieces: 1	With 21 bell push buttons, 318 x 398 x 3 mm (HxWxD)

### Transponder reader for transponder keys or cards

The transponder reader is used as a door opening function, either stand-alone or as part of an access control installation. Up to 250 transponder keys (10-905-01) or cards (10-905-02) can be programmed. When reading the key or card, you receive visual and acoustic feedback. The programming of the system is password-protected. The transponder is also protected against sabotage of the device. The module is made of anodised aluminium.

The transponder reader module includes an IR remote control.

- dimensions: 153 x 104 x 16 mm (HxWxD)
- finishing colour: anodised aluminium
- mounting: surface-mounting
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- power supply voltage: +24 V ±8% (18-28 V in stand-alone)
- input current (in standby): 0 mA, I(P) = 17 mA
- max input current: I(Pmax) = 40 mA
- wire technique: 2- or 3-wired
- marking: CE
- up to 250 transponder keys or cards can be programmed
- MIFARE Classic® 1K / 4K technology
- door opening function with potential-free relay contact
- visual and acoustic feedback after code is entered
- LEDs for status indication
- password protection against unauthorized configuration
- sabotage contact
- configurable with Niko configuration software for access control

#### COMPLETE UNIT

<b>10-905</b>	Pieces: 1	Transponder reader for transponder keys or cards
---------------	-----------	--

#### ACCESSORY

<b>10-905-01</b>	Pieces: 1	Transponder key (to be ordered separately for each project)
------------------	-----------	---

#### ACCESSORY

<b>10-905-02</b>	Pieces: 1	Transponder card (to be ordered separately for each project)
------------------	-----------	--

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

**Code keyboard**

The code keyboard for surface mounting, which is completely made of aluminium (3 mm thick), is suitable for both indoor and outdoor applications. Up to ten different user codes can be taught to the code keyboard. Different functions can be assigned to every user code, such as a door opener function or an external relay contact. The code keyboard can be integrated in the Niko access control installation, but it can also be used as a stand-alone appliance. In combination with power supply 20 (10-801), the code keyboard can directly control a door lock. The code keyboard is illuminated by means of five blue LEDs.

- dimensions: 113 x 88 x 12 mm (HxWxD)
- power consumption: I(a) = 0.4 mA – I(Pmax) = 59 mA
- stand-alone use: 24 Vdc, 60 mA
- stand-alone output: 24 Vdc (for controlling a 24 Vdc relay, such as a relay for external audio units (10-835))
- CE marking

**COMPLETE UNIT**

**10-901** Pieces: 1 Code keyboard

**Modular external video unit for flush-mounting (full set - 4 modules)**

This modular flush-mounted external unit offers an elegant and flexible solution for your projects (up to 256 housing units). The start screen of the display can be configured individually (e.g. name of the residence). The front plate is made from high-quality brushed stainless steel. This complete video set is equipped with a dome camera, audio, display and code lock module.

The dome camera module ensures excellent colour image quality, both during the day and at night. It makes it possible to activate a door call, have a conversation and open the door. Thanks to the 3 function keys on the display module, you can easily navigate through the alphabetically sorted resident list. You can also use the code lock module to navigate via the flat number.

Do you require more information and/or help with your project? Feel free to contact Niko.

Specifications of the flush-mounted unit:

- front plate dimensions: 440 x 200 x 3 mm (HxWxD)
- flush-mounting box dimensions: 420 x 180 x 50 mm (HxWxD)
- configurable with the Niko configuration software for access control

Included function modules:

- dome camera module
- speech module
- LCD display module with 3 buttons
- keypad module

**COMPLETE UNIT**

**10-386** Pieces: 1 Modular external video unit for flush-mounting with 4 modules

**Front plate and flush-mounting box for modular external unit**

This modular flush-mounted series offers an elegant and flexible solution for your projects (up to 256 housing units). The front plate is constructed from high-quality, 3 mm thick brushed stainless steel, and is supplied with the accompanying metal flush-mounting box.

- available in 8 different dimensions
- can be combined with separate function modules

**COMPLETE UNIT**

<b>10-351</b>	Pieces: 1	With 1x1 module, 200 x 200 x 3 mm (HxWxD)
<b>10-352</b>	Pieces: 1	With 1x2 modules, 320 x 200 x 3 mm (HxWxD)
<b>10-353</b>	Pieces: 1	With 1x3 module, 440 x 200 x 3 mm (HxWxD)
<b>10-354</b>	Pieces: 1	With 1x4 modules, 560 x 200 x 3 mm (HxWxD)
<b>10-355</b>	Pieces: 1	With 1x5 module, 680 x 200 x 3 mm (HxWxD)
<b>10-356</b>	Pieces: 1	With 1x6 modules, 800 x 200 x 3 mm (HxWxD)
<b>10-357</b>	Pieces: 1	With 2x2 modules, 320 x 320 x 3 mm (HxWxD)

### Audio module for modular external unit

The audio module makes it possible to activate a door call, have a conversation and open the door. The module is made of black anodised aluminium.

The audio module is usually used in combination with the display module (10-362).

- dimensions: 105 x 105 x 27 mm (HxWxD)
- finishing colour: black anodised aluminium
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0.2 mA, I(P) = 4 mA
- max input current: I(Pmax) = 13.5 mA
- wire technique: 3-wired
- marking: CE
- hands-free conversation (standard)
- full duplex conversation possible for internal units with receiver
- visual feedback for visitor (colour pictographs)
- error detection and indication
- integrated twilight switch
- extra clamps: yes (e.g. for connecting door opener)
- removable EEPROM memory
- configurable with Niko Configuration SW for access control

#### COMPLETE UNIT

**10-360** Pieces: 1 Audio module for modular external unit

### Dome camera module for modular external unit

The dome camera module ensures excellent colour image quality. The image sensor has a high resolution and high light sensitivity, both at day/night as well as with strong contrast or backlight. The camera has a 90° picture angle and can be adjusted both horizontally and vertically. The module is made of black anodised aluminium with an acrylic glass dome.

The dome camera module includes an integrated two-wire video transmitter (10-498).

- dimensions: 125 x 105 x 42 mm (HxWxD)
- finishing colour: black anodised aluminium and acrylic glass
- ambient temperature: -10 °C to +50 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0 mA, I(P) = 60 mA
- max input current: I(Pmax) = 60 mA
- wire technique: 6-wired
- marking: CE
- camera with AGC and AWB
- image sensor: 0.8 cm (1/3") DPS
- resolution: 700 horizontal TV lines
- aperture: F1.2
- focal length: 3.6 mm
- light sensitivity: 0.01 lux
- picture angle: 90° diagonally (adjustable 60° horizontally/vertically)
- configurable with the Niko configuration software for access control

#### COMPLETE UNIT

**10-361** Pieces: 1 Dome camera module for modular external unit

### Display module for modular external unit

The display module provides an alphabetic overview of the resident list. With the 3 function keys, you can quickly and easily navigate through the list. The start screen of the display can be configured individually (e.g. name of the residence). The module is made of black anodised aluminium with a display of high-quality plastic.

The display module is usually used in combination with the audio module (10-360) and/or with the code lock module (10-363).

- dimensions: 105 x 105 x 22 mm (HxWxD)
- finishing colour: black anodised aluminium and plastic
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0.11 mA, I(P) = 7.8 mA
- max input current: I(Pmax) = 86 mA
- wire technique: 3-wired
- marking: CE
- fully graphic, monochrome display of 160 x 104 pixels
- white backlight
- data memory: up to 256 residents
- start screen individually programmable
- direct dialling possible (in combination with 10-850)
- visual error indication
- removable EEPROM memory
- configurable with Niko configuration software for access control

#### COMPLETE UNIT

**10-362** Pieces: 1 Display module for modular external unit

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

### Code lock module for modular external unit

The code lock module is used as a door opening function. Up to 20 access codes can be programmed. Upon entering the access code, you receive visual and acoustic feedback. The module is made of black anodised aluminium.

The code lock module can be used as a stand-alone solution or in combination with the audio module (10-360) and/or the display module (10-362).

- dimensions: 105 x 105 x 43 mm (HxWxD)
- finishing colour: black anodised aluminium
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0.2 mA, I(P) = 4 mA
- max input current: I(Pmax) = 17 mA
- wire technique: 6-wired
- marking: CE
- up to 20 access codes can be programmed
- door opening function with potential-free relay contact
- visual and acoustic feedback after code is entered
- LEDs for status indication
- configurable with Niko configuration software for access control

#### COMPLETE UNIT

**10-363** Pieces: 1 Code lock module for modular external unit

### Transponder reader module for modular external unit

The transponder reader module is used as a door opening function. Up to 250 transponder keys (10-905-01) or cards (10-905-02) can be programmed. When reading the key or card, you receive visual and acoustic feedback. The programming of the system is password-protected. The module is made of black plastic.

The transponder reader module includes an IR remote control.

- dimensions: 105 x 105 x 26 mm (HxWxD)
- finishing colour: black plastic
- ambient temperature: -10 °C to +50 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0.1 mA, I(P) = 11 mA
- max input current: I(Pmax) = 25 mA
- power supply voltage: +24 V ±8% (18-28 V in stand-alone)
- wire technique: 2- or 3-wired
- marking: CE
- up to 250 transponder keys or cards can be programmed
- MIFARE Classic® 1K / 4K technology
- door opening function with potential-free relay contact
- visual and acoustic feedback after code is entered
- LEDs for status indication
- password protection against unauthorized configuration
- configurable with Niko configuration software for access control

#### COMPLETE UNIT

**10-364** Pieces: 1 Transponder reader module for modular external unit

#### ACCESSORY

**10-905-01** Pieces: 1 Transponder key (to be ordered separately for each project)

#### ACCESSORY

**10-905-02** Pieces: 1 Transponder card (to be ordered separately for each project)

### House number/info module for modular external unit

The house number/info module is used to display the house number, the name of the residence and other information. Thanks to the backlight with white LEDs the information is clearly legible, both during the day and at night. The module is made of black plastic with transparent acrylic glass.

- dimensions: 105 x 105 x 26 mm (HxWxD)
- finishing colour: black plastic with acrylic glass
- backlight with white LEDs
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- input current in standby: I(a) = 0.2 mA, I(P) = 4 mA
- wire technique: 3-wired
- marking: CE

#### COMPLETE UNIT

**10-365** Pieces: 1 House number/info module for modular external unit

### Blank module for modular external unit

The blank module serves as a filler for the modular external unit. It can later be replaced by an extra function (e.g. code lock or transponder reader module). The module is made of black plastic with transparent acrylic glass.

- dimensions: 105 x 105 x 43 mm (HxWxD)
- marking: CE
- finishing colour: black plastic with acrylic glass

#### COMPLETE UNIT

**10-366** Pieces: 1 Blank module for modular external unit

### Colour camera module for flush mounting

The colour camera module is suitable for flush mounting into existing panels or panels of own design for door intercom or video intercom systems. This camera can be used in combination with the door loudspeaker for flush mounting 10-880-02 and extension 10-881-01.

- dimensions: 80 x 109 x 35 mm (HxWxD)
  - ambient temperature: -20 - 50 °C
  - CE marking
  - configurable with Niko Configuration SW for access control
- Colour camera specifications:
- type: Sony Super HAD CCD sensor
  - resolution: 420 horizontal TV lines
  - aperture: F2
  - focal length: 3.6 mm
  - light sensitivity: 0.1 lux
  - picture angle: 70° horizontal, 50° vertical

#### COMPLETE UNIT

**10-496** Pieces: 1 Colour camera module for flush mounting

#### ACCESSORY

**10-896** Pieces: 1 Flush surround plate, aluminium

### Slim internal video unit for surface mounting, with colour screen and touch buttons

The communication with the visitor via this compact surface-mounted unit is hands-free. The device has clear, intuitive touch buttons:

- door opener button/light switch button
- talk button
- ringtone buttons
- select image touch button
- control function for the DIN rail relay (10-831)
- 2 control functions

NEW

A menu on the screen provides access to standard functions, including the following:

- internal call
- automatic door opener
- call forwarding
- select ringtone for floor call, internal call, call from the main external unit and from an auxiliary external unit
- ringtone/speech volume and image adjustment
- dimensions: 194 x 94 x 21 mm (HxWxD)
- finishing colour: white plastics ASA
- mounting: surface-mounting
- ambient temperature: -5 °C to +40 °C
- protection degree: IP30
- input current (in standby): 0.13 mA, I(P) = 3.18 mA
- max. input current: I(Pmax) = 147 mA
- wire technique: 6-wired
- TFT screen with 8.9 cm (3.5") diagonal screen size
- configurable with the Niko configuration software for access control

#### COMPLETE UNIT

**10-577** Pieces: 1 Slim programmable internal video unit with colour screen and touch buttons

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

### Internal video unit for surface-mounting with colour screen and receiver

The internal video unit for surface-mounting comprises two function keys:

- door opener key
- free function key

One of the following functions can be assigned to the free function key:

- control function for the DIN rail relay (10-831)
- activating the light switch function
- calling up camera images

The device also has a switch on the side to switch the ringtone on and off, as well as a ringtone volume control.

- dimensions (without receiver): 250 x 100 x 28 mm (HxWxD)
- dimensions (with receiver): 250 x 100 x 50 mm (HxWxD)
- housing material: plastic, white
- mounting on flush-mounting socket possible
- CE marking
- video signal input: symmetrical, 1 Vss FBAS
- parallel connection to another internal video unit possible
- 7 adjustable ringtones
- ringtone distinction for floor call, door call and internal call
- configurable with the Niko configuration software for access control
- TFT colour screen: 3.5 inch (8.9 cm diagonal)
- resolution: 320 x 240 pixels, RGB

#### COMPLETE UNIT

**10-575** Pieces: 1 Internal video unit for surface-mounting with colour screen and receiver

### Internal video unit for surface mounting with colour display

The communication with the visitor through this unit for surface mounting is hands-free. The device has five function keys:

- door opener key/key for activating the light switch function
- conversation key
- key for activating and deactivating the ring signal
- key for calling up camera images
- free function key

One of the following functionalities can be assigned to the free function key:

- control function for the DIN rail relay (10-831)
- light switching
- internal call
- ring-and-come-in function
- call forwarding

The side of device has also three navigation keys to consult the menu and to run through the menu options.

- dimensions: 104 x 153 x 19 mm (HxWxD)
- TFT colour display: 68 x 50 mm (HxW)
- material: aluminium and plastic
- for flush-mounting box with conical screw fixing
- CE marking
- two indication LEDs for an engaged-line signal and a call signal
- parallel connection with another internal audio unit possible
- ring tone distinction between a floor call, a door call and an internal call
- configurable with the Niko configuration software for access control
- adjustable ring volume and image

#### COMPLETE UNIT

**10-571** Pieces: 1 Internal video unit for surface mounting with colour display, aluminium

#### ACCESSORY

**10-568** Pieces: 1 Table-top support, aluminium

### Power supply 20

This central power supply for DIN rail mounting is suitable for door and video intercom installations. When used in door intercom installations, a maximum of 20 internal audio units (10-505) and two illuminated external audio units can be connected to the power supply. When used in video intercom installations, an additional direct current power supply (10-805-01) is always required for the displays. The power supply has bus connections, a potential-free relay contact for the light circuit (max. 24 Vdc and 1 A) and an alternating current output for the door opener (8 - 12 Vac). The front side of the power supply is provided with a programming button, a status LED (lights up when put into operation) and two potentiometers to adjust the activation time of the door opener and light circuit.

- dimensions: 90 x 72 x 70 mm (HxWxD) (DIN 4U)
- input voltage: 230 Vac
- output voltage (bus): 24 V  $\pm$  1 V
- activation time of the door opener: 0.8 - 8 s
- activation time of the light circuit: 0.5 s - 5 min
- current: 50 mA (for a two-wire connection), 130 mA (for a three-wire connection) (P wire)
- CE marking

#### COMPLETE UNIT

**10-801** Pieces: 1 Power supply 20

### Video power supply

This video power supply for DIN rail mounting is suitable for video intercom installations with one external video unit, one splitter and a maximum of 12 internal video units (only one of which can be active at any one time). If two internal video units are to be active simultaneously, the installation may only contain six internal video units. The installation can be expanded with one external audio unit, three internal audio units and one relay. The power supply has a potential-free relay contact for the light circuit (max. 24 Vdc and 1 A) and an alternating current output for the door opener (8 - 12 Vac). The front side of the power supply is provided with a programming button, a status LED (lights up when put into operation) and two potentiometers to adjust the activation time of the door opener and light circuit.

- dimensions: 90 x 105 x 70 mm (HxWxD) (DIN 6U)
- input voltage: 230 Vac
- output voltage (bus): 26 V  $\pm$  1 V
- activation time of the door opener: 0.8 - 8 s
- activation time of the light circuit: 0.8 s - 5 min
- CE marking

#### COMPLETE UNIT

**10-806-01** Pieces: 1 Modular power supply for a video installation

### Direct current power supply 2.5 A

This direct current power supply for DIN rail mounting is suitable for extensive video intercom installations. The power supply is always used in combination with power supply 20 (10-801) or power supply 100 (10-802).

- dimensions: 90 x 140 x 70 mm (HxWxD) (DIN 8U)
- input voltage: 230 V  $\pm$  15%
- output voltage: 26 V (I<sub>max</sub>: 2.5 A)
- CE marking

#### COMPLETE UNIT

**10-805-01** Pieces: 1 Direct current power supply 2.5 A

### Relay for flush mounting

This external relay is suitable for mounting in flush mounting boxes and is used for opening a door lock. The relay can react to the door opener function without additional programming. In case several relays are used, the programming should be carried out by means of the service set.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- power supply (bus): 24 V  $\pm$  1 V
- potential-free relay contact: 2 A
- CE marking

#### COMPLETE UNIT

**10-836** Pieces: 1 Relay for flush mounting

7.A

7.B

7.C

7.D

7.E

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

### Universal relay for flush mounting

This external, potential-free relay is suitable for mounting in flush-mounting boxes and is equipped with a potential-free input contact that can be used as an NO or NC contact. The relay is used for the connection of an additional bell or as a light switch.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- power supply (bus): 24 V ± 1 V
- potential-free relay contact: 230 Vac, 3 A
- CE marking

#### COMPLETE UNIT

**10-837** Pieces: 1 Universal relay for flush mounting

### DIN rail relay

The universal relay for DIN rail mounting (10-830) is used for the connection of an additional bell, as a light switch, ... The function of both the relay output and the input contact are freely programmable.

The pre-programmed relay for DIN rail mounting (10-831) switches its relay output when the control function of the internal audio or video units is used (by means of the free function key). The input contact switches the relay output according to the pre-set switching time.

- dimensions: 85 x 18 x 65 mm (HxWxD) (DIN 1U)
- potential-free input contact
- potential-free relay contact: 230 V, 2 A
- two status LEDs for the relay output and the input contact
- switching time of the relay output: 0 - 63 s
- three-wire connection required (a, b, P)
- CE marking

#### COMPLETE UNIT

**10-831** Pieces: 1 Pre-programmed DIN rail relay

#### COMPLETE UNIT

**10-830** Pieces: 1 Universal DIN rail relay

### Video splitter 2 for flush mounting

This video splitter for flush mounting is suitable for splitting video signals over two circuits. The video splitter is provided with an active amplifier. Depending on the number of devices, several video splitters can be included in the installation.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- input current:  $I(a) = 0.0 \text{ mA}$  –  $I(P_{max}) = 60 \text{ mA}$
- signal amplification: 0 - +12 dB (linear)
- maximum output signal: 4 Vpp (in case of 1 Vpp at the input and a terminal resistance of 100 Ω)
- CE marking

#### COMPLETE UNIT

**10-821-01** Pieces: 1 Video splitter 2 for flush mounting

### Modular video splitter 2

This video splitter for DIN rail mounting is suitable for splitting video signals over two circuits. The video splitter is provided with active amplifiers. Depending on the number of devices, several video splitters can be included in the installation.

- dimensions: 90 x 72 x 70 mm (HxWxD) (DIN 4U)
- input current:  $I(a) = 0.0 \text{ mA}$  –  $I(P_{max}) = 75 \text{ mA}$
- signal amplification: 0 - +12 dB (linear)
- maximum output signal: 4 Vpp (in case of 1 Vpp at the input and a terminal resistance of 100 Ω)
- CE marking

#### COMPLETE UNIT

**10-824-01** Pieces: 1 Modular video splitter 2

### Modular video splitter 4

This video splitter for DIN rail mounting is suitable for splitting video signals over four circuits. The video splitter is provided with active amplifiers. Depending on the number of devices, several video splitters can be included in an installation.

- dimensions: 90 x 105 x 70 mm (HxWxD) (DIN 6U)
- input current:  $I(a) = 0.0 \text{ mA}$  –  $I(P_{\text{max}}) = 120 \text{ mA}$
- signal amplification: 0 - +12 dB (linear)
- maximum output signal: 4 Vpp (in case of 1 Vpp at the input and a terminal resistance of 100  $\Omega$ )
- CE marking

#### COMPLETE UNIT

**10-822-01** Pieces: 1 Modular video splitter 4

### Modular video switcher 4

This video switcher for DIN rail mounting sends the video signal coming from a maximum of four external units or external cameras to one output. Several video switchers (maximum sixteen) can be connected in cascade if more than four external units are included in an installation.

- dimensions: 90 x 105 x 70 mm (HxWxD) (DIN 6U)
- four video inputs, one video output
- input voltage: 26 V  $\pm$  8%
- maximum power consumption: 20 mA
- CE marking

#### COMPLETE UNIT

**10-826** Pieces: 1 Modular video switcher 4-fold

### Video transmitter for flush mounting

This video transmitter for flush mounting guarantees the connection between an external camera with coaxial connection and the bus. The video transmitter is supplied with power via the P wire of the bus and can be used on any location.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- input impedance: 75  $\Omega$
- output impedance: 100  $\Omega$ , symmetrical
- video signal: -10 - +4 dB
- camera power supply: 12 V, max. 250 mA
- CE marking

#### COMPLETE UNIT

**10-498** Pieces: 1 Video transmitter for flush mounting

### Telephone interface

This telephone interface is designed to connect the Niko access control installation to the telephone network via the a/b connection of analogue or ISDN telephone exchanges. The power supply voltage is provided via the P wire of the installation. This module is equipped with a potential-free input contact and a relay output with programmable switching time. A maximum of 64 numbers can be programmed in the memory of the telephone interface. In case more numbers are required, more telephone interfaces can be connected in parallel (up to 64).

- dimensions: 90 x 105 x 70 (HxWxD) (DIN 6U)
- CE marking
- control of door opener relay, light relay and a maximum of ten bus relays
- the external audio unit can be connected to the internal telephones
- security feature for programming mode via pin code

#### COMPLETE UNIT

**10-850-01** Pieces: 1 Modular interface

### Audio kit with 1 internal unit with receiver, surface-mounting

This audio kit with two-wire technology consists of:

- one surface-mounting external audio unit with one bell push button (10-151)
- one compact intercom for surface-mounting (10-505)
- one power supply 20 (10-801)

The external unit is equipped with an adjustable microphone and loudspeaker and illuminated text field for personalisation. The ring volume can be adjusted and switched on and off on the internal unit. The classic receiver is used to communicate with the visitor. The door lock can be directly connected to the power supply. The kit is pre-programmed so that all you have to do is connect it.

The kit can be expanded with:

- one internal audio unit (10-525) or one compact intercom for surface mounting (10-505)
- one external audio unit
- one DIN rail relay (10-831) for controlling an extra gate or enclosure
- one table-top support (10-509) for the intercom

#### COMPLETE UNIT

**10-015**

Pieces: 1

Compact audio kit

### Audio kit with 2 internal units with receiver, surface-mounting

This audio kit with two-wire technology consists of:

- one surface-mounting external audio unit with two bell push buttons (10-152)
- two compact intercoms for surface-mounting (10-505)
- a power supply 20 (10-801)

The external unit is equipped with an adjustable microphone and loudspeaker and illuminated text field for personalisation. The ring volume can be adjusted and switched on and off on the internal units. The classic receiver is used to communicate with the visitor. The door lock can be directly connected to the power supply. The kit is pre-programmed so that all you have to do is connect it.

The kit can be expanded with:

- two compact intercoms for surface mounting (10-505)
- one external audio unit
- one DIN rail relay (10-831) for controlling an extra gate or enclosure
- two table-top supports (10-509) for the intercoms

#### COMPLETE UNIT

**10-055**

Pieces: 1

Compact audio kit

### External audio unit for surface mounting with one column of bell push buttons, 16 mm

The compact unit for surface mounting, which is completely made of aluminium, is equipped with an adjustable microphone and loudspeaker as well as text fields for personalisation provided with vandal-proof plexiglas (4 mm thick). The maintenance-free, gold-plated push-button contacts guarantee a long lifespan. The push buttons can also be used for switching the light. Thanks to the two-wire technology, an existing bell push button can easily be replaced by an external audio unit.

- surface-mounting height: 16 mm
- electronic parts protected against water and corrosion
- CE marking
- confirmation tone for the visitor
- removable EEPROM memory
- configurable with the Niko configuration software for access control
- memory for two serial numbers per push button

#### COMPLETE UNIT

<b>10-151</b>	Pieces: 1	With 1 bell push button, 153 x 104 x 16 mm (HxWxD)
<b>10-152</b>	Pieces: 1	With 2 bell push buttons, 153 x 104 x 16 mm (HxWxD)
<b>10-153</b>	Pieces: 1	With 3 bell push buttons, 153 x 104 x 16 mm (HxWxD)
<b>10-154</b>	Pieces: 1	With 4 bell push buttons, 153 x 104 x 16 mm (HxWxD)
<b>10-156</b>	Pieces: 1	With 6 bell push buttons, 197 x 104 x 16 mm (HxWxD)

### External audio unit for surface mounting with two columns of bell push buttons, 20 mm

The solid unit for surface mounting, which is completely finished in up to 7 mm thick aluminium, is equipped with an adjustable microphone and loudspeaker as well as text fields for personalisation provided with vandal-proof plexiglas (5 mm thick). The maintenance-free, gold-plated push-button contacts guarantee a long lifespan. The push buttons can also be used for switching the light. The unit for surface mounting has two columns of bell push buttons, and is therefore suitable for large housing complexes. This device is available with maximum 92 bell push buttons by means of the extension modules. The extension module has the same finish as the external unit. Since the module is opened at the bottom, it has to be mounted sidelong on the external unit.

- surface-mounting height: 20 mm
- electronic parts protected against water and corrosion
- CE marking
- confirmation tone for the visitor
- removable EEPROM memory
- configurable avec le logiciel de configuration Niko pour le contrôle d'accès
- memory for two serial numbers per push button

#### COMPLETE UNIT

<b>10-104</b>	Pieces: 1	With four bell push buttons, 128 x 135 x 20 mm (HxWxD)
<b>10-106</b>	Pieces: 1	With six bell push buttons, 147 x 135 x 20 mm (HxWxD)
<b>10-108</b>	Pieces: 1	With eight bell push buttons, 166 x 135 x 20 mm (HxWxD)
<b>10-110</b>	Pieces: 1	With ten bell push buttons, 185 x 135 x 20 mm (HxWxD)

#### EXTENSION MODULE

<b>10-112-01</b>	Pieces: 1	With 12 bell push buttons, 128 x 135 x 20 mm (HxWxD)
<b>10-114-01</b>	Pieces: 1	With 14 bell push buttons, 147 x 135 x 20 mm (HxWxD)
<b>10-116-01</b>	Pieces: 1	With 16 bell push buttons, 166 x 135 x 20 mm (HxWxD)
<b>10-118-01</b>	Pieces: 1	With 18 bell push buttons, 185 x 135 x 20 mm (HxWxD)

#### ACCESSORY

<b>10-876</b>	Pieces: 1	Protection cap, 83 x 139 x 60 mm (HxWxD)
---------------	-----------	--

**External audio unit for flush mounting with one, two or three columns of bell push buttons**

The ultraflat unit for flush mounting, which is completely finished with an aluminium front plate (3 mm thick), is equipped with an adjustable microphone and loudspeaker as well as text fields for personalisation provided with vandal-proof plexiglas (5 mm thick). The maintenance-free, gold-plated push-button contacts guarantee a long lifespan. The push buttons can also be used for switching the light. Thanks to the two-wire technology, an existing bell push button can easily be replaced by an external audio unit. The flush-mounting box is supplied with this device (see technical information for the dimensions of the flush-mounting box).

- electronic parts protected against water and corrosion
- CE marking
- memory for two serial numbers per push button
- confirmation tone for the visitor
- electronic parts protected against water and corrosion
- removable EEPROM memory
- configurable with the Niko configuration software for access control

**COMPLETE UNIT**

<b>10-201</b>	Pieces: 1	With 1 bell push button, 208 x 150 x 3 mm (HxWxD)
<b>10-202</b>	Pieces: 1	With 2 bell push buttons, 208 x 150 x 3 mm (HxWxD)
<b>10-203</b>	Pieces: 1	With 3 bell push buttons, 208 x 150 x 3 mm (HxWxD)
<b>10-204</b>	Pieces: 1	With 4 bell push buttons, 208 x 150 x 3 mm (HxWxD)
<b>10-206</b>	Pieces: 1	With 6 bell push buttons, 252 x 150 x 3 mm (HxWxD)
<b>10-208</b>	Pieces: 1	With 8 bell push buttons, 296 x 150 x 3 mm (HxWxD)
<b>10-210</b>	Pieces: 1	With 10 bell push buttons, 340 x 150 x 3 mm (HxWxD)
<b>10-212</b>	Pieces: 1	With 12 bell push buttons, 252 x 274 x 3 mm (HxWxD)
<b>10-214</b>	Pieces: 1	With 14 bell push buttons, 274 x 274 x 3 mm (HxWxD)
<b>10-216</b>	Pieces: 1	With 16 bell push buttons, 296 x 274 x 3 mm (HxWxD)
<b>10-218</b>	Pieces: 1	With 18 bell push buttons, 318 x 274 x 3 mm (HxWxD)
<b>10-220</b>	Pieces: 1	With 20 bell push buttons, 340 x 274 x 3 mm (HxWxD)
<b>10-224</b>	Pieces: 1	With 24 bell push buttons, 296 x 398 x 3 mm (HxWxD)
<b>10-227</b>	Pieces: 1	With 27 bell push buttons, 318 x 398 x 3 mm (HxWxD)

**Transponder reader for transponder keys or cards**

The transponder reader is used as a door opening function, either stand-alone or as part of an access control installation. Up to 250 transponder keys (10-905-01) or cards (10-905-02) can be programmed. When reading the key or card, you receive visual and acoustic feedback. The programming of the system is password-protected. The transponder is also protected against sabotage of the device. The module is made of anodised aluminium.

The transponder reader module includes an IR remote control.

- dimensions: 153 x 104 x 16 mm (HxWxD)
- finishing colour: anodised aluminium
- mounting: surface-mounting
- ambient temperature: -25 °C to +55 °C
- protection degree: IP44
- vandal proof: yes
- power supply voltage: +24 V ±8% (18-28 V in stand-alone)
- input current (in standby): 0 mA, I(P) = 17 mA
- max input current: I(Pmax) = 40 mA
- wire technique: 2- or 3-wired
- marking: CE
- up to 250 transponder keys or cards can be programmed
- MIFARE Classic® 1K / 4K technology
- door opening function with potential-free relay contact
- visual and acoustic feedback after code is entered
- LEDs for status indication
- password protection against unauthorized configuration
- sabotage contact
- configurable with Niko configuration software for access control

## Code keyboard

The code keyboard for surface mounting, which is completely made of aluminium (3 mm thick), is suitable for both indoor and outdoor applications. Up to ten different user codes can be taught to the code keyboard. Different functions can be assigned to every user code, such as a door opener function or an external relay contact. The code keyboard can be integrated in the Niko access control installation, but it can also be used as a stand-alone appliance. In combination with power supply 20 (10-801), the code keyboard can directly control a door lock. The code keyboard is illuminated by means of five blue LEDs.

- dimensions: 113 x 88 x 12 mm (HxWxD)
- power consumption:  $I(a) = 0.4 \text{ mA}$  –  $I(P_{max}) = 59 \text{ mA}$
- stand-alone use: 24 Vdc, 60 mA
- stand-alone output: 24 Vdc (for controlling a 24 Vdc relay, such as a relay for external audio units (10-835))
- CE marking

### COMPLETE UNIT

**10-901** Pieces: 1 Code keyboard

## Modular external audio unit for flush-mounting with 3 modules

Modular external audio unit for flush-mounting with 3 modules: audio, display and code lock

This modular flush-mounted external unit offers an elegant and flexible solution for your projects (up to 256 housing units). The start screen of the display can be configured individually (e.g. name of the residence). The front plate is made from high-quality brushed stainless steel. This complete audio set is equipped with an audio, display and code lock module.

It makes it possible to activate a door call, have a conversation and open the door. Thanks to the 3 function keys on the display module, you can easily navigate through the alphabetically sorted resident list. You can also use the code lock module to navigate via the flat number.

An overview of the entire series of modular external units (mounting kits and functional modules) can be found under 'video solutions'.

Do you require more information and/or help with your project? Feel free to contact Niko.

- front plate dimensions: 440 x 200 x 3 mm (HxWxD)
- flush-mounting frame dimensions: 420 x 180 x 50 mm (HxWxD)
- finishing colour: brushed steel; modules made of black aluminium
- protection degree: IP44
- ambient temperature: -20 °C to +50 °C
- vandal proof: yes
- input current in standby:  $I(a) = 0.4 \text{ mA}$ ,  $I(P) = 140 \text{ mA}$
- max input current:  $I(P_{max}) = 245 \text{ mA}$
- wire technique: 3-wired
- marking: CE
- suitable for projects with up to 256 housing units
- fully graphic, monochrome display of 160 x 104 pixels
- hands-free conversation (standard); full duplex conversation possible
- visual feedback for visitor (colour pictographs)
- error detection and indication
- integrated twilight switch
- direct dialling possible (in combination with 10-850)
- extra clamps: yes (e.g. for connecting door opener)
- removable EEPROM memory
- configurable with the Niko configuration software for access control

### COMPLETE DEVICE

**10-286** Pieces: 1 Modular external audio unit for flush-mounting with 3 modules

### Door loudspeaker for flush mounting

The door loudspeaker is suitable for flush mounting into existing panels or panels of own design for door intercom or video intercom systems. The product is equipped with an adjustable microphone and loudspeaker. The push buttons can also be used for switching the light.

- dimensions: 80 x 112 x 34 mm (HxWxD)
- CE marking
- cable length of removable microphone: 25 cm
- connection terminals for 16 bell push buttons
- memory for two serial numbers per push button
- confirmation tone for the visitor
- removable EEPROM memory
- configurable with Niko Configuration SW for access control

The door loudspeaker is expandable with up to six extension modules (10-881-01) in cascade. The small connecting cable on the extension module enables its connection with the door loudspeaker.

- dimensions: 56 x 88 x 30 mm (HxWxD)
- CE marking
- connection terminals for 32 bell push buttons
- memory for two serial numbers per push button
- removable EEPROM memory

#### ACCESSORY

**10-881-01** Pieces: 1 Extension module

### Compact intercom for surface mounting

The intercom for surface mounting has four function keys:

- door opener key
- key for switching the light
- key for activating and deactivating the ring signal
- free function key

One of the following functionalities can be assigned to the free function key:

- control function for the DIN rail relay (10-831)
- internal call
- ring-and-come-in function
- call forwarding

The table-top support is used for mounting on a table:

- dimensions: 185 x 67 x 26 mm (HxWxD)
- including a 3 m cable with RJ12 connector
- dimensions (without receiver): 180 x 100 x 23 mm (HxWxD)
- dimensions (with receiver): 204 x 100 x 50 mm (HxWxD)
- material of the housing: white plastic
- mounting on flush-mounting box possible
- CE marking
- ring tone distinction between a floor call, a door call and an internal call
- two indication LEDs for an engaged-line signal and a call signal
- adjustable ring and speech volume with volume control at the bottom
- configurable avec le logiciel de configuration Niko pour le contrôle d'accès
- parallel connection with another internal audio unit possible
- 13 adjustable ring tones

#### COMPLETE UNIT

**10-505** Pieces: 1 Compact intercom for surface mounting, white

#### ACCESSORY

**10-509** Pieces: 1 Table-top support, aluminium

### Power supply 20

This central power supply for DIN rail mounting is suitable for door and video intercom installations. When used in door intercom installations, a maximum of 20 internal audio units (10-505) and two illuminated external audio units can be connected to the power supply. When used in video intercom installations, an additional direct current power supply (10-805-01) is always required for the displays. The power supply has bus connections, a potential-free relay contact for the light circuit (max. 24 Vdc and 1 A) and an alternating current output for the door opener (8 - 12 Vac). The front side of the power supply is provided with a programming button, a status LED (lights up when put into operation) and two potentiometers to adjust the activation time of the door opener and light circuit.

- dimensions: 90 x 72 x 70 mm (HxWxD) (DIN 4U)
- input voltage: 230 Vac
- output voltage (bus): 24 V ± 1 V
- activation time of the door opener: 0.8 - 8 s
- activation time of the light circuit: 0.5 s - 5 min
- current: 50 mA (for a two-wire connection), 130 mA (for a three-wire connection) (P wire)
- CE marking

#### COMPLETE DEVICE

**10-801** Pieces: 1 Power supply 20

7.A

7.B

7.C

7.D

7.E

The most recent information can be found at [www.niko.eu](http://www.niko.eu)

### Direct current power supply 2.5 A

This direct current power supply for DIN rail mounting is suitable for extensive video intercom installations. The power supply is always used in combination with power supply 20 (10-801) or power supply 100 (10-802).

- dimensions: 90 x 140 x 70 mm (HxWxD) (DIN 8U)
- input voltage: 230 V  $\pm$  15%
- output voltage: 26 V (I<sub>max</sub>: 2.5 A)
- CE marking

#### COMPLETE UNIT

**10-805-01** Pieces: 1 Direct current power supply 2.5 A

### Relay for external audio units

This external relay is suitable for flush mounting in all external audio units and is used for opening a door lock.

- dimensions: 20 x 26 x 6 mm (HxWxD)
- relay contact: 24 V, 2 A
- CE marking

#### COMPLETE UNIT

**10-835** Pieces: 1 Relay for external audio units

### Relay for flush mounting

This external relay is suitable for mounting in flush mounting boxes and is used for opening a door lock. The relay can react to the door opener function without additional programming. In case several relays are used, the programming should be carried out by means of the service set.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- power supply (bus): 24 V  $\pm$  1 V
- potential-free relay contact: 2 A
- CE marking

#### COMPLETE UNIT

**10-836** Pieces: 1 Relay for flush mounting

### Universal relay for flush mounting

This external, potential-free relay is suitable for mounting in flush-mounting boxes and is equipped with a potential-free input contact that can be used as an NO or NC contact. The relay is used for the connection of an additional bell or as a light switch.

- dimensions: 51 x 51 x 22 mm (HxWxD)
- power supply (bus): 24 V  $\pm$  1 V
- potential-free relay contact: 230 Vac, 3 A
- CE marking

#### COMPLETE UNIT

**10-837** Pieces: 1 Universal relay for flush mounting

## DIN rail relay

The universal relay for DIN rail mounting (10-830) is used for the connection of an additional bell, as a light switch, ... The function of both the relay output and the input contact are freely programmable.

The pre-programmed relay for DIN rail mounting (10-831) switches its relay output when the control function of the internal audio or video units is used (by means of the free function key). The input contact switches the relay output according to the pre-set switching time.

- dimensions: 85 x 18 x 65 mm (HxWxD) (DIN 1U)
- potential-free input contact
- potential-free relay contact: 230 V, 2 A
- two status LEDs for the relay output and the input contact
- switching time of the relay output: 0 - 63 s
- three-wire connection required (a, b, P)
- CE marking

### COMPLETE UNIT

**10-831** Pieces: 1 Pre-programmed DIN rail relay

### COMPLETE UNIT

**10-830** Pieces: 1 Universal DIN rail relay

## External unit connection for up to 4 secondary external audio units

This external unit connection makes it possible to configure an access control installation with 1 main external unit and a maximum of 4 secondary external audio units. From the main external unit a call can be made to all secondary installations, and within the same secondary installation speech connections can also be established.

- dimensions: 90 x 105 x 70 mm (HxWxD) (DIN 6U)
- input voltage: 230 Vac  $\pm$  10%
- output voltage: +24 V  $\pm$  8%
- output current: I(a) = 35 mA (on the line); I(P) = 60 mA
- activation time for door opener: 3 s (standard)
- wire technique: 3-wired
- marking: CE
- possibility to use 5 external unit connections in 1 installation
- (5x4 secondary installations)

### COMPLETE UNIT

**10-803** Pieces: 1 External unit connection for up to 4 slave external audio units

## Telephone interface

This telephone interface is designed to connect the Niko access control installation to the telephone network via the a/b connection of analogue or ISDN telephone exchanges. The power supply voltage is provided via the P wire of the installation. This module is equipped with a potential-free input contact and a relay output with programmable switching time. A maximum of 64 numbers can be programmed in the memory of the telephone interface. In case more numbers are required, more telephone interfaces can be connected in parallel (up to 64).

- dimensions: 90 x 105 x 70 (HxWxD) (DIN 6U)
- CE marking
- security feature for programming mode via pin code
- control of door opener relay, light relay and a maximum of ten bus relays
- the external audio unit can be connected to the internal telephones

### COMPLETE UNIT

**10-850-01** Pieces: 1 Modular interface

### Niko configuration software for access control

Using Niko configuration software, you can configure your access control project offline beforehand (on laptop). You assign the bell push buttons to the right internal unit. You can set the desired parameters for most devices and units. After, you can quickly and easily upload the entire configuration into the installation, using the PC interface (10-855) which is available separately.

The Niko configuration software for access control can also be used to read an existing installation for maintenance of changing the parameters.

Download the Niko configuration software for access control via [www.niko.be/NAC\\_Configuration\\_SW](http://www.niko.be/NAC_Configuration_SW).

#### COMPLETE UNIT

**10-854** Pieces: 1 Configuration Software for access control

### PC interface for programming and configuration

The PC interface, in combination with the Niko configuration software for access control, is suitable to read or configure a new or existing installation and/or modify the settings of separate devices. The interface is connected to the bus via an intermediate circuit board. The connection to the PC or laptop occurs via USB.

The drivers for PC interface can be downloaded via [www.niko.eu](http://www.niko.eu). The drivers are available for PC or laptop with a Windows operating system.

- required PC configuration: minimum Windows 98SE
- USB connection: USB 1.1 or USB 2.0

For more information and project support, please contact Niko.

#### COMPLETE UNIT

**10-855** Pieces: 1 PC interface for programming

### Service set

With this service set, a complete installation can be easily programmed by one single person. All devices can be connected with one another without requiring access to the housing units. The service set can also be used to analyse the installation or to locate an error in the installation. Thanks to the built-in call suppression, all basic functions can be tested and programmed without bothering the residents. The service set is connected to the external unit(s) or the bus using a connection plug.

- dimensions: 200 x 50 x 35 mm (HxWxD)
- special functions such as program block
- function keys (light switch key, programming key, key for testing
- the speech connection to the external and internal unit)
- indication of bus parameters (bus voltage, bus commands, ...) on the display

#### COMPLETE UNIT

**10-870** Pieces: 1 Service set

### Bell push button

The Niko bell push button is finished with high-quality materials such as sprayed aluminium and black technical plastic. The product is excellently protected against corrosion and is suitable for variable weather conditions. The text field is large and very well illuminated. The push button is provided with contacts of top quality: a reed contact, consisting of two bar contacts in a hermetically sealed glass enclosure. The lamp has to be removed when using an electronic gong.

- dimensions: 95 x 54 x 19 mm (HxWxD)

#### COMPLETE UNIT

<b>05-540</b>	Pieces: 10	Including lamp, 12 Vac, 1 A, black/aluminium
<b>05-540-06</b>	Pieces: 10	Including lamp, 6 Vac, 1 A, black/aluminium

Niko designs electr(on)ic solutions to enhance buildings to better suit the needs of the people who live and work in them. By using less energy, by improving light comfort and safety and by making sure all applications work together seamlessly. Buildings with Niko are more efficient, are controllable from a distance and interact within bigger ecosystems. Niko is a Belgian family business from Sint-Niklaas with 700 employees and 10 European branches.

At Niko, there is one question that keeps us busy every day: "How can we enhance buildings to better suit your needs?"
